Future of STEM education: Multiple perspectives from researchers Subramaniam Ramanathan, Ida Ah Chee Mok, 2023-03-28

The Robot Factory Joseph Ganem, 2018-08-27 This book exposes a disturbing misuse of the scientific method to advance policies and agendas that are in fact detrimental to both science and education The author a physics professor examines two related trends in education the practice of data driven reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology Many of the reforms being foisted on educators have more in common with pseudo science than real science The reduction of education to a commodity and the shilling of science as a means to enhance corporate profits lead to an impoverished and stunted understanding of science in particular and of education in general How is it possible for schools with all students learning at

grade level to be rated as failing teachers to be rated as ineffective after all their students meet their learning outcomes rising grade school math standards to result in more college students needing remedial math politicians to disparage scientists and their results but argue that more students should study science These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States and makes a compelling case for rethinking the standardized optimized and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students OECD Economic Surveys:

Brazil 2020 OECD,2020-12-16 The COVID 19 pandemic has caused severe human suffering and triggered a deep recession in Brazil Economic policies reacted in a timely and decisive manner to the crisis supporting millions of Brazilians But a strong and inclusive recovery from the recession will require long lasting improvements in economic policies Improving fiscal outcomes remains one of Brazil s principal challenges given a high debt burden to which the pandemic has added significantly Public spending will need to become more efficient including by building on past progress in the fight against corruption and economic crimes Social protection can be strengthened through a better focus on the most effective policies and benefits which could allow significant reductions in inequality and poverty Stronger growth will hinge on raising productivity which has been virtually stagnant for decades This requires addressing underlying policy challenges including reducing regulatory burdens reforming taxes strengthening judicial efficiency and fostering a stronger integration into the global economy Raising productivity implies reallocations and structural changes in the economy which should be accompanied by well designed training and education policies Training with a strong focus on local skill demand can help workers master the transition and seize new opportunities to move into better jobs SPECIAL FEATURES BOOSTING
