McDowell,1997 Contains papers from the May 1996 Symposium on Applications of Continuum Damage Mechanics CDM to Fatigue and Fracture Papers in Section I deal with various aspects of modeling damage in composite materials such as high temperature environmental degradation fatigue and viscous damage in metal a Charism in the Church Constant Leke Ngolefac,2024-03-01 Charism is a hot contemporary issue The growing interest in the charisms is one of the significant religious developments of our time Opinions on charisms vary to a remarkable degree Unfortunately in some cases diverse viewpoints have led to confusion among Christians On the positive side though this developing interest in charisms has contributed to spiritual renewal and stimulated biblical research in this most important area of the Church s life The exponential growth of the Charismatic Pentecostal Movement throughout the world and especially in Africa urged led to choice of this topic on charisms In the Charismatic Pentecostal Movements the issue of charisms is very vital and extremely important It is at the centre of its spirituality and practice This Movement has spread to almost all major Christian confessions denominations and continues to attract many followers This work is unique among the many studies written on the charisms Even though the subject of charisms has received some scholarly attention most have not delved into the role of the charisms in the Church from Pauline perspective as this study does The following observations and reasons demonstrate that it is still meaningful and worthwhile to study charisms in Pauline letters **Body and World** Samuel Todes,2001-04-27 Body and World is the definitive edition of a book that should now take its place as a major contribution to contemporary existential phenomenology Samuel Todes goes beyond Martin Heidegger and Maurice Merleau Ponty in his description of how independent physical nature and experience are united in our bodily action His account allows him to preserve the authority of experience while avoiding the tendency towards idealism that threatens both Heidegger and Merleau Ponty Todes emphasizes the complex structure of the human body front back asymmetry the need to balance in a gravitational field and so forth and the role that structure plays in producing the spatiotemporal field of experience and in making possible objective knowledge of the objects in it He shows that perception involves nonconceptual but nonetheless objective forms of judgment One can think of Body and World as fleshing out Merleau Ponty s project while presciently relating it to the current interest in embodiment not only in philosophy but also in psychology linguistics cognitive science artificial intelligence neuroscience and anthropology Todes s work opens new ways of thinking about problems such as the relation of perception to thought and the possibility of knowing an independent reality problems that have occupied philosophers since Kant and still concern analytic and continental philosophy *Maimonides and Contemporary Tort Theory*

Yuval Sinai, Benjamin Shmueli, 2020-08-06 Presents Maimonides complete tort theory and how it compares with other tort theories both in the Jewish world and beyond **Taking Issue** Baruch A. Brody, 2004-06-30 A pioneer in the theory of pluralistic casuistry the idea that there are almost as many facets to moral choices as there are cases that call for choices Baruch Brody takes issue with conventional bioethical wisdom and challenges the rigid principlism of contemporary bioethics His views have been seen as controversial but they are firmly held and convincingly argued all of which have led him to be one of the most widely discussed and highly admired bioethicists of our time He argues for the fundamental distinction between active and passive euthanasia for a need to reconceptualize approaches to brain death and for the right of providers to unilaterally discontinue life support He shows support for the waiving of the requirement of informed consent for some research for the widespread use of animals in research and for the use of placebos in many international clinical trials When it comes to morality as it is practiced in medicine Brody makes clear that the ethical issues are never as simple as black and white that there are myriad factors and fine nuances that can and should challenge decision making as it is commonly practiced in difficult medical cases In this collection delving thoughtfully and systematically into methodology research ethics clinical ethics and Jewish medical ethics he tackles thorny life and death questions head on and fearlessly He casts a light into all the corners of end of life decisions a field in which he has exemplary credentials while illuminating a new understanding of morality and ethics The introduction outlines Brody's approach defines the terminology used and contrasts his ethical positions with much of the competing literature Taking Issue will be invaluable to students and scholars in medical ethics bioethics and philosophy of medicine *Elements of the Helping Process* Raymond Fox, 2013-08-21 Elements of the Helping Process A Guide for Clinicians takes a humanistic approach to guiding clinicians emphasizing that professional practice involves a deliberate conscious and disciplined use of self with clients participating in a forum that is steady safe and consistent As with the previous editions it is directed personally to clinicians and students and contains illustrative case material and instructive excerpts from actual practice experience Fox advances five overarching themes the advent and influence of neuroscience genetics and epigenetics and their implications for differential interventions the pivotal place of self awareness introspection and reflection in providing treatment the intersection of science and art evidence based practice and experiential wisdom in advancing effective therapy the infusion and provision of hope especially in calamitous situations personality type Selected chapters from the second edition have been updated and expanded and new chapters on such topics as neuroscience and genetics the contribution of personality types and advances in trauma research and treatment have been added Any mental health clinician looking for guidance on establishing an environment of sharing openness challenge and change with his or her clients will find this book to be an invaluable resource **Law Notes** Albert Gibson, Robert McLean, 1990 *Cemeteries and Society in Merovingian Gaul* Guy Halsall, 2010 Bundeling van de zeven belangrijkste essays over de sociale interpretatie van de Merovingische begraafplaatsen archeologie Stigma, State

