A Companion To The Philosophy Of Action:

A Companion to the Philosophy of Action Timothy O'Connor, Constantine Sandis, 2012-08-02 A Companion to the Philosophy of Action offers a comprehensive overview of the issues and problems central to the philosophy of action The first volume to survey the entire field of philosophy of action the central issues and processes relating to human actions Brings together specially commissioned chapters from international experts Discusses a range of ideas and doctrines including rationality free will and determinism virtuous action criminal responsibility Attribution Theory and rational agency in evolutionary perspective Individual chapters also cover prominent historic figures from Plato to Ricoeur Can be approached as a complete narrative but also serves as a work of reference Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks

Time and the Philosophy of Action Roman Altshuler, Michael J. Sigrist, 2016-06-10 Although scholarship in philosophy of action has grown in recent years there has been little work explicitly dealing with the role of time in agency a role with great significance for the study of action As the articles in this collection demonstrate virtually every fundamental issue in the philosophy of action involves considerations of time The four sections of this volume address the metaphysics of action diachronic practical rationality the relation between deliberation and action and the phenomenology of agency providing an overview of the central developments in each area with an emphasis on the role of temporality Including contributions by established rising and new voices in the field Time and the Philosophy of Action brings analytic work in philosophy of action together with contributions from continental philosophy and cognitive science to elaborate the central thesis that agency not only develops in time but is shaped by it at every level

Philosophy of Action Jonathan Dancy, Constantine Sandis, 2015-02-17 The Philosophy of Action An Anthology is an authoritative collection of key work by top scholars arranged thematically and accompanied by expert introductions written by the editors This unique collection brings together a selection of the most influential essays from the 1960s to the present day An invaluable collection that brings together a selection of the most important classic and contemporary articles in philosophy of action from the 1960 s to the present day No other broad ranging and detailed coverage of this kind currently exists in the field Each themed section opens with a synoptic introduction and includes a comprehensive further reading list to guide students Includes sections on action and agency willing and trying intention and intentional action acting for a reason the explanation of action and free agency and responsibility Written and organised in a style that allows it to be used as a primary teaching resource in its own right

Action in Context Anton Leist, 2012-02-13 The book illustrates the concept of action in three different contexts the justification of actions people s life history and pragmatism The special feature of this book is that a comprehensive view of this kind marks a departure from the atomistic approach of action theory which in itself raises a number of questions If actions are not justified by mental states how can persons then act for reasons How can persons actions over time be described and what is the connection with the question of personal identity If there is

to be a unified understanding of the person does the practical have to take precedence over the theoretical and what does this mean for epistemology for example The ten contributors to this volume engage in an instructive manner with these and similar questions in the three sections of the book

The Metaphysics of Action David-Hillel Ruben,2018-06-25 In this book the author provides an account of three central ideas in the philosophy of action trying to act acting or doing and one s action causing further consequences In all three cases novel theories of these phenomena are offered trying to act is not a particular mental or physical act but can be explained using conditionals that action is not the same as causing something to happen and in the case of a special but important subset of actions for example the opening of a window the action is identical to the event of the window s opening A result of this last account is that it places actions out in the world sometimes far removed in time and space from the actor s body The world is full of action actions do not just exist in the many little islands of space and time that all of our bodies inhabit In the final chapter Ruben describes and discusses a skeptical challenge to the idea that we can ever know whether or not someone else has acted rather than just passive events having happened to that person

Intentionality and Action Jesús Padilla Gálvez,Margit Gaffal,2017-08-07 The book links the concept of intention to human action It provides answers to questions like Why do we act intentionally Which impact do reasons and motives have on our decisions Certain events are identified as intentional actions when they are considered as being rationalized by reasons The linguistic description of such events enables us to reveal the structure of intention The mental and the linguistic constitute irreducible ways of understanding events Among the topics discussed are intentionality actions the linguistic form to talk about intentionality and actions Brentano s view of intentionality the phenomenological approach to intention and Wittgenstein s proposals The contributions by Wolfgang K nne Peter Simons Christian Bermes Kevin Mulligan Severin Schroeder Ant nio Marques Margit Gaffal Michel Le Du Jes s Padilla G lvez Bernhard Obsieger and Amir Horowitz show that actions and decisions are guided by intentional considerations

Thomas Aquinas on the Metaphysics of the Human Act Can Laurens Lwe,2021-07-08 This book argues that for Aquinas a human act exhibits a structure analogous to that of a material object

Action and Interaction Shaun Gallagher,2020 Shaun Gallagher presents a ground breaking interdisciplinary account of action He shows that in order to understand human agency and the aspects of mind that are associated with it we need to grasp the crucial role of context or circumstance in action and the normative constraints of social and cultural practices

Philosophy of Action Lilian O'Brien,2016-04-30 Accessible and wide ranging this introduction to contemporary Philosophy of Action guides the reader through the major views and arguments The topics addressed include the nature of intentional action and its explanation the nature of reasons the role of desire and intention in action the nature of autonomy and the possibility of group agents

