Classroom Assessment James H. McMillan,2004 This book provides prospective and current teachers with a concise non technical and practical guide to conducting a full range of high quality classroom assessments The text emphasizes

assessment in the context of the realities of teaching and teacher decision making as well as on how assessment is integrated with instruction. Assessment methods are integrated with instruction and presented according to when teachers evaluate students before, during, and after an instructional unit and the learning targets that are measured. There is considerable emphasis on the nature of learning targets and how different assessments are most appropriate for different targets. For each assessment technique, suggestions for effective practice are presented with examples and case studies. There are separate chapters on contemporary assessment techniques and issues such as performance and portfolio assessments as well as separate chapters on assessing affective targets and students with disabilities included in the regular classroom. A balance is provided with traditional forms of assessment and the need for teachers to administer, interpret, and use results from standards-based large-scale assessments and other standardized tests. **The American Journal of Psychiatry**, 2002-07

This second edition solidifies *Setting Performance Standards* as the only book providing a comprehensive profile of both the issues and the how-to methods that define this thorny field. Four chapters have been removed, 11 chapters have been added, 2 chapters have major revisions, and all chapters have been updated. Comprehensive Part I provides a conceptual overview of standard setting and its overarching issues. Part II provides practical how-to information on the newest standard setting methods. Part III provides information and advice on persistent and potential challenges in standard setting. Practical Part II is the heart of the book, reviewing 16 of the newest standard setting methods far more than any other book. Expertise.
