A Companion To Cognitive Anthropology A Companion To Cognitive Anthropology:

A Companion to Cognitive Anthropology David B. Kronenfeld, Giovanni Bennardo, Victor C. de Munck, Michael D. Fischer, 2011-04-25 A Companion to Cognitive Anthropology offers a comprehensive overview of the development of cognitive anthropology from its inception to the present day and presents recent findings in the areas of theory methodology and field research in twenty nine key essays by leading scholars Demonstrates the importance of cognitive anthropology as an early constituent of the cognitive sciences Examines how culturally shared and complex cognitive systems work how they are structured how they differ from one culture to another how they are learned and passed on Explains how cultural or collective vs individual knowledge distinguishes cognitive anthropology from cognitive psychology Examines recent theories and methods for studying cognition in real world scenarios Contains twenty nine key essays by leading names in the field

A Companion to Cognitive Anthropology, 2011 A companion to Cognitive Anthropology offers a comprehensive overview of the development of cognitive anthropology from its inception to the present day and presents recent findings in the areas of theory methodology and field research in twenty nine key essays by leading scholars Demonstrates the importance of cognitive anthropology as an early constituent of the cognitive sciences Examines how culturally shared and complex cognitive systems work how they are structured how they differ from one culture to another how they are learned and passed on Explains how cultural or collective vs individual knowledge distinguishes cognitive anthropology from cognitive psychology Examines recent theories and methods for studying cognition in real world scenarios A Companion to Cognitive Anthropology David B. Kronenfeld, Giovanni Bennardo, Victor C. de Munck, Michael D. Fischer, 2015-12-14 This new Companion traces the development of cognitive anthropology from its beginnings in the late 1950s to the present and evaluates future directions of research in the field In 29 contributions from leading anthropologists there is an overview of cognitive and cultural structures insights into how cognition works in everyday life and interacts with culture and examples of contemporary research A Companion to Cognitive Anthropology is essential for anyone interested in the questions of how culture shapes cognitive processes **Constructing Objectivity: Emotions in Legal Decision-making** Stina Bergman Blix, Sharyn Lee-Anne Roach Anleu, Mojca M. Plesnicar, Louise Victoria Johansen, 2025-08-28 The field of Law and Emotion originated in discussions that disputed the bifurcation of emotion and law In the past decade these discussions have inspired socio legal research on the dynamic and social dimensions of court work The field has grown exponentially in diverse disciplines such as sociology law philosophy anthropology and criminology At the core of legal decision making lies the fundamental principles of objectivity impartiality and independence The Research Topic Constructing Objectivity Emotions in Legal Decision making addresses the dialectical processes of translating these principles into everyday judicial practice across a wide range of legal systems Building on empirical research including observations interviews shadowing vignettes and workshops with legal professionals this collection engages with objectivity in the making It addresses such questions as

What role does court architecture and material objects play in the emotional dynamic of the legal procedure How do judges manage victims emotional statements or evaluate their credibility How do judges make independent decisions in a collective setting What role does extra legal lay specialist expertise play in co constructing legal knowledge of relevance to decision making How do judges embrace the idea of objectivity How is all this influenced by the growing digitalization of courts and hearings In so doing it investigates the complexity of objectivity as an ideal a judicial value requiring performance promoting courtroom atmosphere and as sometimes feigned

Cognition In and Out of the Mind Giovanni Bennardo, Victor C. de Munck, Stephen Chrisomalis, 2024-06-30 This edited collection presents an agenda for the interdisciplinary study of anthropology and cognitive science It consists of fifteen chapters written by international experts on the relationship between culture and cognition This volume is unique in that it includes both inside i e shared mental templates and outside i e extended embedded enactive and ecological theories of cognition The contributors come from the diverse disciplinary fields of anthropology linguistics archaeology and cognitive science The aim is to investigate the mental production of shared knowledge goals and desires around which human social life revolves The coverage spans cultural and linguistic evolution the importance of local histories and the role of cultural models to understand and interact with the world Drawing on cultural model theory this volume is an invaluable resource for linguists cognitive scientists anthropologists and other social scientists willing to explore and understand how the sharedness of culture can bond us all together across relative cultural differences and mis perceived divisions

