Africa Dilemmas Of Development And Change:

Africa Peter Lewis,1998 *Africa* Peter Lewis,1998 Written by today s most influential African scholars this collection of pathbreaking articles covers a variety of topics including political leadership forms of state power the role of civil society the importance of class ethnicity and gender and the prospects for democratic change in the region The book provides a broad historical perspective on Africa s political economic development and an overview of current problems and prospects

Kwame Nkrumah's Liberation Thought Robert Yaw Owusu,2006 An attempt to recapture the liberation philosophy of Kwame Nkrumah first prime minister of Ghana Owusu seeks to define a theoretical basis on which a modern socio political and ethical structure for Ghana can be built and offers a paradigm for developing a role of advocacy to the Ghanaian religious edifice He also strives to recapitulate Ghana s self dignity self realisation and self subsistence by highlighting the essential assumptions dimensions and specificities of African personhood *Reforming the African Public Sector.*

Retrospect and Prospects Joseph R. A. Ayee,2008 *Reforming the African Public Sector Retrospect and Prospects* is an in depth and wide ranging review of the available literature on African public sector reforms It illustrates several differing country experiences to buttress the main observations and conclusions It adopts a structural institutional approach which underpins most of the reform efforts on the continent To contextualize reform of the public sector and understand its processes dynamics and intricacies the book examines the state and state capacity building in Africa especially when there can be no state without an efficient public sector In addition the book addresses a number of theories such as the new institutional economics public choice and new public management which have in one way or another influenced most of the initiatives implemented under public sector reform in Africa There is also a survey of the three phases of public sector reform which have emerged and the balance sheet of reform strategies namely decentralization privatization deregulation agencification co production and public private partnerships It concludes by identifying possible alternative approaches such as developing a vigorous public sector ethos and sustained capacity building to promote and enhance the renewal and reconstruction of the African public sector within the context of the New Partnerships for Africa s Development NEPAD good governance and the Millennium Development Goals MDGs **Polarization and Transformation in Zimbabwe** Erin McCandless,2011-08-16

Social movements and civic organizations often face profound strategy dilemmas that can hamper their effectiveness and prevent them from contributing to transformative change and peace In Zimbabwe two particular dilemmas have fed into and fueled destructive processes of political polarization dividing society leadership and decision makers well beyond its borders As conceptualized in this study the first is whether to prioritize political or economic rights in efforts to bring about nationwide transformative change rights or redistribution The second is whether and how to work with government and or donors given their political economic and social agendas participation or resistance This book investigates these issues through two social movement organizations the National Constitutional Assembly and the Zimbabwe National War Veterans Association

and the movements they led to achieve constitutional change and radical land redistribution Through in depth case study analysis and peace and conflict impact assessment spanning the years 1997 2010 lessons are drawn for activists practitioners policy makers and scholars interested in depolarizing concepts underpinning polarizing discourses transcending strategy dilemmas and understanding how social action can better contribute to transformative change and peace Coloniality of Power in Postcolonial Africa Sabelo J. Ndlovu-Gatsheni, 2013 In this book the author examines the current state of postcolonial Africa with a focus on the liberation predicament and the crisis of epistemological cultural economic and political dependence created by colonialism and coloniality **Transforming Mozambique** M. Anne Pitcher, 2002-11-14 Many of the economic transformations in Africa have been as dramatic as those in Eastern Europe Yet much of the comparative literature on transitions has overlooked African countries This 2002 study of Mozambique's shift from a command to a market economy draws on a wealth of empirical material including archival sources interviews political posters and corporate advertisements to reveal that the state is a central actor in the reform process despite the claims of neo liberals and their critics Alongside the state social forces from World Bank officials to rural smallholders have also accelerated thwarted or shaped change in Mozambique M Anne Pitcher offers an intriguing analysis of the dynamic interaction between previous and emerging agents ideas and institutions to explain the erosion of socialism and the politics of privatization in a developing country She demonstrates that Mozambique's political economy is a heterogeneous blend of ideological and institutional continuities and ruptures **Studies in World Affairs** Ed. Agency in Africa Ebenezer Obadare, Wendy Willems, 2014 Examines the variety of mostly unorganized and informal ways in which Africans exercise agency and resist state power in the 21st century through citizen action and popular culture and how the relationship between ruler and ruled is being reframed The recent eruption of popular protests across North Africa and the Middle East has reopened academic debate on the meaning and strategies of resistance in the 21st century This book argues that Western notions of state and civil society provide only a limited understanding of how power and resistance operate in the African context where informality is central to the way both state officials and citizens exercise agency With the principle of informality as a template the chapters in this volume collectively examine the various modes organised and unorganised formal and informal urban and rural embodied and discursive serious and ludic online and offline successful and failing through which Africans contend with power Resistance takes place against the backdrop of deep fractures in state sovereignty the remnants of colonial rule and the constraints of a global neoliberal economic system Ebenezer Obadare is Associate Professor Department of Sociology University of Kansas Wendy Willems is Assistant Professor Department of Media and Communications London School of Economics and Political Science LSE and Honorary Research Fellow Department of Media Studies University of the Witwatersrand Johannesburg South Africa

