"Who is Us?"--national Interests in an Age of Global Industry United States. Congress. Joint Economic Committee,1991 **Embedded Autonomy** Peter B. Evans,2012-01-12 In recent years debate on the state s economic role has too often devolved into diatribes against intervention Peter Evans questions such simplistic views offering a new vision of why state involvement works in some cases and produces disasters in others To illustrate he looks at how state agencies local entrepreneurs and transnational corporations shaped the emergence of computer industries in Brazil India and Korea during the seventies and eighties Evans starts with the idea that states vary in the way they are organized and tied to society In some nations like Zaire the state is predatory ruthlessly extracting and providing nothing of value in return In others like Korea it is developmental promoting industrial transformation In still others like Brazil and India it is in between sometimes helping sometimes hindering Evans s years of comparative research on the successes and failures of state involvement in the process of industrialization have here been crafted into a persuasive and entertaining work which demonstrates that successful state action requires an understanding of its own limits a realistic relationship to the global economy and the combination of coherent internal organization and close links to society that Evans called embedded autonomy

American Railroad Journal ,1854 *Florida's Space Coast* William B. Faherty,2024-03-05 An important interesting study of the relations between the Kennedy Space Center and the communities of Brevard County Florida Roger D Launius chief historian NASA Washington D C This outstanding book provides readers of Florida history our first insight into the impact that high technology has had on the state Brevard County is a veritable laboratory for understanding what happens when space science and engineering put down roots in a wilderness setting Faherty s writing is direct simple even folksy at times I devoured it Michael Gannon author of Pearl Harbor Betrayed and A

Short History of Florida Florida's Space Coast tells the compelling story of America's half century in space exploration from the successful launch of the first two stage rocket in 1950 through the latest space shuttle missions of 2000 Told from the unique viewpoint of the people who built the Spaceport this book shows how the space program transformed the east central Florida coast from a traditional citrus production and tourist area to one of the most influential high tech centers in the nation Cape Canaveral was chosen as a missile launch site because of its many geographical advantages However in the early years of the space program the area was far from an ideal place for NASA employees to raise their families NASA brought in thousands of space related workers who besides sending machines and men into space had to meet the challenge of moving their families from urban environs to a rural southern county This book engagingly recounts the parallel stories of the establishment of America's space program and its impact on the development of Brevard County William Barnaby Faherty is professor emeritus of history at St Louis University and director of the Museum of the Western Jesuit Missions in Hazelwood Missouri

Railway Locomotives and Cars, 1851 *D.W. Griffith's the Birth of a Nation* Melvyn Stokes, 2008-01-15 In this deeply researched and vividly written volume Melvyn Stokes illuminates the origins production reception and continuing history of this ground breaking aesthetically brilliant and yet highly controversial movie By going back to the original archives particularly the NAACP and D W Griffith Papers Stokes explodes many of the myths surrounding *The Birth of a Nation* 1915 Yet the story that remains is fascinating the longest American film of its time Griffith's film incorporated many new features including the first full musical score compiled for an American film It was distributed and advertised by pioneering methods that would quickly become standard Through the high prices charged for admission and the fact that it was shown at first only in live theaters with orchestral accompaniment *Birth* played a major role in reconfiguring the American movie audience by attracting more middle class patrons But if the film was a milestone in the history of cinema it was also undeniably racist Stokes shows that the darker side of this classic movie has its origins in the racist ideas of Thomas Dixon Jr and Griffith's own Kentuckian background and earlier film career The book reveals how as the years went by the campaign against the film became increasingly successful In the 1920s for example the NAACP exploited the fact that the new Ku Klux Klan which used Griffith's film as a recruiting and retention tool was not just anti black but also anti Catholic and anti Jewish as a way to mobilize new allies in opposition to the film This crisply written book sheds light on both the film's racism and the aesthetic brilliance of Griffith's filmmaking It is a must read for anyone interested in the cinema
