Bodies And Souls Or Spirited Bodies Current Issues In Theology:

Bodies and Souls, or Spirited Bodies? Nancey Murphy, 2006-01-12 Are humans composed of a body and a nonmaterial mind or soul or are we purely physical beings Opinion is sharply divided over this issue In this clear and concise book Nancey Murphy argues for a physicalist account but one that does not diminish traditional views of humans as rational moral and capable of relating to God This position is motivated not only by developments in science and philosophy but also by biblical studies and Christian theology The reader is invited to appreciate the ways in which organisms are more than the sum of their parts That higher human capacities such as morality free will and religious awareness emerge from our neurobiological complexity and develop through our relation to others to our cultural inheritance and most importantly to God Murphy addresses the questions of human uniqueness religious experience and personal identity before and after bodily resurrection

Mind, Brain and the Elusive Soul Mark Graves, 2016-04-22 Does science argue against the existence of the human soul Many scientists and scholars believe the whole is more than the sum of the parts This book uses information and systems theory to describe the more that does not reduce to the parts One sees this in the synapses or apparently empty gaps between the neurons in one's brain where informative relationships give rise to human mind culture and spirituality Drawing upon the disciplines of cognitive science computer science neuroscience general systems theory pragmatic philosophy and Christian theology Mark Graves reinterprets the traditional doctrine of the soul as form of the body to frame contemporary scientific study of the human soul

Body, Soul, and Human Life (Studies in Theological Interpretation) Joel B. Green, 2008-07-01 Are humans composed of a material body and an immaterial soul This view is commonly held by Christians yet it has been undermined by recent developments in neuroscience Exploring what Scripture and theology teach about issues such as being in the divine image the importance of community sin free will salvation and the afterlife Joel Green argues that a dualistic view of the human person is inconsistent with both science and Scripture This wide ranging discussion is sure to provoke much thought and debate Bestselling books have explored the relationship between body mind and soul Now Joel Green provides us with a biblical perspective on these issues

The Resounding Soul Samuel Kimbriel, Eric Austin Lee, 2016-09-29 It is surely not coincidental that the term soul should mean not only the centre of a creature's life and consciousness but also a thing or action characterised by intense vivacity that bike's got soul It also seems far from coincidental that the same contemporary academic discussions that have largely cast aside the language of soul in their quest to define the character of human mental life should themselves be so bloodless or so lacking in soul The Resounding Soul arises from the opposite premise that the task of understanding human nature is bound up with the more critical task of learning to be fully human The papers collected here are derived from a conference in Oxford sponsored by the Centre of Theology and Philosophy and explore the often surprising landscape that emerges when human consciousness is approached from this angle Drawing upon literary philosophical theological historical and musical modes of analysis these essays remind

the reader of the power of the ancient language of soul over against contemporary impulses to reduce fragment and overly determine human selfhood

The Power of the Resurrected Body George C. Evans, 2025-01-28 In *The Power of the Resurrected Body* the journey from ancient Jewish beliefs to modern Christian understandings of the afterlife is explored in depth The book delves into the transformative promise of bodily resurrection paralleling Jesus own resurrection Drawing on historical and cultural perspectives it examines the evolving concepts of the body from Hellenistic Judaism to post Enlightenment Christianity The mystery of Jesus physical existence his birth death and the empty tomb serves as a focal point for understanding the nature of the resurrected body Engaging with diverse viewpoints the study highlights the significance of bodily continuity and the unique spiritual and physical dimensions of resurrection This book offers a fresh perspective on the role of the body in the afterlife exploring its preparation and preservation as key to eternal existence

The Soul of Theological Anthropology Joshua R. Farris, 2016-11-25 Recent research in the philosophy of religion anthropology and philosophy of mind has prompted the need for a more integrated comprehensive and systematic theology of human nature This project constructively develops a theological accounting of human persons by drawing from a Cartesian as a term of art model of anthropology which is motivated by a long tradition As was common among patristics medievals and Reformed Scholastics Farris draws from philosophical resources to articulate Christian doctrine as he approaches theological anthropology Exploring a substance dualism model the author highlights relevant theological texts and passages of Scripture arguing that this model accounts for doctrinal essentials concerning theological anthropology While Farris is not explicitly interested in thorough critique of materialist ontology he notes some of the significant problems associated with it Rather the present project is an attempt to revitalize the resources found in Cartesianism by responding to some common worries associated with it

