And Ethics Information Luciano Floridi:

The Ethics of Information Luciano Floridi, 2013-10 Luciano Floridi develops the first ethical framework for dealing with the new challenges posed by Information and Communication Technologies ICTs He establishes the conceptual foundations of Information Ethics by exploring important metatheoretical and introductory issues and answering key theoretical questions of great philosophical interest Putting Information First Patrick Allo, 2011-05-03 Putting Information First focuses on Luciano Floridi's contributions to the philosophy of information Respected scholars stimulate the debate on the most distinctive and controversial views he defended and present the philosophy of information as a specific way of doing philosophy Contains eight essays by leading scholars a reply by Luciano Floridi and an epilogue by Terrell W Bynum Explains the importance of philosophy of information as a specific way of doing philosophy Focuses directly on the work of Luciano Floridi in the area of philosophy of information but also connects to contemporary concerns in philosophy more generally Illustrates several debates that arise from core themes in the philosophy of information

The Philosophy of Information Luciano Floridi, 2013-01-10 Luciano Floridi presents a book that will set the agenda for the philosophy of information PI is the philosophical field concerned with 1 the critical investigation of the conceptual nature and basic principles of information including its dynamics utilisation and sciences and 2 the elaboration and application of information theoretic and computational methodologies to philosophical problems This book lays down for the first time the conceptual foundations for this new area of research It does so systematically by pursuing three goals Its metatheoretical goal is to describe what the philosophy of information is its problems approaches and methods Its introductory goal is to help the reader to gain a better grasp of the complex and multifarious nature of the various concepts and phenomena related to information Its analytic goal is to answer several key theoretical questions of great philosophical interest arising from the investigation of semantic information

Information Luciano Floridi, 2010-02-25 We live an information soaked existence information pours into our lives through television radio books and of course the Internet Some say we suffer from infoglut But what is information The concept of information is a profound one rooted in mathematics central to whole branches of science yet with implications on every aspect of our everyday lives DNA provides the information to create us we learn through the information fed to us we relate to each other through information transfer gossip lectures reading Information is not only a mathematically powerful concept but its critical role in society raises wider ethical issues who owns information Who controls its dissemination Who has access to information Luciano Floridi a philosopher of information cuts across many subjects from a brief look at the mathematical roots of information its definition and measurement in bits to its role in genetics we are information and its social meaning and value He ends by considering the ethics of information including issues of ownership privacy and accessibility copyright and open source For those unfamiliar with its precise meaning and wide applicability as a philosophical concept information may seem a bland or mundane topic Those who have studied some science or philosophy

or sociology will already be aware of its centrality and richness But for all readers whether from the humanities or sciences Floridi gives a fascinating and inspirational introduction to this most fundamental of ideas ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable *Ethics, Law and the Politics of Information* Massimo Durante, 2017-08-03 This book provides a detailed discussion of the theoretical and practical implications of the change driven by ICTs Such a change is often much more profound than an emphasis on information technology and society can capture for not only does it bring about ethical and policy vacuums that call for a new understanding of ethics politics and law but it also re ontologizes reality as propounded by Luciano Floridi s philosophy and ethics of information The informational turn is transforming our understanding of reality by challenging the conventional ways we have of thinking about our world and our identities in terms of stable and enduring structures and beliefs The information age we inhabit brings to completion our self understanding as informational systems that produce process and exchange information with other informational systems in an environment that is itself made up of information The present volume provides us with a better understanding of the normative nature and role of information helping us to grasp the sense and extent to which informational resources serve as constraining affordances guiding our behaviours It does so by delineating the background against which we build our beliefs about reality make decisions and behave through our interactions with a multi agent system that is increasingly dependent on ICTs The book will be of interest to a vast audience ranging from information technologists ethicists policy makers social and legal scholars and all those willing to embrace the following three tenets we construct our world and ourselves informationally by constructing our world and ourselves we thereby become aware of our limits it is precisely these limits that make us become human beings **The Logic of Information** Luciano Floridi, 2019-02-14 Luciano Floridi presents an innovative approach to philosophy conceived as conceptual design He explores how we make transform refine and improve the objects of our knowledge His starting point is that reality provides the data to be understood as constraining affordances and we transform them into information like semantic engines Such transformation or repurposing is not equivalent to portraying or picturing or photographing or photocopying anything It is more like cooking the dish does not represent the ingredients it uses them to make something else out of them yet the reality of the dish and its properties hugely depend on the reality and the properties of the ingredients Models are not representations understood as pictures but interpretations understood as data elaborations of systems Thus Luciano Floridi articulates and defends the thesis that knowledge is design and philosophy is the ultimate form of conceptual design Although entirely independent of Floridi s previous books *The Philosophy of Information* OUP 2011 and *The Ethics of Information* OUP 2013 *The Logic of Information* both complements the existing volumes and presents new work

