Ku Bridging September Intake:

Downstream Effects of Culvert and Bridge Replacement Bruce M. McEnroe, 2006 This report presents a framework for evaluation of likely impacts on downstream flooding and channel erosion Two methods for predicting changes in flood peaks are presented and demonstrated in examples The first method which requires flood hydrograph simulation and reservoir routing is applicable to all cases The second method which does not require hydrograph simulation or routing is applicable to culverts that operate under inlet control with no roadway overtopping The effect of detention storage on downstream sediment transport is investigated computationally Australasian Weekly Manufacturer ,1960 **Engineering News-record** ,1899 Engineering News and American Contract Journal ,1899 Official Gazette of the United States Patent Office United States.