Expressions and the Law Paul Quinn, 2019-05-21 This book demonstrates the difficulties the law is likely to encounter in regulating the expressive activities of the state particularly with regard to the stigmatization of vulnerable groups and minorities Freedom of speech is indispensable to a democratic society enabling it to operate with a healthy level of debate and discussion Historically legal scholars have underappreciated the power of stigmatization instead focusing on anti discrimination law and the implicit assumption that the state is permitted to communicate freely with little fear of legal consequences Whilst integral to a democratic society the freedom of a state to express itself can however also be corrosive allowing influential figures and organizations the possibility to stigmatize vulnerable groups within society The book takes this idea and uniquely weaving legal analysis with extant psychological and sociological research shows that current legal approaches to stigmatization are limited Starting with a deep insight into what constitutes state expressions and how they can become stigmatizing the book then goes on to look into the capacity the law currently has to limit these expressions and asks even if it could should it This fascinating study of an increasingly topical subject will be of interest to any legal scholar working in the field of freedom of expression and discrimination law Indigenous Symbols and Practices in the Catholic Church Dr Kathleen J Martin, 2013-06-28 Indigenous Symbols and Practices in the Catholic Church presents views concepts and perspectives on the relationships among Indigenous Peoples and the Catholic Church as well as stories images and art as metaphors for survival in a contemporary world Few studies present such interdisciplinary interpretations from contributors in multiple disciplines regarding appropriation spiritual and religious tradition educational issues in the teaching of art and art history the effects of government sanctions on traditional practice or the artistic interpretation of symbols from Indigenous perspectives Through photographs and visual materials interviews and data analysis personal narratives and stories these chapters explore the experiences of Indigenous Peoples whose lives have been impacted by multiple forces Christian missionaries governmental policies immigration and colonization education assimilation and acculturation Contributors investigate current contexts and complex areas of conflict regarding missionization appropriation and colonizing practices through asking questions such as What does the use of images mean for resistance transformation and cultural destruction And What new interpretations and perspectives are necessary for Indigenous traditions to survive and flourish in the future *The Fractal Self* John L. Culliney, David Jones, 2017-07-31 Our universe science reveals began in utter simplicity then evolved into burgeoning complexity Starting with subatomic particles dissimilar entities formed associations binding bonding growing branching catalyzing cooperating as self joined other following universal laws with names such as gravity chemical attraction and natural selection Ultimately life arose in a world of dynamic organic chemistry and complexity exploded with wondrous new potential Fast forward to human evolution and a tension that had existed for billions of years now played out in an unprecedented arena of conscious calculation and cultural diversity Cooperation interleaving with competition intimacy oscillating with integrity we dwell in a world where yin meets yang in human affairs

on many levels In *The Fractal Self* John Culliney and David Jones uncover surprising intersections between science and philosophy Connecting evidence from evolutionary science with early insights of Daoist and Buddhist thinkers among others they maintain that sagely behavior envisioned in these ancient traditions represents a pinnacle of human achievement emerging out of our evolutionary heritage They identify an archetype the fractal self a person in any walk of life who cultivates a cooperative spirit A fractal self is a sage in training who joins others in common cause leads from within and achieves personal satisfaction in coordinating smooth performance of the group team or institution in which he or she is embedded Fractal selves commonly operate with dedication and compassionate practice in the service of human society or in conserving our planet But the competitive side of human nature is susceptible to greed and aggression Self aggrandizement dictatorial power and ego driven enforcement of will are the goals of those following a self serving path individuals the authors identify as antisages Terrorist leaders are an especially murderous breed but aggrandizers can be found throughout business religion educational institutions and governments Humanity has reached an existential tipping point will the horizon already in view expand with cooperative progress toward godlike emergent opportunities or contract in the thrall of corrupt oligarchs and tribal animosities We have brought ourselves to a chaotic edge between immense promise and existential danger and are even now making our greatest choice *Applied Science & Technology Index*, 1997 *Justice of the Peace*

Overholt, 1989 Channels of Prophecy is a cross cultural study It argues that prophetic intermediation is a widespread phenomenon in ancient and modern cultures and proposes a way of identifying and describing the underlying similarity among intermediaries It discusses the nature of prophetic authority and the function of miracles performed by prophets It suggests that divination may be viewed as one type
