Body An Amazing Tour Of Human Anatomy:

Body An Amazing Tour of Human Anatomy Robert Winston, 2006-09 **The Human Body** Anna Claybourne, 2006

This is a new broad based science series that gives a clear introduction to curriculum topics and is an easy reference tool for research. The clear well written text is generously illustrated with large colour photographs and diagrams. Fact and history boxes extend the information and evidence boxes suggest practical investigations.

Top Body Questions Louise Spilsbury, 2009-07-01 Part of the White Wolves non fiction titles which provide a range of engaging subjects that children will encounter in the real world. This book is the Science series title for above average readers aged 8 to 9.

Choosing and Using Fiction and Non-Fiction 3-11 Margaret Mallett, 2010-07-02 Winner of the United Kingdom Literacy Association's Author Award 2011 for its contribution to extending children's literacy. Praise for the book: This book is about making readers. A compact summary of its contents would not do it justice. It is the account of a life's work and it deserves thanks and readers. Margaret Meek Books for Keeps on line Number 185 November 2010. This book is a cornucopia of varied pleasures offering something for all tastes presented with an awareness of the complexities of the field and communicated with commitment, enthusiasm and deep knowledge.

Eve Bearne English 4 11 the primary school journal of The English Association Number 42 Summer 2011. *Choosing and Using Fiction and Non Fiction 3 11* is a guide to the many kinds of text we want children to encounter, use and enjoy during their nursery and primary school years. So children's non fiction literature including autobiography, biography, information and reference texts is given equal status with fiction, nursery rhymes, picturebooks, novels, traditional tales, playscripts and poetry. The author addresses important issues and allows the voices of teachers, reviewers and children to be heard. The book supports teachers as they help children on their journey to becoming insightful and critical readers of non fiction and sensitive and reflective readers of fiction. It also contains suggestions for practice which are in the spirit of the more flexible and creative approach to learning towards which primary schools are moving. It includes help on using criteria to select quality texts of all kinds, annotated booklists for each kind of text for different age groups, suggestions for keeping a balance between print and screen based texts, case studies showing teachers and children using texts in interesting and imaginative ways to support learning in English lessons and across the curriculum, advice on developing children's visual and multimodal literacy, guidance on using the school library and embedding study skills in children's wider purposes and learning, critiques of key theoretical perspectives and research projects. Although the main readership will be primary and student teachers, it is hoped that the book will be of interest and use to anyone concerned with the role of texts in children's learning.

Practical Ideas for Teaching Primary Science Vivian Cooke, Colin Howard, 2025-02-28 This up to date text addresses primary science teaching in light of the new primary National Curriculum and the latest Teachers Standards. Aimed at primary trainees and teachers, it provides creative, inspiring and practical ideas and approaches for teaching the full range of science topics. Each chapter is aligned to an area of the new National

Curriculum and provides key vocabulary details of common misconceptions and how to address them teaching strategies and activities cross curricular links and health and safety points Throughout there is a strong focus on science subject knowledge development and how to translate this into practice in the primary classroom The book also encourages readers to reflect on their own subject knowledge of science and challenges them to critically evaluate their teaching in order to become more effective

Medicine's 10 Greatest Discoveries Meyer Friedman, Gerald W. Friedland, 1998-01-01 In 1675 Antony van Leeuwenhoek an unlearned haberdasher from Delft placed a drop of rainwater under his microscope and detected thousands of tiny animals in it Leeuwenhoek proceeded to examine the microscopic activity of his spittle teeth plaque and feces and as the result of his findings the field of bacteriology was born Some two hundred years later Wilhelm Conrad Roentgen a professor of theoretical physics at the University of Wurzburg invited his wife to his laboratory asked her to place her hand on an unexposed photographic plate turned on an electric current and showed this terrified woman a picture of the bones of her hand And so came the discovery of the X ray This absorbing book is the first to describe these and eight other monumental medical discoveries throughout history bringing to life the scientific pioneers responsible for them and the excitement frustrations and jealousies that surrounded the final achievements Two distinguished physicians Meyer Friedman and Gerald W Friedland have drawn on their many years of experience as well as on that of world renowned antiquarian book dealers physician collectors of old and new medical publications and medical school professors to single out these medical breakthroughs from thousands of candidates and in several cases to provide information never before available Their engrossing stories of the ten most significant discoveries will be read with enjoyment by anyone fascinated by the mysteries of medicine