Civil Society & Development

Jude Howell, Jenny Pearce, 2001 Setting out to explore critically the way civil society has entered development thinking policy and practice as a paradigmatic concept of the 21st century Howell development studies U of Sussex and Pearce Latin American politics U of Bradford trace the historical path leading to the encounter between the ideas of development and civil society in the late 1980s and how donors have translated these into development policy and programs They find that there are competing normative visions which have deep roots in Western European political thought about the role of civil society in relation to the state and market both among donors and within the societies where donors are operating This leads to donors playing a major role in shaping the character of service provision They also argue that their study exposes the hitherto unexplored power of the market as opposed to solely the state to distort donor programs c Book News Inc

Enclaves of Exception Omolade Adunbi, 2022-05-10 How do we measure and truly grasp the sweeping social and environmental effects of an oil based economy Focusing on the special economic zones resulting from China's trading partnership with Nigeria Enclaves of Exception offers a new approach to exploring the relationship between oil and technologies of extraction and their interrelatedness to local livelihoods and environmental practices In this groundbreaking work Omolade Adunbi argues that even though the exploitation of oil resources is dominated by big corporations it establishes opportunities for many former Nigerian insurgents and their local communities to contest the ownership of such resources in the oil rich Niger Delta and to extract oil themselves and sell it Based on extensive ethnographic fieldwork Enclaves of Exception makes clear that although both the free trade zones and the now booming local artisanal refineries share the goals of profit making and are enthusiastically supported by those benefiting from them economically they have yielded dramatically the same environmental outcome for communities around them that included pollution with precarious effects on the health of the populations in the regions and displacement of population from their livelihood practices Guarding the Guardians

Mathurin C. Hounnikpo, 2016-04-22 The relationship between civil society and the armed forces is an essential part of any polity democratic or otherwise because a military force is after all a universal feature of social systems Despite significant progress moving towards democracy among some African countries in the past decade all too many African militaries have yet to accept core democratic principles regulating civilian authority over the military This book explores the theory of civil military relations and moves on to review the intrusion of the armed forces in African politics by looking first into the organization and role of the army in pre colonial and colonial eras before examining contemporary armies and their impact on society Furthermore it revisits the various explanations of military takeovers in Africa and disentangles the notion of the military as the modernizing force Whether as a revolutionary force as a stabilizing force or as a modernizing force the military has often been perceived as the only organized and disciplined group with the necessary skills to uplift newly independent nations The performance of Africa's military governments since independence however has soundly disproven this thesis As such this study conveys the necessity of new civil military relations in Africa and calls not just for civilian

control of the military but rather a democratic oversight of the security forces in Africa *Millennial Africa* John S. Saul, 2001 Following his two widely read volumes of essays Saul projects his analysis of the economic and social structure of southern Africa in relation to the rest of the world forward into the new millennium Painstakingly confronting central questions related to the practice of war and peace and to the prospects for democracy and development throughout the continent Saul emphasises that the problems of Africa are continually shaped by its insertion in the global capitalist system and suggests that the struggle for socialism must be a part of the solution for contemporary Africa **Key Issues in African Diplomacy** Sven Botha, Jo-Ansie van Wyk, 2024-06-28 Africa's unique position as an international diplomatic actor has not always been given the attention it deserves This volume bridges this gap by offering a fresh comprehensive and realistic overview of African diplomacy The book examines African diplomatic practice Chapters explore how different types of diplomacy have developed over time including energy diplomacy economic diplomacy and quiet diplomacy Crucially the book assesses how certain events have allowed Africa to use certain types of diplomacy to yield better outcomes for itself Including contributions from an international team of scholars policy makers and experts from the diplomatic world the book provides a comprehensive guide to African diplomacy and challenges the current dominant usage of Northern perspectives on diplomacy studies *Debating African Issues* William G. Moseley, Kefa M. Otiso, 2022-09-14 This debate style textbook allows students to explore diverse well founded views on controversial African issues pushing them to go beyond superficial interpretations and complicate and ground their understanding of the continent From the positive images in the film Black Panther to the derogatory remarks of former American President Donald Trump the African continent often figures prominently in the collective global imagination This interdisciplinary collection covers 20 enduring and contemporary debates across a broad range of subjects affecting Africa from development and health to agriculture climate change and urbanization Each chapter has a pro and con view penned by a leading expert on the topic in an accessible and engaging style These contrasting views on each issue are framed by an introduction that helps the student contextualize the debate and draw on further resources Moreover they enable readers to deepen their understanding of the topic develop a more nuanced perspective and foster classroom debates This book is an excellent resource for Africa related courses across a range of disciplinary and interdisciplinary fields including African studies anthropology development studies economics environmental studies geography history international studies political science and public health **Continuity and Change in Sub-Saharan African Demography** Clifford O. Odimegwu, John Kekovole, 2014-07-11 This book offers an in depth African perspective to the major issues in demographic discourse in sub Saharan Africa It provides comprehensive analysis of sub Saharan African censuses profiling demographic changes trends patterns and consequences in the region Interdisciplinary comprehensive accessible simple and topical this volume is perfectly suited to researchers students and lecturers who are interested in understanding sub Saharan African population dynamics and issues **The Palgrave**

Handbook of Africa and the Changing Global Order Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order By connecting the past present and future in a continuum that shows the paradox of existence for over one billion people the book underlines the centrality of the African continent to global knowledge production the global economy global security and global creativity Bringing together perspectives from top Africa scholars it actively dispels myths of the continent as just a passive recipient of external influences presenting instead an image of an active global agent that astutely projects soft power Unlike previous handbooks this book offers an eclectic mix of historical contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa s relations with the world
