Perfect Copies Shiamin Kwa,2023-01-13 Analyzing the way that recent works of graphic narrative use the comics form to engage with the problem of reproduction Shiamin Kwa's Perfect Copies reminds us that the mode of production and the manner in which we perceive comics are often quite similar to the stories they tell Perfect Copies considers the dual notions of reproduction mechanical as well as biological and explores how comics are works of reproduction that embed questions about the nature of reproduction itself Through close readings of the comics My Favorite Thing Is Monsters by Emil Ferris The Black Project by Gareth Brookes The Generous Bosom series by Conor Stechschulte Sabrina by Nick Drnaso and Panther by Brecht Evens Perfect Copies shows how these comics makers push the limits of different ideas of reproduction in strikingly different ways Kwa suggests that reading and thinking about books like these that push us to engage with these complicated questions teaches us how to become better readers

Unflattening Nick Sousanis,2015-04-20 The primacy of words over images has deep roots in Western culture But what if the two are inextricably linked equal partners in meaning making Written and drawn entirely as comics Unflattening is an experiment in visual thinking Nick Sousanis defies conventional forms of scholarly discourse to offer readers both a stunning work of graphic art and a serious inquiry into the ways humans construct knowledge Unflattening is an insurrection against the fixed viewpoint Weaving together diverse ways of seeing drawn from science philosophy art literature and mythology it uses the collage like capacity of comics to show that perception is always an active process of incorporating and reevaluating different vantage points While its vibrant constantly morphing images occasionally serve as illustrations of text they more often connect in nonlinear fashion to other visual references throughout the book They become allusions allegories and motifs pitting realism against abstraction and making us aware that more meets the eye than is presented on the page In its graphic innovations and restless shape shifting Unflattening is meant to counteract the type of narrow rigid thinking that Sousanis calls flatness Just as the two dimensional inhabitants of Edwin A Abbott's novella Flatland could not fathom the concept of upwards Sousanis says we are often unable to see past the boundaries of our current frame of mind Fusing words and images to produce new forms of knowledge Unflattening teaches us how to access modes of understanding beyond what we normally apprehend

Past Volume 2 Comics and the Historical Imagination in the World contributors seek to examine the many ways in which history worldwide has been explored and re represented through comics and how history is a complex construction of imagination reality and manipulation Through a close analysis of such works as V for Vendetta Maus and Persepolis this volume contends that comics are a form of mediation between sources both primary and secondary and the reader Historical comics are not drawn from memory but offer a nonliteral interpretation of an object re constructed in the creator s mind Indeed when it comes to history stretching the limits of the imagination only serves to aid in our understanding of the past and through that understanding shape ourselves and our futures This volume the second in a two volume series is divided into three sections History and Form Historical Trauma and Mythic Histories The first section considers the relationship between history and the comic book form The second section engages academic scholarship on comics that has recurring interest in the representation of war and trauma The final section looks at mythic histories that consciously play with events that did not occur but nonetheless inflect our understanding of history Contributors to the volume also explore questions of diversity and relationality addressing differences between nations and the cultural historical and economic threads that bind them together however loosely and however much those bonds might chafe Together both volumes bring together a range of different approaches to diverse material and feature remarkable scholars from all over the world

Modernism Today Sjef Houppermans, Pete Liebrechts, Jan Baetens, Otto Boele, 2013-10-25 This book manifests at least four recent shifts and tendencies within Modernist studies in general that point at the expansion of this increasingly interdisciplinary field First Modernist studies has seen a temporal expansion to the extent that scholars in the field have come to turn to both the pre and posterior history of Modernism Second the field has witnessed a spatial expansion in that increasingly so researchers have also come to scrutinize the Modernisms of regions at the fringes of Europe and beyond Thirdly a vertical expansion too has marked Modernist studies in recent decades not only by further expanding the canon of women writers and exploring the continuum between high and lowbrow but also by looking at the artistic and mediatized hierarchies and cross fertilizations operative in the period A fourth conceptual expansion of the field shows that whereas concepts such as middlebrow art regarded and to some extent even avant garde were once exotic notions of at best marginal importance in European Modernist studies they now form part and parcel of the field complicating and expanding it conceptually