The Routledge Handbook of Language and Culture Farzad Sharifian, 2014-12-17 The Routledge Handbook of Language and Culture presents the first comprehensive survey of research on the relationship between language and culture It provides readers with a clear and accessible introduction to both interdisciplinary and multidisciplinary studies of language and culture and addresses key issues of language and culturally based linguistic research from a variety of perspectives and theoretical frameworks This Handbook features thirty three newly commissioned chapters which cover key areas such as cognitive psychology cognitive linguistics cognitive anthropology linguistic anthropology cultural anthropology and sociolinguistics offer insights into the historical development contemporary theory research and practice of each topic and explore the potential future directions of the field show readers how language and culture research can be of practical benefit to applied areas of research and practice such as intercultural communication and second language teaching and learning Written by a group of prominent scholars from around the globe The Routledge Handbook of Language and Culture provides a vital resource for scholars and students working in this area

Culture and Psyche Simon Dein, 2019-11-21 This book originates from a lecture series given on Psychology and Anthropology at Goldsmiths College London in 2018 It offers an introduction to psychological anthropology and will be useful both for undergraduates and postgraduates While providing a critical overview of topics commonly included in psychological anthropological texts such as psychoanalysis culture and personality child development personality emotion the self memory

and cognition this book also offers a chapter on Darwin sociobiology and evolutionary psychology to emphasise that behaviour is not infinitely malleable but rather culture impacts existent biological and psychological structures As shown here while culture impacts psychological processes these processes are constrained by genetic biological and evolutionary factors

A Cognitive Ethnography of Knowledge and Material Culture Mads Solberg, 2021-06-15 This cognitive ethnography examines how scientists create meaning about biological phenomena through experimental practices in the laboratory offering a frontline perspective on how new insights come to life An exercise in the anthropology of knowledge this story follows a community of biologists in Western Norway in their quest to build a novel experimental system for research on *Lepeoptheirus salmonis* a parasite that has become a major pest in salmon aquaculture The book offers a window on the making of this material culture of science and how biological phenomena and their representations are skillfully transformed and made meaningful within a rich cognitive ecology Conventional accounts of experiments see their purpose as mainly auxiliary as handmaidens to theory By looking closely at experimental activities and their materiality this book shows how experimentation contributes to knowledge production through a broader set of epistemic actions In drawing on a combination of approaches from anthropology and cognitive science it offers a unique contribution to the fields of cultural psychology psychological anthropology science and technology studies and the philosophy of science

Cultural Models Giovanni Bennardo, Victor C. De Munck, 2014 This book is about cultural models that are considered units of analysis for an approach to culture overcoming the dichotomy between the individual and the collective The genesis of the concept of cultural model is traced A methodological trajectory that blends qualitative and quantitative techniques is outlined A survey follows of the research about cultural models whose results generate a typology The book closes with suggestions for future research

Social and Cultural Anthropology: The Key Concepts Nigel Rapport, 2014-07-11 Social and Cultural Anthropology the Key Concepts is an easy to use A Z guide to the central concepts that students are likely to encounter in this field Now fully updated this third edition includes entries on Material Culture Environment Human Rights Hybridity Alterity Cosmopolitanism Ethnography Applied Anthropology Gender Cybernetics With full cross referencing and revised further reading to point students towards the latest writings in Social and Cultural Anthropology this is a superb reference resource for anyone studying or teaching in this area