A Liberation Theology of the Brain Carmelo Santos-Rolón, 2025-06-10 Drawing on experiences from the lab the local congregation the immigrant rights movement the university classroom the global church and brain science this book invites readers to discover the transformative possibilities that arise when we recognize that the insights of science and theology can complement and transform each other Brain science and theology can be powerful partners in God s work of liberating all of us from the internalized structures of oppression that colonize imaginations imprison emotions subjugate bodies and fracture societies Trained as a scientist a pastor and a theologian Carmelo Santos Rol n brings together insights from various fields in neuroscience and the cognitive sciences such as the neuroscience of religious experience the neuroscience of emotions the cognitive science of religion and the neuroscience of decision making with data from liberation postcolonial decolonial and Lutheran ecumenical theologies to analyze the spiritual experience of holistic liberation The result is a theological framework informed by science that allows us to appreciate how the Spirit of God is at work in with and under neurons bodies and communities in all their beautiful messiness and complexity In the tradition of liberation theologies which insist that action and reflection belong together and must inform each other this book aims at a theology

with dirty hands and worn out shoes It is meant for a people who are not just intellectually curious about who God is and how religion affects our brains but who are eager to join in God's work of bringing healing and hope to a wounded world Theology and neuro science together allow us to witness how the Spirit of God is at work deep inside the nooks and crannies of our brains in the chemistry of our nervous systems in the emotions that orient our actions and in the communities that shape our identities Through tangible means such as words and rituals symbols and narratives sacraments and community God liberates us for lives of meaning and purpose at the service of the beautiful future that God is bringing into being The Ethics of Superintelligent Design Paul Golata, 2018-03-07 Artificial intelligence AI permeates Google searches the personal assistants in our smartphones and is all over our newsfeeds Watson's machine learning has already started to revolutionize many important industries including oncology law finance and entertainment The idea that man is about to increase his immediate surroundings with exponential gains in the level of intelligence over the coming generations is based upon a technological revolution and the potential for artificial superintelligence ASI It is within this context that there is a prevailing need for a discussion of its ethical implications As a Christian ethicist Paul Golata believes that the need for this conversation to be informed by Christian principles is imperative ASI is a move toward the proper handling of information However how a society interprets and applies this information is actually more pertinent than the raw amount of information it possesses This important ethical conversation is being led by humanistic thinkers who assume that all of reality is just matter in motion and that mind is nothing more than electrochemical activity in the wetware of human brains The Ethics of Superintelligent Design critically examines and challenges some of the most important trajectories of ASI while upholding the authority and inerrancy of the Bible the supernatural creation account a realistic view of the state of humanity and biblical ethics

Corporeal Theology Tobias Tanton, 2023 Corporeal Theology brings theology into conversation with the area of cognitive science research known as embodied cognition which considers the way in which human thinking is shaped by the kinds of bodies we have and the way they navigate their environment proposing that Christian religious ideas are adapted to embodied ways of thinking Second Corinthians and Paul's Gospel of Human Mortality Richard I. Deibert, 2017-01-30 How does Paul's bodily mortality both collapse his apostolic authority in Corinth and yet confirm his gospel Richard I Deibert explores the vital relationship between Paul's experience of death and his theology of death Back cover **The Concept of Soul in Judaism, Christianity and Islam** Christoph Böttigheimer, Wenzel Maximilian Widenka, 2023-07-24 This volume of the series Key Concepts in Interreligious Discourses investigates the roots of the concept of soul in Judaism Christianity and Islam The human soul fascinates not only believers in the three monotheistic faiths Believing in an immortal entity surpassing body materia and their temporality and thus seeming to be closer to the creator than the mere body was and remains to be a vividly discussed theme in theological and practical debates Even our secular postreligious environment is unable to disengage from the key concept of the soul Numerous proverbs undefined concepts and hopes prove this fact

