

A black and white photograph of a busy automobile factory. In the foreground, several workers in hard hats and work clothes are working on a car. The car's hood is open, and one worker is leaning over the engine. In the background, a long assembly line of cars stretches into the distance. The factory has a high ceiling with large industrial lights and structural beams. The overall scene depicts the scale and activity of mid-20th-century mass production.

Fucini, 2008-06-30 This book is an exploration into the relations between Americans and Japanese at the Mazda Flat Rock plant The presence of Japan Inc looms larger than ever for millions of American managers and workers as hundreds of Japanese companies open plants and offices in local communities across the United States What is it like to work for the Japanese Can Americans with their strong tradition of individualism adjust to a Japanese team system that emphasizes harmony and close cooperation How do Americans and Japanese resolve the misunderstandings that arise from differences in language and culture Journalists Joseph and Suzy Fucini sought the answers by studying relations between Americans and Japanese at the Mazda plant in Flat Rock Michigan the first wholly owned Japanese auto plant to employ a unionized American workforce For three years the Fucinis followed events at the plant interviewing more than one hundred workers managers and outside suppliers The authors conclude that for all its strengths the team system requires the sacrifice of individual interests to the good of the group and that no matter how hard an individual tries to become part of the Mazda team advancement for both managers and workers will be limited by the fact that they are not Japanese **The U.S. Auto Industry : U.S. Factory Sales, Retail Sales, Imports, Exports, Apparent Consumption, Suggested Retail Prices, and Trade Balances with Selected Countries for Motor Vehicles, 1964-82**, 1983 [The North American Auto Industry since NAFTA](#) Greig Mordue, Dimitry Anastakis, 2024-10-01 The auto sector is North America's most iconic of industries Since the North American Free Trade Agreement came into existence in 1994 the sector has undergone tremendous change escalating concerns around climate change advances in electric and automated vehicles deindustrialization reindustrialization and the rise of low cost locations as hubs for manufacturing The North American Auto Industry since NAFTA examines the issues that have preoccupied the development of policy associated with the manufacture of automobiles in North America The collection addresses the

punctuations that have afflicted the industry since NAFTA's implementation as well as the slower incremental evolutions that have also occurred. Several aspects of automobility and the industry are explored including but not limited to the Canadian, American and Mexican automotive sectors and their evolution and interaction under evolving trade regimes. The book analyses issues surrounding labour, technology, trade policy, regional development, the environment and broader societal impacts of the automobile. It also draws on the expertise of a wide cross section of industry experts and scholars to provide readers with a deeper understanding of the automotive industry and its central role in North America's economic, business and political landscape. Subcommittee on Commerce, Transportation, and Tourism, 1983 **Just Another Car Factory?** James Rinehart, Christopher Huxley, David Robertson, 2018-09-05 This study of CAMI Automotive, a unionized joint venture between General Motors and Suzuki, is the most comprehensive ever undertaken of a lean production plant. James Rinehart, Christopher Huxley and David Robertson address a topic that has inspired fierce debate in industrial relations, sociology, labor studies and human resource management. Heralded as a model of lean production when it opened in 1989, CAMI promised workers something different from traditional plants: a humane environment, empowerment and cooperative labor management relations. However, the enthusiasm workers felt during the orientation and early phases of production steadily declined as did their involvement in participatory activities. Workers came to describe CAMI as just another car factory. Union challenges and shopfloor resistance to key elements of the lean system grew, capped by a five-week strike in 1992. The authors attribute workers' disillusionment to lean production itself rather than to North American managers' inadequate implementation. *American Automobile Workers, 1900-1933* Joyce Shaw Peterson, 1987-01-01 The book is a first-rate social history of automobile workers in the pre-union era. I wish that I had written it. Stephen Meyer, University of Wisconsin Parkside. This book is a comprehensive history of automobile workers in the pre-union era. It covers changes in the kinds of workers who staffed the auto factories, developments in the labor process and in overall conditions of work, daily life outside the factories, informal responses of workers to routinized, monotonous and highly structured work, and automobile worker unions before the creation of the United Automobile Workers. Although the 1920s were seen at the time as a period of peaceful and cooperative labor relations, author Joyce Peterson looks beneath the surface to discover the many ways in which auto workers expressed their displeasure with and attempted to fight against working conditions. The book also examines the Briggs strike of 1933, the first strike to significantly register the impact of the Great Depression upon the automobile industry and to mark the end of the pre-union era. The automobile industry was a model of twentieth-century mass production techniques of managerial organization and of labor relations. Studying automobile workers in their historical and social setting explains a great deal about the nature of modern industry, how it affects the daily life and work of employees, and how workers see themselves as individuals and members of a working class. **MOSS talks/U.S. auto parts industry** United

