The Cross, the Plow and the Skyline Ernest J. Yanarella, 2022-03-01 The apocalyptic pastoral and urban traditions have fundamentally shaped Western history and influenced American religion culture and politics This book argues that these traditions have not only been decisive in giving form and substance to classic and modern American literature but have been appropriated by contemporary science fiction As a loosely connected set of cultural narratives the Cross the Plow and the

Skyline have through the medium of science fiction and fantasy provided a bold vista on the future grounded in an emergent ecological imagination In the expanded second edition of the original 2001 publication the author argues that a significant shift has taken place in contemporary Anglo American science fiction and fantasy SF F from twentieth century SF F critically analyzed in the first edition s critical inquiry Avantgarde works in twenty first century speculative fiction extensively examined in representative works in interludes separating the slightly revised original chapters have become darker in their visions of the possible future more focused on slowness over breakneck speed more amenable to gender racial and global diversity in authorship plot and subgenre creation less attached to anchor concepts like the city wilderness and the domesticated landscape in plot development more prone to dystopian and critical dystopian tropes simultaneously more open toward but critical of Young Adult fiction and more supportive of the breakdown of borders and antagonisms between science fiction and fantasy and SF F and literary fiction Ensconced in the cultural social and political zeitgeist of the New Millennium s first two decades these features of twenty first century science fiction and fantasy may yet settle into and inform emergent and pluralistic varieties of ecological politics spreading across the globe and confronting the Earth s social and environmental crises of our times and coming decades

New Weird Fiction and the Anthropocene Trang Dang, 2025-07-24 This book explores the development of ecological awareness in Jeff VanderMeer s New Weird novels focusing specifically on the Southern Reach 2014 2024 and Borne 2017 2019 series Examining the New Weird genre as an understudied part of climate fiction the chapters investigate how these texts language content and form develop unique and fascinating ways in which one can think and live more ecologically As the first book length study on VanderMeer s work to contextualize his novels through object oriented ontology OOO an emerging branch of speculative philosophy that investigates how things exist this work enables a uniquely experimental reading of VanderMeer one that accentuates how his work unsettles what is perceived as normal and exposes the bounds of human reasoning as well as how we understand ourselves and our relationships with nonhumans Dang also engages with interdisciplinarity situating

VanderMeer's work within cultural discourse around the Anthropocene environmental anthropology prehistoric archeology evolutionary biology and Indigenous studies **The 2000s: A Decade of Contemporary British Fiction** Nick