on the foundations of the philosophy of information The Ethics of Artificial Intelligence Luciano Floridi, 2023-07-12 The Ethics of Artificial Intelligence has two goals The first goal is meta theoretical and is fulfilled by Part One which comprises the first three chapters an interpretation of the past Chapter 1 the present Chapter 2 and the future of AI Chapter 3 Part One develops the thesis that AI is an unprecedented divorce between agency and intelligence On this basis Part Two investigates the consequences of such a divorce developing the thesis that AI as a new form of agency can be harnessed ethically and unethically It begins Chapter 4 by offering a unified perspective on the many principles that have been proposed to frame the ethics of AI This leads to a discussion Chapter 5 of the potential risks that may undermine the application of these principles and then Chapter 6 an analysis of the relation between ethical principles and legal norms and a definition of soft ethics as post compliance ethics Part Two continues by analysing the ethical challenges caused by the development and use of AI Chapter 7 evil uses of AI Chapter 8 and good practices when applying AI Chapter 9 The last group of chapters focuses on the design development and deployment of AI for Social Good or AI4SG Chapter 10 the positive and negative impacts of AI on the environment and how it can be a force for good in the fight against climate change but not without risks and costs which can and must be avoided or minimised Chapter 11 and the possibility of using AI in support of the United Nations Sustainable Development Goals Chapter 12 The book concludes Chapter 13 by arguing in favour of a new marriage between the Green of all our habitats and the Blue of all our digital technologies and how this new marriage can support and develop a better society and a healthier biosphere **Luciano Floridi's Philosophy of Technology** Hilmi Demir, 2012-06-15 Information and communication technologies of the 20th century have had a significant impact on our daily lives They have brought new opportunities as well as new challenges for human development The Philosopher Luciano Floridi claims that these new technologies have led to a revolutionary shift in our understanding of humanity's nature and its role in the universe Floridi's philosophical analysis of new technologies leads to a novel metaphysical framework in which our understanding of the ultimate nature of reality shifts from a materialist one to an informational one In this world all entities be they natural or artificial are analyzed as informational entities This book provides critical reflection to this idea in four different areas Information Ethics and The Method of Levels of Abstraction The Information Revolution and Alternative Categorizations of Technological Advancements Applications Education Internet and Information Science Epistemic and Ontic Aspects of the Philosophy of Information *E-Politics and the Evolution of Technodemocracies* Ilia Galán Díez, 2023-08-22 This book provides an overview of the new political possibilities and risks present in today's society which has seen a global collapse of confidence and inefficient democracy oligarchies Cyber societies configure new models of government using big data algorithms and robots through which more voting possibilities new forms of utopia decentralized power and e countries are all possible In the book expired democracies are challenged in the face of the new possibilities that technology opens up This is the first book to offer new e political models for the resolution of our global chaos *A Politics of Patent Law* Kali N.