Iranian Motherhood Mohaddeseh Ziyachi, 2023-09-29 This book characterises the problematic status of motherhood in present day Iranian society that is problem in the Foucauldian sense of an object of thought and a source of tension not as a pathological issue and explains the historical processes contributing to this problematisation Taking an interdisciplinary approach the author draws on a cognitive anthropological perspective whilst incorporating ethnographic historical and evolutionary viewpoints By applying this perspective to the current cultural model of motherhood and considering specific social political and economic factors in Iran the author provides an exhaustive contextualised understanding of the motherhood problem and its multidirectional changes throughout time The book follows

a multi method framework and combines qualitative ethnographic and auto ethnographic data with historical evidence and comparative data As such it also contributes to the women s movement in Iran by fostering discussion on women s issues and demystifying women s understandings and experiences The book will appeal to those working in a range of disciplines including gender studies cognitive anthropology and Iranian history Written in non technical language and providing insights into the problem of motherhood in comparable contexts the book will also be of interest to general readers

Integrating Qualitative and Social Science Factors in Archaeological Modelling Mehdi Saqalli,Marc Vander Linden,2019-07-04

This book covers the methodological epistemological and practical issues of integrating qualitative and socio anthropological factors into archaeological modeling This text fills the gap between conceptual modeling which usually relies on narratives describing the life of a past community and formalized computer based modeling which are usually environmentally determined Methods combining both environmental and social issues through niche and agent based modeling are presented These methods help to translate data from paleo environmental and archaeological society life cycles such as climate and landscape changes into the local spatial scale The epistemological discussions will appeal to readers as well as the resilience socio anthropological factors provide facing climatic fluctuations Integrating Qualitative and Social Science Factors in Archaeological Modelling will appeal to students and researchers in the field

Rethinking Culture David White,2017-03-31
Organizational or corporate culture is the most overused and least understood word in business if not society While the topic has been an object of keen academic interest for nearly half a century theorists and practitioners still struggle with the most basic questions What is organizational culture Can it be measured Is it a dependent or independent variable Is it causal in organizational performance and if so how Paradoxically managers and practitioners ascribe cultural explanations for much of what constitutes organizational behavior in organizations and moreover believe culture can be engineered to their own designs for positive business outcomes What explains this divide between research and practice While much academic research on culture is challenged by ontological epistemic and ethical difficulties there is little empirical evidence to show culture can be deliberately shaped beyond espoused values The gap between research and practice can be explained by one simple reason the science and practice of culture has yet to catch up to managerial intuition Managers are correct in suspecting culture is a powerful normative force but until now current theory and research is not able to adequately account for cultural behavior in organizations *Rethinking Culture* describes and presents evidence for a new framework of organizational culture based on the cognitive science of the so called cultural mind It will be of relevance to academics and researchers with an interest in business and management organizational culture and organizational change as well as cognitive and cultural anthropologists and sociologists interested in applications of theory in organizational and institutional settings

Analogy and Contrast in Language Karolina Krawczak,Barbara Lewandowska-Tomaszczyk,Marcin Grygiel,2022-10-15 Within cognitive and functional approaches to language structure and grammaticality analogy and

contrast represent two fundamental human cognitive capacities which up to now have mostly been examined separately This volume seeks to bridge that gap and in doing so it brings together cutting edge theoretical and empirical research in the field The chapters in this book examine analogy and contrast across a variety of languages English Finnish Hungarian Polish Russian for different language phenomena constructions lexical semantics morphology sentence structure text organization and with the use of various methods corpus linguistics discourse analysis experimental methods qualitative analysis quantitative analysis This state of the art research presented in the book should be of interest to specialists within Cognitive Linguistics corpus linguistics construction grammar discourse analysis translation studies metaphor research and cross cultural research

Resilience of Multicultural and Multigenerational Leadership and Workplace Experience

