Visual Dysfunction in Schizophrenia: A View into the Mechanisms of Madness? Randolph Blake,Steven Silverstein, Brian P. Keane,Michael Green, Szabolcs Kéri,2015-05-11 Research on visual perception in schizophrenia has a long history However it is only recently that it has been included in mainstream efforts to understand the cognitive neuroscience of the disorder and to assist with biomarker and treatment development e g the NIMH CNTRICS and RDoC initiatives Advances in our understanding of visual disturbances in schizophrenia can tell us about both specific computational and neurobiological abnormalities and about the widespread computational and neurobiological abnormalities in the illness of which visual disturbances constitute well studied replicable low level examples Importantly far from being a passive sensory registration process visual perception is active inferential and hypothesis generating and therefore can provide excellent examples of breakdowns in general brain functions in schizophrenia Despite progress made in understanding visual processing disturbances in schizophrenia many challenges exist and many unexplored areas are in need of examination For example the directional relationships between perceptual and cognitive disturbances e g in attention memory executive function predictive coding remain unclear in many cases as do links with symptoms including visual hallucinations The effect of specific visual disturbances on multisensory integration in schizophrenia has also not been explored In addition few studies of vision in schizophrenia have used naturalistic stimuli including real world objects and almost no studies have examined processing during interaction with objects or visual exploration which can provide important data on functioning of the perception for action pathway Relatedly studies of visual processing in schizophrenia have also not been conducted within contexts that include emotional stimulation and the presence of reinforcers characteristics of many real world situations and the consequences of this are likely to be an incomplete view of how and when perception is abnormal in the condition An additional important area involves treatment of visual disturbances in schizophrenia Two major questions regarding this are 1 can visual processing be improved in cases where it is impaired and by what types of interventions affecting which cognitive and neurobiological mechanisms and 2 what are the clinical and functional benefits of improving specific visual functions in people with schizophrenia Other important and understudied

questions concern 1 the extent to which indices of visual functioning can serve as biomarkers such as predictors of relapse treatment response and or recovery 2 the potential role of visual functioning in diagnosing and predicting illness 3 the extent to which some visual perception disturbances are diagnostically specific to schizophrenia and 4 the extent to which visual disturbances are truly manifestations of disease as opposed to aspects of normal variation that in combination with disease serves to modify the clinical presentation This Frontiers Research Topic explores some of these and other issues facing this exciting interface between vision science and schizophrenia research We include papers that span the entire range of different Frontiers paper types including those that are data driven using psychophysics electroencephalography neuroimaging computational and animal models and other methods reviews hypotheses theories opinion methods areas of impact and historical perspectives

The Settlement of Disputes in Early Medieval Europe Wendy Davies,Paul Fouracre,1992-04-23 This is a collection of original essays on the settlement of disputes in the early middle ages a subject of central importance for social and political history Case material from the evidence of charters is used to reveal the realities of the settlement process in the behaviour and interactions of people instead of the prescriptive and idealised models of law codes and edicts The book is not therefore a technical study of charters evidence The geographical range across Europe is unusually wide which allows comparison across differing societies Frankish material is inevitably prominent but the contributors have sought to integrate Celtic Greek Italian and Spanish material into the mainstream of the subject Above all the book aims to demystify the study of early medieval law and to present a radical reappraisal of established assumptions about law and society

Automotive Engineering ,1992 Little Ice Ages Jean M. Grove,2004 This concise and accessible new text offers original and insightful analysis of the policy paradigm informing international statebuilding interventions The book covers the theoretical frameworks and practices of international statebuilding the debates they have triggered and the way that international statebuilding has developed in the post Cold War era Spanning a broad remit of policy practices from post conflict peacebuilding to sustainable development and EU enlargement Chandler draws out how these policies have been cohered around the problematization of autonomy or self government Rather than promoting democracy on the basis of the universal capacity of people for self rule international statebuilding assumes that people lack capacity to make their own judgements safely and therefore that democracy requires external intervention and the building of civil society and state institutional capacity Chandler argues that this policy framework inverses traditional liberal democratic understandings of autonomy and freedom privileging governance over government and that the dominance of this policy perspective is a cause of concern for those who live in states involved in statebuilding as much as for those who are subject to these new regulatory frameworks Encouraging readers to reflect upon the changing understanding of both state society relations and of the international sphere itself this work will be of great interest to all scholars of international relations international security and development