Murray,2013 This book examines how national regional and international patent law can better respond to the interests of a diverse set of non profit and public interest entities and be of more benefit to developing countries The book sets out a tool box of participatory mechanisms which would foster third party participation in the patent process The Logic of Information Luciano Floridi,2019 Luciano Floridi presents an innovative approach to philosophy conceived as conceptual design He explores how we make transform refine and improve the objects of our knowledge His starting point is that reality provides the data to be understood as constraining affordances and we transform them into information like semantic engines Such transformation or repurposing is not equivalent to portraying or picturing or photographing or photocopying anything 0It is more like cooking the dish does not represent the ingredients it uses them to make something else out of them yet the reality of the dish and its properties hugely depend on the reality and the properties of the ingredients Models are not representations understood as pictures but interpretations understood as data elaborations of systems Thus Luciano Floridi articulates and defends the thesis that knowledge is design and philosophy is the ultimate form of conceptual design 0Although entirely independent of Floridi s previous books *The Philosophy of Information* OUP 2011 and *The Ethics of Information* OUP 2013 *The Logic of Information* both complements the existing volumes and presents new work on the foundations of the philosophy of information *Human Interaction with Technology for Working, Communicating, and Learning: Advancements* Mesquita, Anabela,2011-12-31 This book provides a framework for conceptual theoretical and applied research in regards to the relationship between technology and humans Provided by publisher The Digitalised Image of God Ximian Xu,2024-10-08 This book focuses on the idea of the imago Dei to engaging theologically with artificial intelligence AI It reflects on how enormous progress in the development of AI has raised some challenges to Christian theology Questions explored include is AI created in the imago Dei If so does AI challenge the uniqueness of the human being as the imago Dei If not could AI be incorporated into human communities as a human companion in the same way as a natural human person Would AI eventually develop to have human level consciousness and be capable of performing liturgies and ethical actions Bringing to light the radical distinction between the imago Dei and the imago hominis the book constructs a theo ontological foundation for AI and draws on the Reformed theology of archetype ectype as a metaphysical tool to deploy a holistic account of the imago Dei in theology AI dialogues The author argues that the imago Dei is the signifier of the beginning both of God human stories and stories of human ethical performances towards others From the perspective of the image of the imago Dei it can be argued that AI can somehow participate into the narration of these religious and ethical stories This book will be of particular interest to scholars of theology and those working in the field of religion and science technology Proceedings of the fourth Asia-Pacific Research in Social Sciences and Humanities, Arts and Humanities Stream (AHS-APRISH 2019) Shuri Mariasih Gietty Tambunan,2023-05-27 This is an open access book According to Castells power now rests in networks the logic of the network is more powerful than the powers of the network quoted in Weber 2002

p 104 it is whether nation states or local communities are deeply affected especially by inclusion in and exclusion from the global networks that structure a various sectors in society at any level Thus it is also crucial look closely at exclusion from and inclusion in different kinds of social structures where connectivity and access to networks are essential being aware that people at the bottom are those who with nothing to offer the network are excluded Castells arguments shows us how the new forms of network society offer challenges in a way that despite the disappearance of conventional ties exploitation marginalization exclusion and differentiation remain In what follows scholarships are invited to build an academic discussion on characterizing the structure and dynamics of societies in the world of the twenty first century Thus scholar may come to look at the meaning of being in a network society by examining the role of network society within the complexity of socio cultural political and economic circumstances in strengthening the role of science in overcoming local national regional and global problems But scientific research is also required to identify a wide variety of solutions to societal problems enhanced by the network society which no longer relate solely to a particular discipline but are multi and trans disciplinary In addition recent research has changed the traditional role of academia demanding more collaboration in the production of science not only among universities but also among researchers social practitioners and policymakers Considering these issues the fourth Asia Pacific Research in Social Sciences and Humanities APRiSH will be hosted by the Faculty of Social and Political Sciences Universitas Indonesia FISIP UI in 2019 under the theme The Network Society Continuity and Change Scientific inputs from all parts of the world are welcome academically and practically Various perspectives based on mono disciplinary multi disciplinary or trans disciplinary research are expected to examine the problems and contribute to solutions *The Nature of Peace and the Morality of Armed Conflict* Florian Demont-Biaggi, 2017-10-24 This book explores topical issues in military ethics by according peace a central role within an interdisciplinary framework Whilst war and peace have traditionally been viewed through the lens of philosophical enquiry political issues and theological ideas as well as common sense have also influenced people s understanding of armed conflicts with regards to both the moral issues they raise and the policies and actions they require Comprised of fourteen essays on the role and application of peace the book places emphasis on it s philosophical moral theological technological and practical implications Starting with an overview of Kantian perspectives on peace it moves to discussions of the Just War debates religious conceptualizations of peace and the role of peace in modern war technology and cyber security Finally concluding with discussions of the psychological and medical impacts of war and peace on both the individual and the larger society this collection offers a contribution to the field and will be of interest to a wide audience Chapters 4 6 and 10 of this book are available open access under a CC BY 4 0 license at link.springer.com **Medical Information Systems Ethics** Jérôme Béranger, 2015-08-31 The exponential digitization of medical data has led to a transformation of the practice of medicine This change notably raises a new complexity of issues surrounding health IT The proper use of these communication tools such as telemedicine e health m health the big medical

