Mediel Hove, Geoff Harris

2014 Preparatory Examination Gauteng:

Refractions of the National, the Popular and the Global in African Cities Simon Bekker, Sylvia Croese, 2021-02-26
Case studies of metropolitan cities in nine African countries from Egypt in the north to three in West and Central Africa two in East Africa and three in Southern Africa make up the empirical foundation of this publication The interrelated themes addressed in these chapters the national influence on urban development the popular dynamics that shape urban development and the global currents on urban development make up its framework All authors and editors are African as is the publisher The only exception is Gran Therborn whose recent book *Cities of Power* served as motivation for this volume Accordingly the issue common to all case studies is the often conflictual powers that are exercised by national global and popular forces in the development of these African cities Rather than locating the case studies in an exclusively African historical context the focus is on the trajectories of the postcolonial city with the important exception of Addis Ababa with a non colonial history that has granted it a special place in African consciousness These trajectories enable comparisons with those of postcolonial cities on other continents This in turn highlights the fact that Africa today the least urbanised continent on an increasingly urbanised globe is in the thick of processes of large scale urban transformation illustrated in diverse ways by the case studies that make up the foundation of this publication

Short Description *Infrastructures for Peace in Sub-Saharan Africa* Mediel Hove, Geoff Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and societal levels This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace

- 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa
- 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable
- 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it