Content and Competence Jakob Weissinger,2019-10-07 Jakob Weissinger unpacks a central problem in jurisprudence the concept of rights by examining other core concepts of normative practice and how they are interwoven The result is a stand alone theory which

fundamentally questions established approaches

Freedom and Enforcement in Action Janusz Czelakowski, 2015-06-10
 Action theory is the object of growing attention in a variety of scientific disciplines and this is the first volume to offer a synthetic view of the range of approaches possible in the topic The volume focuses on the nexus of formal action theory with a startlingly diverse set of subjects which range from logic linguistics artificial intelligence and automata theory to jurisprudence deontology and economics It covers semantic mathematical and logical aspects of action showing how the problem of action breaks the boundaries of traditional branches of logic located in syntactics and semantics and now lies on the borderline between logical pragmatics and praxeology The chapters here focus on specialized tasks in formal action theory beginning with a thorough description and formalization of the language of action and moving through material on the differing models of action theory to focus on probabilistic models the relations of formal action theory to deontic logic and its key applications in algorithmic and programming theory The coverage thus fills a notable lacuna in the literary corpus and offers solid formal underpinning in cognitive science by approaching the problem of cognition as a composite action of mind

Mental Action and the Conscious Mind Michael Brent, Lisa Miracchi Titus, 2022-07-15
 Mental action deserves a place among foundational topics in action theory and philosophy of mind Recent accounts of human agency tend to overlook the role of conscious mental action in our daily lives while contemporary accounts of the conscious mind often ignore the role of mental action and agency in shaping consciousness This collection aims to establish the centrality of mental action for discussions of agency and mind The thirteen original essays provide a wide ranging vision of the various and nuanced philosophical issues at stake Among the questions explored by the contributors are Which aspects of our conscious mental lives are agential Can mental action be reduced to and explained in terms of non agential mental states processes or events Must mental action be included among the ontological categories required for understanding and explaining the conscious mind more generally Does mental action have implications for related topics such as attention self knowledge self control or the mind body problem By investigating the nature scope and explanation of mental action the essays presented here aim to demonstrate the significance of conscious mental action for discussions of agency and mind Mental Action and the Conscious Mind will be of interest to scholars and graduate students working in philosophy of mind philosophy of action and philosophy of agency as well as to philosophically inclined cognitive scientists

The Oxford Handbook of Elizabeth Anscombe Roger Teichmann, 2022
 Elizabeth Anscombe was one of the most important philosophers of the twentieth century as well as a friend pupil and the main translator of Ludwig Wittgenstein She wrote on a wide range of philosophical topics publishing a handful of books and a large corpus of articles in her lifetime This collection of twenty two essays on the philosophy of Elizabeth Anscombe by an international array of experts in the field covers intention ethical theory human life the first person and Anscombe on other philosophers

Negative Actions Jonathan D. Payton, 2021-02-25
 Negative actions intentional omissions refrainments etc seem to be genuine actions The standard metaphysical theories of action are event based they treat actions

as events of a special kind But it seems that many and perhaps all negative actions are not events but absences thereof In this book I provide a comprehensive treatment of this problem and its solution I trace the appearance that negative actions are mere absences to the widely assumed view that negative action sentences sentences which describe an agent as omitting refraining etc are negative existentials reporting the non occurrence of an event of a certain kind I argue on the contrary that such sentences report the occurrence of an event not the absence of one Moreover I show how these events can be identified with ordinary positive events of the sort we should already have in our ontology In developing these views I provide a comprehensive picture of the metaphysics of negative actions the nature of our thought and talk about them and their place in a theory of action and agency

Divine Agency and Divine Action William James Abraham, 2017 Divine Agency and Divine Action Volume I lays the groundwork for a constructive contribution to the contemporary debate regarding divine action Noted scholar William J Abraham argues that the concept of divine action is not a closed concept like knowledge but an open concept with a variety of context dependent meanings This volume charts the history of debate about divine action among key Anglophone philosophers of religion and observes that they were largely committed to this erroneous understanding of divine action as a closed concept After developing an argument that divine action should be understood as an open fluid concept Abraham engages the work of William Alston Process metaphysics quantum physics analytic Thomist philosophy of religion and the theology of Kathryn Tanner Abraham argues that divine action as an open concept must be shaped by distinctly theological considerations and thus all future work on divine action among philosophers of religion must change to accord with this vision Only deep engagement with the Christian theological tradition will remedy the problems ailing contemporary discourse on divine action

The Oxford Handbook of Reasons and Normativity Daniel Star, 2018 The Oxford Handbook of Reasons and Normativity maps a central terrain of philosophy and provides an authoritative guide to it Few concepts have received as much attention in recent philosophy as the concept of a reason to do or believe something And one of the most contested ideas in philosophy is normativity the ought in claims that we ought to do or believe something This is the first volume to provide broad coverage of the study of reasons and normativity across multiple philosophical subfields In addition to focusing on reasons in ethics epistemology and the philosophy of mind action and language the Handbook explores philosophical work on the nature of normativity in general Topics covered include the unity of normativity the fundamentality of reasons attempts to explain reasons in other terms the relation of motivational reasons to normative reasons the internalist constraint the logic and language of reasons and ought connections between reasons intentions choices and actions connections between reasons reasoning and rationality connections between reasons knowledge understanding and evidence reasons encountered in perception and testimony moral principles prudence and reasons agent relative reasons epistemic challenges to our access to reasons normativity in relation to meaning concepts and intentionality instrumental reasons pragmatic reasons for belief aesthetic reasons and reasons for emotions
