Pre-legislative scrutiny of the draft Gambling (Licensing and Advertising) Bill Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2013-05-01 Around 80% of online gambling in the UK is conducted with operators which are not licensed here In December 2012 the Government published a very short draft Gambling Licensing and Advertising Bill to require overseas gambling operators to obtain a Gambling Commission licence The overseas based remote gambling operators generally opposed the Bill on the grounds it was unnecessary for consumer protection might drive consumers to cheaper unlicensed operators and was principally intended to bring overseas operators within the UK's tax regime Much of the UK based gambling industry sports bodies and organisations working to combat problem gambling supported the principle of the Bill Almost all those who gave oral or written evidence to the Committee raised the issue that the enforcement regime would have to be rigorous in order to provide any of the benefits to consumers The Committee supports the principle that gambling should be regulated on a point of consumption basis The Committee also notes the concerns raised about taxation of the online industry The Government stated that the ability to bring all operators serving UK consumers within the tax net is a consequence but not the prime motivation of the draft legislation The Committee notes in this regard that in setting a tax rate for remote gambling the Treasury should bear in mind that too high a rate would be liable to drive customers and companies into the unregulated black market

Digital switchover of television and radio in the United Kingdom Great Britain: Parliament: House of Lords: Select Committee on Communications, 2010-03-29 The Committee warns of a major public reaction against radio digital switchover scheduled for 2015 unless the Government make the case for switchover and keep the public informed about its impact There is public confusion and industry uncertainty over radio switchover and concern that due to the lack of public information people are still buying analogue radios which will be out of date in a few years time Retailers gave evidence stating that they are not getting adequate information on switchover plans so are unable to offer consumers accurate

guidance when making purchases The report also points out that car manufacturers are still fitting analogue radios in new cars and digital radios will not be fitted as standard in all cars until 2013 The radio switchover is contrasted with the television switchover programme finding that the benefits of TV switchover were well understood in contrast surveys show that the public are generally happy with the present FM radio system and with the range of programmes that are provided The Committee recommends urgent steps on a range of actions including providing a detailed plan for universal digital radio coverage including how it is to be funded developing a policy for the long term use of FM devising a help scheme for radio switchover financed by general taxation rather than the BBC licence fee ensuring new digital car radios are fitted with a multi standard chip to enable their use overseas encouraging radio manufacturers and retailers to devise a sensible scrappage scheme for redundant analogue radios It is also noted that the BBC and Government disagree over whether the cost of universal digital coverage of their national stations can be met under the current licence fee The report says that it is essential that a firm and unambiguous plan for funding the completion of build out of the digital radio service is put in place as soon as possible The report concludes reversing current policy would be unproductive given the amount of investment in digital radio already and while the switchover in 2015 is ambitious a change of target date is not favoured at this stage

Dog Control and Welfare Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee,2013-02-15 DEFRA s belated proposals to tackle irresponsible dog ownership are too limited Since 2007 dogs have killed seven people including five children in private homes The NHS also spends over 3 million annually treating dog attack injuries Some eight assistance dogs a month and thousands of livestock annually are attacked by dogs The Home Office approach to tackling antisocial behaviour is too simplistic and fails to reflect the impact that poor breeding and training by irresponsible owners can have on a dog s behaviour New rules should give enforcement officers more effective powers including Dog Control Notices to prevent dog related antisocial behaviour Local authorities need to devote more resources to the effective management of stray dogs MPs call for changes in the legislation to give powers to extend the banned list to include other dogs with particularly aggressive characteristics At the same time those tasked to enforce legislation should have the discretion to neuter rather than destroy a banned animal where a particular dog poses no threat The Advisory Council on Welfare Issues of Dog Breeding should be given a formal regulatory role to enforce standards Any breeder producing more than two litters per year should be licensed and subject to welfare checks The Kennel Club should stop registering puppies from breeders not compliant with its own Assured Breeder Scheme It should also commission an independent annual review of Breed Standards led by vets to eliminate health problems linked to breeding for exaggerated characteristics Lastly MPs call on websites advertising pets to develop a voluntary Code of Practice