Vázquez de Príncipe, Joanne,2024-05-07 In today s volatile uncertain complex and ambiguous VUCA world the challenges faced by individuals teams and organizations are more pressing than ever The persistent global tragedies and instabilities demand a new approach to leadership one that goes beyond traditional models to address the complexities of a multicultural and multigenerational workforce The need for resilience has never been more urgent as we grapple with the aftermath of a pandemic and the ever evolving landscape of work The book titled Resilience of Multicultural and Multigenerational Leadership and Workplace Experience dives deep into the heart of the issue highlighting the importance of cultivating resilience as a dynamic ability It serves as a call to action for individuals and leaders to fortify their resilience transforming it from a mere survival mechanism into a strategic advantage that propels individuals and organizations towards success The core objective of Resilience of Multicultural and Multigenerational Leadership and Workplace Experience is to offer various solutions to the challenges posed by the contemporary business environment Grounded in both theoretical and empirical research the book aims to provide a guide for scholars and professionals navigating the complexities of leadership in a multicultural context By delving into the strategic role of resilient leadership across various organizational levels the book equips its readers with the tools and insights needed to not only face these challenges but emerge stronger

Context, Policy, and Practices in Indigenous and Cultural Entrepreneurship April, Wilfred Isak,Adeyanju, Anthony,Tafirenyika, Blessing,2023-05-01 There are ongoing debates on the concepts surrounding the roles of Indigenous people in transforming the entrepreneurial landscape to promote socio economic development Arguably the culture and ways of our lives in the context of entrepreneurship have a role in influencing social economic development The ideals between the entrepreneurial practice of Indigenous people and their culture are somewhat commensal towards sustainable growth and development The practice of Indigenous and cultural entrepreneurship is embedded in historical findings Context Policy and Practices in Indigenous and Cultural Entrepreneurship provides insights into the policy culture and practice that influence the impact of local and Indigenous entrepreneurs within communities which transcends to socio economic development This is critical as the knowledge gained from our entrepreneurial diversity can provide a platform to reduce social ills as a result of

unemployment and give a sense of belonging within the social context Covering key topics such as government policy entrepreneurial education information technology and trade this premier reference source is ideal for policymakers entrepreneurs business owners managers scholars researchers academicians instructors and students

Culture and Cognition Norbert Ross, 2003-10-16 The subject matter is very timely for such a book The field of culture and cognition is in a state of considerable flux and it requires the kind of knowledge that Ross has not only of cognitive anthropology but of cognitive psychology to make a synthesis and to develop guideposts and steer the field towards viable future objectives Ross possesses complete familiarity with the literature This should make for an excellent contribution Douglas White Department of Anthropology University of California Irvine Norbert Ross is a fine scholar and the book does something useful and new an important contribution by a respected researcher who knows what he is talking about and who has done creative basic work in the field Roy D Andrade Department of Anthropology University of California San Diego In view of a current trend to integrate knowledge re culture and cognition in psychology particularly marked and anthropology there is a growing demand for good textbooks in these fields The ideas proposed by Ross are interesting and potentially productive Chizuko Izawa Department of Psychology Tulane University Culture plays an important role in our everyday lives yet the study of cultural processes and their impact on thinking and behavior is still in its infancy Research in anthropology generally lacks the clarity and specificity of cognitive processes and is therefore usually ignored by most psychologists On the other hand most cognitive research in psychology either ignores culture as an important factor to be taken into account or treats culture as yet another independent variable Recent trends indicate an increasing interest in culture as a topic of psychological inquiry Culture and Cognition Implications for Theory and Methods combines the study of culture with an understanding of relevant cognitive processes and the challenge of studying high level cognition as embedded into culture Author Norbert Ross engages both anthropology and psychology with the belief that any successful research in culture and cognition must embrace insights from both fields Culture and Cognition fills a void in the cross disciplinary area of culture and cognition by offering a clear overview of approaches from varying disciplinary perspectives discussing methodological problems as well as theoretical implications of these approaches The author illustrates real research examples and discusses a specific research strategy that details the necessary methods of data gathering and analysis methods for understanding cross cultural differences The book establishes the foundation for sensible cultural and cross cultural research and provides important insights into both cultural processes in cognition and cognitive aspects of culture Recommended for advanced undergraduate and graduate students scholars and researchers in the fields of Psychology and Anthropology

