Kelly, William C. Rivenbark, 2003 This text describes performance budgeting as the integration of the components of performance management planning performance measurement benchmarking and evaluation into the framework of state and local government budgeting The authors present performance budgeting not as a stand alone budgeting technique but as an extension of the traditional budget process that reconciles financial and operational accountability The authors make frequent references to their original research and personal experiences with performance measurement citizen satisfaction surveys and financial management practices They introduce findings from a nationwide survey of public managers throughout the text to illustrate how managers actually use performance data for decision making The book also includes several case studies in performance budgeting as well as interviews with managers and practitioners Designed for use in undergraduate and graduate level courses in public budgeting financial management this practical text will be equally useful for any student or practitioner involved in performance based management **Toward Next-Generation Performance Budgeting** Donald Moynihan, Ivor Beazley, 2016-11-14 Toward Next Generation Performance Budgeting Lessons from the Experiences of Seven Reforming Countries analyzes the difficulties that national governments have had in linking measurement of performance and results to the annual budget process The book is based on intensive reviews of four advanced countries that were early reformers and three pioneers in Central and Eastern Europe In addition to looking at their current systems Toward Next Generation Performance Budgeting looks at how their approaches have evolved over time This book attempts to fill a gap between survey based self assessments and best practice guides It was compiled in response to the concerns of budget departments in countries in Eastern Europe and Central Asia many of which are committed to adopting some form of performance based budgeting and are seeking to learn from the experiences of previous reformers what the practical challenges are and how they can adapt best practice approaches to a messy reality The case studies demonstrate a general pattern of disappointment with the results of performance budgeting balanced by a strong belief in the underlying logic which has resulted in repeated efforts to modify approaches to tighten the links between budgeting and performance These efforts have resulted in significant variation in how countries have implemented performance budgeting and in the benefits they have derived These variations offer guidance for models of next generation performance budgeting avoiding classic pitfalls and incorporating modifications introduced by those who have used it longest and found it useful
