Digital Resources, Creativity and Innovative Methodologies in Language Teaching and Learning Adriana Teresa Damascelli, 2017-06-20. The concept of university language centres has changed in recent decades. Initially conceived as laboratories for practical and autonomous language learning, they are now considered as places with more specific and complex functions in language teaching and learning. University language centres now constitute networks for exchanging knowledge and know-how in order to respond to ever-changing multilingual and multicultural contexts. At the same time, the availability and acquisition of new technologies is contributing to the creation of new tools for the provision of appropriate services and training. This collection covers a wide range of topics related to the activities, experiences and applied research carried out in Italian university language centres. It provides further evidence of the important role university language centres play in promoting language expertise, developing tools and adopting digital resources and providing support and training for language teaching. Technology, creativity, methodologies and plurilingualism are key topics in the book as they constitute the essential ingredients for effective and successful language teaching and learning. The volume's thirty-three chapters provide multi-perspective approaches showing how the real contexts of current language education need the integration of theoretical backgrounds with the best practices resulting from practical experience.

Apprentissage Des Langues Et Web Social Chotel Laure, 2015-11-03. Dans la mouvance du web social, les réseaux socionumériques pour l'apprentissage des langues font l'objet de recherches en apprentissage des langues assisté par ordinateur. Ce livre porte sur la description et l'analyse de l'activité d'apprenants de français sur un site de réseautage en langues, Busuu, dans un contexte d'apprentissage non formel. En s'appuyant sur la théorie de l'activité, la communication médiatisée par ordinateur et la perspective interactionniste, l'auteure montre que les actions des apprenants oscillent entre interactivité homme-machine et interaction humaine médiatisée. Si l'interactivité telle qu'elle est proposée sur Busuu semble peu pertinente en termes d'apprentissage des langues, l'analyse des interactions en ligne fait ressortir des potentialités acquisitionnelles via des apprentissages mutuels. Reste à tisser des liens entre apprentissage non formel et formel pour soutenir les apprenants dans leur autonomisation. Ce livre issu d'un travail de master recherche s'adresse principalement aux étudiants et chercheurs en didactique des langues et TICE.