Handy numbers: finger counting and numerical cognition Frank Domahs, Liane Kaufmann, Martin H. Fischer, We are born with a number sense the ability to respond to numerosity which we share with other vertebrates This inherited numerosity representation is approximate and follows the Weber Fechner law that governs sensory perception As educated adults we can also use

culturally developed abstract symbol systems to represent exact numerosities in particular number words and Arabic numbers This developmental stage is preceded by an apparently transient phase of finger counting and finger calculation In fact the use of fingers to represent number is ubiquitous across ages and cultures Children use finger counting even if they are discouraged to do so sometimes even before they are able to utter the number word sequence Furthermore finger counting strategies may also be used by adults diagnosed with dyscalculia to make up for a deficient or absent mental number representation The advantages of finger counting are evident Fingers are readily available and perceptually salient finger numerical representations support short term memory and they provide a transparent one to one relationship between to be counted objects and their representation Obviously however these advantages only hold for small numbers Fully transparent finger counting systems are limited to the number range between zero and ten Larger numbers can only be represented in perceptually less salient or symbolic ways In recent years a growing body of evidence has suggested that finger based representations of number do not form an arbitrary and transient stage of cognitive development Rather they seem to provide a good example of embodied cognition According to this influential viewpoint all of our knowledge is represented together with the sensory and motor activity that was present during its acquisition As a consequence even a supposedly abstract cognitive ability such as numerical cognition reuses the neural substrate and inherits functional properties of more basic perceptual and or motor processes Consistent with this assumption finger counting habits and numerical processing do interact even in educated adults casting doubts on purely abstract accounts of mental number representations The objective of this Research Topic is to document embodiment signatures in number processing and calculation a domain of cognition that was long considered to epitomize the abstract symbol manipulation approach to human cognition To this end we invite empirical contributions using different methodologies including behavioural developmental neuroscientific educational cross cultural and neuropsychological studies Moreover we also seek theoretical contributions review articles or opinion papers Questions to be tackled may include but are not restricted to the following Is finger counting only a useful or even a necessary step towards the acquisition of symbolic number representations What are the neural correlates of the finger number relationship Which features of finger counting influence adult number processing both approximate and exact How can finger counting systems be classified typologically and how do different finger counting systems influence numerical cognition across cultures and populations Should finger counting and finger calculation be promoted or discouraged in maths education How are disturbances of finger gnosis and numerical abilities linked We hope that this Research Topic will bring together researchers from different backgrounds to fruitfully discuss a topic which has both scientific and every day relevance

Grounding Social Sciences in Cognitive Sciences Ron Sun, 2012-07-27

Exploration of a new integrative intellectual enterprise the cognitive social sciences Research in the cognitive sciences has advanced significantly in recent decades Computational cognitive modeling has profoundly changed the ways in which we

understand cognition Empirical research has progressed as well offering new insights into many psychological phenomena This book investigates the possibility of exploiting the successes of the cognitive sciences to establish a better foundation for the social sciences including the disciplines of sociology anthropology economics and political science The result may be a new powerful integrative intellectual enterprise the cognitive social sciences The book treats a range of topics selected to capture issues that arise across the social sciences covering computational empirical and theoretical approaches The chapters by leading scholars in both the cognitive and the social sciences explore the relationship between cognition and society including such issues as methodologies of studying cultural differences the psychological basis of politics for instance the role of emotion and the psychology of moral choices cognitive dimensions of religion cognitive approaches to economics meta theoretical questions on the possibility of the unification of social and cognitive sciences Combining depth and breadth the book encourages fruitful interdisciplinary interaction across many fields

Approaches to Language, Culture, and Cognition M. Yamaguchi, D. Tay, B. Blount, 2014-08-28 Approaches to Language Culture and Cognition aims to bring cognitive linguistics and linguistic anthropology closer together calling for further investigations of language and culture from cognitively informed perspectives against the backdrop of the current trend of linguistic anthropology