Asking for the soul means asking fundamental questions like life after death and therefor asking for one of the most fundamental and uniting hopes of human beings be they secular or religious The volume presents the concept of soul in its different aspects as anchored in the traditions of Judaism Christianity and Islam It unfolds commonalities and differences between the three monotheistic religions as well as the manifold discourses about peace within these three traditions The book offers fundamental knowledge about the specific understanding of the soul in each one of these traditions their interdependencies and their relationship to secular world views

A Handbook to Old Testament Exegesis William P. Brown, 2017-03-17 Designed for both Hebrew and non Hebrew students A Handbook to Old Testament Exegesis offers a fresh hands on introduction to exegesis of the Old Testament William P Brown begins not with the biblical text itself but with the reader helping students to identify their own interpretive lenses before engaging the biblical text Brown guides the student through a wide variety of interpretive approaches including modern methodologies feminist womanist Latino a queer postcolonial disability and ecological approaches alongside more traditional methods This allows students to critically reflect on themselves as bona fide interpreters While covering a wide range of biblical passages Brown also highlights two common biblical texts throughout the work to help show how each interpretive approach highlights different dimensions of the same texts Students will appreciate the value of an empathetic inquiry of Scripture that is both inclusive of others and textually in depth

Faith Facing Reality John W. de Gruchy, 2022-10-21 The COVID 19 pandemic and the war in Ukraine have starkly reminded us of the realities that threaten our future on planet Earth Christian faith is not a way of escaping these realities but of engaging them in the struggle for justice and peace motivated by love enabled by faith and sustained by hope This is based on the conviction that in Jesus Christ the reality of God has become redemptively embodied within the reality of the world Written within the context of South Africa but with global vision and in conversation with the legacy of Dietrich Bonhoeffer this book is an attempt to stir up discussion and inform action in connecting worldly and transcendent reality Inevitably this will be controversial not least because that is something that Bonhoeffer risked This is certainly true when it comes to the five realities that provide much of the book s substance the persistence of racism the will to power scientism and soulless technology the conflict in Israel Palestine and the threat of wars and pandemics Is it possible to believe in the God of Jesus Christ in such a world If so what does that mean and how does it help us live creatively redemptively and faithfully To answer these questions the author examines the meaning of faith the human desire for transcendence and the need for conversion wisdom solidarity and responsible freedom

The Concept of Self in Hinduism, Buddhism, and Christianity and Its Implication for Interfaith Relations Kiseong Shin, 2017-05-05 This is the first comparative study of the self and no self in Hinduism Buddhism and Christianity In spite of doctrinal differences within these three belief systems they agree that human beings are in a predicament from which they need to be liberated Indian religions including Hinduism and Buddhism share the belief that human nature is inherently perfectible while the epistemological and psychological

limitation of the human being is integral to Christian belief Regarding the immortality of the human being Hinduism and Christianity traditionally and generally agree that human beings as atman or soul possess intrinsic immortality On the contrary Buddhism teaches the doctrine of no self anatta Further in their quest to analyze the human predicament and attempt a way out of it they employ different concepts such as sin and salvation in Christianity attachment tanka and enlightenment nirvana in Buddhism and ignorance avidya and liberation moksa in Hinduism This volume seeks to show that that behind these concepts are deep concerns related to human existence and its relationship with the whole creation These common concerns can be a basis for a greater understanding and dialogue between Christians Hindus and Buddhists

Smith, 2014 Cardinal Walter Kasper has written It is time it is the right time to speak of God In this book readers are invited to explore the Hebrew Bible and use their God given ability to work through important questions about God including Why is God so angry in the Bible Is the biblical God male or female or what Who is Satan Why do people suffer By exploring the Bible s answers to these and other biblical questions Smith offers readers encouragement to think from the heart that is intellectual exploration that is touched by the heart and also touches on matters of the heart about the nature of God Readers are further invited to nourish their vision of God in order to better know and serve God and humanity
