**Collision Course** Kerry Higgs, 2016-09-02 The story behind the reckless promotion of economic growth despite its disastrous consequences for life on the planet The notion of ever expanding economic growth has been promoted so relentlessly that growth is now entrenched as the natural objective of collective human effort The public has been convinced that growth is the natural solution to virtually all social problems poverty debt unemployment and even the environmental degradation caused by the determined pursuit of growth Meanwhile warnings by scientists that we live on a finite planet that cannot sustain infinite economic expansion are ignored or even scorned In Collision Course Kerry Higgs examines how society's commitment to growth has marginalized scientific findings on the limits of growth casting them as bogus predictions of imminent doom Higgs tells how in 1972 The Limits to Growth written by MIT researchers Donella Meadows Dennis Meadows Jorgen Randers and William Behrens III found that unimpeded economic growth was likely to

collide with the realities of a finite planet within a century Although the book's arguments received positive responses initially before long the dominant narrative of growth as panacea took over Higgs explores the resistance to ideas about limits tracing the propagandizing of free enterprise the elevation of growth as the central objective of policy makers the celebration of the magic of the market and the ever widening influence of corporate funded think tanks a parallel academic universe dedicated to the dissemination of neoliberal principles and to the denial of health and environmental dangers from the effects of tobacco to global warming More than forty years after *The Limits to Growth* the idea that growth is essential continues to hold sway despite the mounting evidence of its costs climate destabilization pollution intensification of gross global inequalities and depletion of the resources on which the modern economic edifice depends *The Oxford Companion to United States History* Paul S. Boyer, Melvyn Dubofsky, 2001 In this volume that is as big and as varied as the nation it portrays are over 1 400 entries written by some 900 historians and other scholars illuminating not only America's political diplomatic and military history but also social cultural and intellectual trends science technology and medicine the arts and religion *Disability and the Life Course* Mark Priestley, 2001-07-05 *Disability and the Life Course* first published in 2001 explores the global experience of disability using a novel life course approach The book explores how disabling societies impact on disabled people's life experiences and highlights the ways in which disabled people have acted to take more control over their own lives It provides a unique combination of analysis policy issues and autobiography offering the reader a rare opportunity to make links between the theoretical the political and the personal in a single volume The material is set in a truly international context with contributions from thirteen different countries bringing together established and emerging writers both disabled and non disabled The book bridges some important gaps in the existing disability literature by including issues relevant to disabled people of all ages and with different kinds of impairments and also by offering a unique analysis of the relationship between disability and generation in a changing world *Catalogue Number. Poulson, 2007-01-22 Challenged by Coeducation details the responses of women s colleges to the most recent wave of Women s colleges originated in the mid nineteenth century as a response to women s exclusion from higher education Women s academic successes and their persistent struggles to enter men s colleges resulted in coeducation rapidly becoming the norm however Still many prestigious institutions remained single sex notably most of the Ivy League and all of the Seven Sisters colleges In the mid twentieth century colleges concerns about finances and enrollments as well as ideological pressures to integrate formerly separate social groups led men s colleges and some women s colleges to become coeducational The admission of women to practically all men s colleges created a serious challenge for women s colleges Most people no longer believed women s colleges were necessary since women had virtually unlimited access to higher education Even though research spawned by the women s movement indicated the benefits to women of a room of their own few young women remained interested in applying to women s colleges Challenged by Coeducation details the responses of women s colleges to this latest wave of coeducation Case studies written expressly for this volume include many types of women s colleges Catholic and secular Seven Sisters and less prestigious private and state liberal arts and more applied northern southern and western urban and

rural independent and coordinated with a coeducational institution They demonstrate the principal ways women s colleges have adapted to the new coeducational era some have been taken over or closed but most have changed by admitting men and thereby becoming coeducational or by offering new programs to different populations Some women s colleges mostly those that are in cities connected to other colleges and prestigious with a high endowment still enjoy success Despite their dramatic drop in numbers from 250 to fewer than 60 today women s colleges are still important editors Miller Bernal and Poulson argue With their commitment to enhancing women s lives women s colleges and formerly women s colleges can serve as models of egalitarian coeducation
