How Computers Entered the Classroom, 1960-2000 Carmen Flury, Michael Geiss, 2023-06-19 In the history of education the question of how computers were introduced into European classrooms has so far been largely neglected This edited volume strives to address this gap The contributions shed light on the computerization of education from a historical perspective by attending closely to the different actors involved such as politicians computer manufacturers teachers and students political rationales and ideologies as well as financial political or organizational structures and relations The case studies highlight differences in political and economic power as well as in

ideological reasoning and the priorities set by different stakeholders in the process of introducing computers into education. However, the contributions also demonstrate that simple cold war narratives fail to capture the complex dynamics and entanglements in the history of computers as an educational technology and a subject taught in schools. The edited volume thus provides a comprehensive historical understanding of the role of education in an emerging digital society.

The Institutionalisation of Evaluation in Asia-Pacific Reinhard Stockmann, Wolfgang Meyer, Niklas Zierke, 2023-11-21. This book examines the progress of institutionalisation of evaluation in Asia Pacific from various perspectives. It presents prior developments and current states of evaluation in 11 countries focusing on three dimensions namely the political, social and professional systems. These detailed country reports which have been written by selected researchers and authors of the respective countries lead to a concluding comparison and synthesis. This is the third of four volumes of the compendium *The Institutionalisation of Evaluation*. The first volume on Europe was published in 2020 and the second volume on the Americas in 2022. It will be followed by another volume on Africa. The overall aim is to provide an interdisciplinary audience with cross country learning to enable them to better understand the institutionalisation of evaluation in different nations, world regions and sectors.

Shop Window, Flagship, Common Ground Judith A. Muskett, 2019-11-30. How are cathedrals and churches understood? Are they shop windows through which to gaze at the riches on offer within the Christian life? Are they flagships of the Spirit? Are they both sacred spaces and community utilities? Shop window, flagship, common ground views the rich ministry and innovative mission of cathedrals through the novel lens of metaphor and it offers comparative insights on cathedrals and cathedral-like churches. Located in the emerging international field of cathedral studies, the book explores the usage and inferences of a range of metaphors including shop windows of the Church of England, flagships of the Spirit, beacons of the Christian faith, magnets and sacred space, common ground. This volume also shows how such metaphors can stimulate different types of research about the function of cathedral and church buildings. With a Foreword by Professor Grace Davie, the book suggests that cathedrals and cathedral-like churches may play a role within vicarious religion theory. It will provide a thought-provoking critique for practitioners and a valuable contribution for scholars of cathedral studies, congregational studies and ecclesiology.

Inclusive Teaching Strategies for Discipline-based English Studies Hing Wa (Helena) Sit, 2017-07-13. This book presents empirical findings that reveal various teaching strategies and responses from two sub-cultural groups of students, i.e. local Hong Kong and Mainland students, with regard to their English studies.