Daily Consular and Trade Reports, 1911 *Congressional Record* United States. Congress, 1993 Commerce Reports, 1922 **America's Other Automakers** Timothy J. Minchin, 2021-04 In 2018 almost half of all vehicles made in North America were produced at foreign owned plants and the sector was on track to monopolize the market Despite this the industry has been overlooked compared with its domestic counterpart both in scholarship and popular memory Redressing this neglect America's Other Automakers provides a new history of the foreignowned auto sector the first to extensively draw on archival sources and to articulate the human agency of participants including workers managers and industry recruiters Timothy J Minchin challenges the view that the industry's growth primarily reflected incentives stressing human agency and the complexity of individual stories instead Deeply human in its approach the book also explores the industry's impact on grassroots communities showing that it had more costs than supporters acknowledged Drawing on a wide range of primary and secondary sources America's Other Automakers uncovers significant tensions over unionization reports of discriminatory hiring and unease about the industry's rapid growth critically exploring seven large assembly facilities and their impact on the communities in which they were built

American Ground Transport Bradford C. Snell, 1974 **American Ground Transport** United States. Congress. Senate. Committee on the Judiciary, 1974 **The Changing U.S. Auto Industry** James M. Rubenstein, 2002-03-11 In recent years car production in the United States has undergone changes on a scale unknown since the pioneering era prior to World War One New plants have been opened in the interior of the country while most of those located along the east and west coast have been closed The Changing U S Auto Industry uses concepts drawn from geography such as access to markets and shipments of parts to understand some of the reasons for the recent changes Also critical is the changing role of labour in the production process including the search by Japanese firms for a union free environment the re location of some production to Mexico and the debate over the appropriate level of union management cooperation

Reciprocal Trade Agreements United States. Congress. Senate. Committee on Finance, 1934 **Fictions Inc.** Ralph Clare, 2014-09-11 Fictions Inc explores how depictions of the corporation in American literature film and popular culture have changed over time Beginning with perhaps the most famous depiction of a corporation Frank Norris's The Octopus Ralph Clare traces this figure as it shifts from monster to man from force to individual and from American industry to multinational Other Clare examines a variety of texts that span the second half of the twentieth century and beyond including novels by Thomas Pynchon William Gaddis Don DeLillo Richard Powers and Joshua Ferris films such as Network Ghostbusters Gung Ho Office Space and Michael Clayton and assorted artifacts of contemporary media such as television's The Office and the comic strips Life Is Hell and Dilbert Paying particular attention to the rise of neoliberalism the emergence of biopolitics and the legal status of corporate bodies Fictions Inc shows that representations of corporations have come to serve whether directly or indirectly as symbols for larger economic concerns often too vast or complex to comprehend

Whether demonized or lionized the corporation embodies American anxieties about these current conditions and ongoing fears about the viability of a capitalist system **Revenue Revision** United States. Congress. House. Committee on Ways and Means,1932 **Urban Shrinkage, Industrial Renewal and Automotive Plants** Andreas Luescher,Sujata Shetty,2018-12-13 This book focuses on the relationship between the auto industry and the built environment at multiple scales a topic of particular interest now as the industry is going through a period of major transformation Drawing from multiple perspectives including architecture urban design and urban planning the authors examine the changing form of the auto factory itself the changing geography of auto production and the challenges faced by communities as the auto plants that once brought them prosperity and often a sense of identity leave town They examine four places that are dealing in different ways and with varying success with the aftermath of a decommissioned auto plant in their midst These are Janesville Wisconsin and Willow Run Michigan in the U S and Bochum Germany and Genk Belgium in Europe Together these four cases provide some clues about what the future might look like for places that were once intimately connected with the manufacture of cars