data should improve the quality of monitoring and care of patients for an information system to human face Faced with these challenges the author analyses in an ethical angle the patient physician relationship sharing transmission and storage of medical information setting pins to an ethic for the digitization of medical information Drawing on good practice recommendations closely associated with values this model is developing tools for reflection and present the keys to understanding the decision making issues that reflect both the technological constraints and the complex nature of human reality in medicine

Law and the Philosophy of Privacy Janice Richardson,2015-08-20 Situating privacy within the context of political philosophy this book highlights the way in which struggles concerning the meaning of privacy have always been political Different conceptions of privacy are here shown to involve diverse assumptions about ontology our conceptions of self culture society and communication Privacy theory s debt to Locke Kant or Mill and what is at stake in their conceptual frameworks is examined The extent to which the term privacy has been used to the detriment of and to create weaker parties in marriage in the workplace and now as citizens or non citizens and consumers as well as employees is also demonstrated In contrast Janice Richardson pursues the relevance of Floridi s philosophy of information before turning to her application of Spinoza the philosopher of communication in order to outline a more useful framework through which to think about privacy today The book will be of interest to those working in political philosophy feminist philosophy law the philosophy of information sociology media and cultural studies

Ethics, Governance, and Policies in Artificial Intelligence Luciano Floridi,2021-11-02 This book offers a synthesis of investigations on the ethics governance and policies affecting the design development and deployment of artificial intelligence AI Each chapter can be read independently but the overall structure of the book provides a complementary and detailed understanding of some of the most pressing issues brought about by AI and digital innovation Given its modular nature it is a text suitable for readers who wish to gain a reliable orientation about the ethics of AI and for experts who wish to know more about specific areas of the current debate

The Algorithmic Code of Ethics Jerome Beranger,2018-12-18 The technical progress illustrated by the development of Artificial Intelligence AI Big Data technologies the Internet of Things IoT online platforms NBICs autonomous expert systems and the Blockchain let appear the possibility of a new world and the emergence of a fourth industrial revolution centered around digital data Therefore the advent of digital and its omnipresence in our modern society create a growing need to lay ethical benchmarks against this new religion of data the dataisme

The Fourth Revolution Luciano Floridi,2014-06-26 Who are we and how do we relate to each other Luciano Floridi one of the leading figures in contemporary philosophy argues that the explosive developments in Information and Communication Technologies ICTs is changing the answer to these fundamental human questions As the boundaries between life online and offline break down and we become seamlessly connected to each other and surrounded by smart responsive objects we are all becoming integrated into an infosphere Personas we adopt in social media for example feed into our real lives so that we begin to live as Floridi puts in onlife Following those led by Copernicus

Darwin and Freud this metaphysical shift represents nothing less than a fourth revolution Onlife defines more and more of our daily activity the way we shop work learn care for our health entertain ourselves conduct our relationships the way we interact with the worlds of law finance and politics even the way we conduct war In every department of life ICTs have become environmental forces which are creating and transforming our realities How can we ensure that we shall reap their benefits What are the implicit risks Are our technologies going to enable and empower us or constrain us Floridi argues that we must expand our ecological and ethical approach to cover both natural and man made realities putting the e in an environmentalism that can deal successfully with the new challenges posed by our digital technologies and information society
