Brandscapes Anna Klingmann, 2010-09-24 Architecture as imprint as brand as the new media of transformation of places communities corporations and people In the twenty first century we must learn to look at cities not as skylines but as brandscapes and at buildings not as objects but as advertisements and destinations In the experience economy experience itself has become the product we re no longer consuming objects but sensations even lifestyles In the new environment of brandscapes buildings are not about where we work and live but who we imagine ourselves to be In Brandscapes Anna Klingmann looks critically at the controversial practice of branding by examining its benefits and considering the damage it may do Klingmann argues that architecture can use the concepts and methods of branding not as a quick and easy selling tool for architects but as a strategic tool for economic and cultural transformation Branding in architecture means the expression of identity whether of an enterprise or a city New York Bilbao and Shanghai have used architecture to enhance their images generate economic growth and elevate their positions in the global village Klingmann looks at different kinds of brandscaping today from Disneyland Las Vegas and Times Square prototypes and case studies in branding to Prada s superstar architect designed shopping epicenters and the banalities of Niketown But beyond outlining the status quo Klingmann also alerts us to the dangers of brandscapes By favoring the creation of signature buildings over more comprehensive urban interventions and by severing their identity from the complexity of the social fabric Klingmann argues today s brandscapes have in many cases resulted in a culture of the copy As experiences become more and more commodified and the global landscape progressively more homogenized it falls to architects to infuse an ever more aseptic landscape with meaningful transformations How can architects use branding as a means to differentiate places from the inside out and not as current development practices seem to dictate from the outside in When architecture brings together ecology economics and social well being to help people and places regain self sufficiency writes Klingmann it can be a catalyst for cultural and economic transformation

Cincinnati Magazine , 2001-11 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region

The Consumer Response to Gasoline Price Changes Kenneth Thomas Gillingham, 2011 When gasoline prices rise people notice the news is filled with reports of pinched household budgets and politicians feeling pressure to do something to ameliorate the burden Yet raising the gasoline tax to internalize externalities is widely considered by economists to be among the most economic efficiency improving policies we could implement in the transportation sector This dissertation brings new evidence to bear on quantifying the responsiveness to changing gasoline prices both on the intensive margin i e how much to drive and the extensive margin i e what vehicles to buy I assemble a unique and extremely rich vehicle level dataset that includes all new vehicle registrations in California 2001 to 2009 and all of the mandatory smog check program odometer readings for 2002 to 2009 The full dataset exceeds 49 million observations Using this dataset I quantify the responsiveness to gasoline price changes on both margins as well as the

heterogeneity in the responsiveness I develop a novel structural model of vehicle choice and subsequent utilization where consumer decisions are modeled in a dynamic setting that explicitly accounts for selection on unobserved driving preference at both the time of purchase and the time of driving This utility consistent model allows for the analysis of the welfare implications to consumers and government of a variety of different policies including gasoline taxes and feebates I find that consumers are responsive to changing gasoline prices in both vehicle choice and driving decisions with more responsiveness than in many recent studies in the literature I estimate a medium run i e roughly two year elasticity of fuel economy with respect to the price of gasoline for new vehicles around 0.1 for California a response that varies by whether the vehicle manufacturer faces a tightly binding fuel economy standard I estimate a medium run elasticity of driving with respect to the price of gasoline around 0.15 for new personal vehicles in the first six years Older vehicles are driven much less but tend to be more responsive with an elasticity of roughly 0.3 I find that the vehicle level responsiveness in driving to gasoline price changes varies by vehicle class income geographic and demographic groups I also find that not including controls for economic conditions and not accounting for selection into different types of new vehicles based on unobserved driving preference tend to bias the elasticity of driving away from zero implying a greater responsiveness than the true responsiveness This is an important methodological point for much of the literature estimating similar elasticities ignores these two issues These results have significant policy implications for policies to reduce gasoline consumption and greenhouse gas emissions from transportation The relatively inelastic estimated responsiveness on both margins suggests that a gasoline tax policy may not lead to dramatic reductions in carbon dioxide emissions but is a relatively non distortionary policy instrument to raise revenue When the externalities of driving are considered an increased gasoline tax may not only be relatively non distortionary but even economic efficiency improving However I find that the welfare changes from an increased gasoline tax vary significantly across counties in California an important consideration for the political feasibility of the policy Finally I find suggestive evidence that the rebound effect of a policy that works only on the extensive margin such as a feebate or CAFE standards may be closer to zero than the elasticity of driving with respect to the price of gasoline This suggestive finding is particularly important for the analysis of the welfare effects of any policy that focuses entirely on the extensive margin

Living on the Edge Paul Starling, 2004-09 Operation Retrieve should have been a simple assignment for Shaun Dalton gather a ransom demand from the kidnappers of the Head of M I 6 Sir Miles Booth Royde But of course the deadly international organisation responsible for this devious diabolical scheme the curiously monikered Araignee Royaume pour Sang Egalite Societe led by the Dutch master criminal and former one hit wonder movie star Closter vanDoorz have other plans for Dalton the banks of London s Thames river with the British Prime Minister Dalton is thrust into the dangerous world of scheming madmen fiery femme fatale grotesque henchfolk and quaking fools which sees him traveling across the southern costs of France from magnificent Nice via sabotage a chance encounter with an old friend and an explosive car

chase to the picturesque harbour town of Cap d'Agde where he dodges death by fist bullet and boat in an adventure full of intrigue and humour which cracks along at a whiplash pace rampant chaos the join Shaun Dalton for the rollercoaster ride of his life
