Rainbow Body and Resurrection Francis V. Tiso,2016-01-26 A leading authority on the rainbow body traces its history in the encounter of religions in medieval Central Asia exploring a previously unimagined connection between early Dzogchen and the resurrection of Jesus Francis V Tiso a noted authority on the rainbow body explores this manifestation of spiritual realization in a wide ranging and deeply informed study of the transformation of the material body into a body of light Seeking evidence on the boundary between physical science and deep spirituality that might elucidate the resurrection of Jesus he investigates the case of Khenpo A Ch a Buddhist monk who died in eastern Tibet in 1999 Rainbow Body and Resurrection chronicles the dissolution of Khenpo s material body within a week of his death including eye witness interviews

Tiso describes the spiritual practices that give rise to the rainbow body and traces their history deep into the encounter of religions in medieval Central Asia. His erudite exploration of the Tibetan phenomenon raises the fascinating question of whether there is a connection between the rainbow body and the dying and rising of Jesus. Drawing on a wealth of recent research, Tiso expands his discussion to include the contemplative geography out of which Dzogchen arose some time in the eighth century along the great Silk Road across Central Asia. The result is an illuminating consideration of previously unimagined relationships between spiritual practices and beliefs in Central Asia. "Women, Gender and Art in Asia, c. 1500-1900" Melia Belli Bose, 2017-07-05. Women Gender and Art in Asia c. 1500-1900 brings women's engagements with art into a pan-Asian dialogue with essays that examine women as artists, commissioners, collectors, and subjects from India, Southeast Asia, Tibet, China, Korea, and Japan from the sixteenth to the early twentieth century. The artistic media includes painting, sculpture, architecture, textiles, and photography. The book is broadly concerned with four salient questions: How unusual was it for women to engage directly with art? What factors precluded more women from doing so? In what ways did women's artwork or commissions differ from those of men? And what were the range of meanings for woman as subject-matter? The chapters deal with historic individuals about whom there is considerable biographical information. Beyond locating these uncommon women within their socio-cultural milieux, contributors consider the multiple strands that twined to comprise their complex identities and how these impacted their works of art. In many cases, the woman's status as wife, mother, widow, ruler, or concubine, and multiple combinations thereof, as well as her religion and lineage, determined the media, style, and content of her art. Women Gender and Art in Asia c. 1500-1900 adds to our understanding of works of art, their meanings, and functions.

Being Human in a Buddhist World Janet Gyatso, 2015-01-20 Critically exploring medical thought in a cultural milieu with no discernible influence from the European Enlightenment *Being Human in a Buddhist World* reveals an otherwise unnoticed intersection of early modern sensibilities and religious values in traditional Tibetan medicine It further studies the adaptation of Buddhist concepts and values to medical concerns and suggests important dimensions of Buddhism's role in the development of Asian and global civilization Through its unique focus and sophisticated reading of source materials *Being Human* adds a crucial chapter in the larger historiography of science and religion The book opens with the bold achievements in Tibetan medical illustration commentary and institution building during the period of the Fifth Dalai Lama and his regent Desi Sangye Gyatso then looks back to the work of earlier thinkers tracing a strategically astute dialectic between scriptural and empirical authority on questions of history and the nature of human anatomy It follows key differences between medicine and Buddhism in attitudes toward gender and sex and the moral character of the physician who had to serve both the patient's and the practitioner's well being *Being Human in a Buddhist World* ultimately finds that Tibetan medical scholars absorbed ethical and epistemological categories from Buddhism yet shied away from ideal systems and absolutes instead embracing the imperfectability of the human condition
