Hardwick,William Van Cleve,2018-07-31 A critical problem in resource scarce countries across the globe is the shortage of appropriately trained health care providers According to the World Health Organization the current global health workforce shortage of 7.2 million providers is estimated to increase to 12.9 million by 2035 This disproportionately affects resource scarce countries denying basic health care to millions and limiting access to life saving treatments Due to limited resources in these countries not

enough health professionals receive training few have the opportunity for continuing education and the ability to develop or implement educational programs and curricula is constrained Additionally many existing providers choose to emigrate in pursuit of professional advancement opportunities contributing to the overall shortage of qualified health care providers in these environments Efforts to strengthen health workforce capacity not only increases access safety and availability of care but is critical to building resilient health systems capable of caring for the world s neediest populations This requires not only cultivating new health care providers but also providing ongoing professional development to retain and support current providers advancing the level of practice in accordance with current clinical science cultivating educators and enhancing training curricula It is critical also to contribute to the limited body of research documenting the effectiveness and impact of various models of collaborative education and partnership to improve health worker training and retention This Research Topic examines strategies for building health workforce capacity through the prism of educational partnerships offering significant examples of effective models of international collaborative education as well as insight and guidance on the structure and operation of successful global partnerships Collectively the 31 articles accepted and included in this eBook represent a diversity of health professions and geographies across academic non governmental organizations and other global partnership forms The published manuscripts highlight various elements of partnerships with several consistent themes emerging capacity building local empowerment mutual trust and respect long term commitment equity collaboration and the importance of integrating theory and practice for a balance of academic and clinical development The manuscripts provide examples of partnership and educational programs that are in the formative early stages of implementation and others which have been sustained long term some for decades The following eBook is divided into two parts with each part broken down into sections Part I of the eBook includes 18 manuscripts that showcase long term educational programs that strongly exemplify multiple foundational aspects of international partnerships in education including mutual collaboration and project management empowerment of host partners to lead and sustain programs and capacity building While individual manuscripts included in Part I look broadly at multiple aspects of successful international partnerships in education Part II manuscripts focus intently on one two elements Part II includes 13 articles that highlight partnership through short rather than long term educational initiatives as well as program development and broad academic partnerships This Research Topic was sponsored by Health Volunteers Overseas a United States based non profit that collaborates with over eighty international universities and health institutions to send volunteer health professionals to low resource countries to provide continuing education train the trainer courses professional support and consultation on academic program and curricula development

The Uganda Gazette Uganda,2015-05 Strategies, Policies and Directions for Refugee Education Enakshi Sengupta,Patrick Blessinger,2018-10-08 This volume will provide educators at all levels with a research and evidence based understanding of the educational opportunities and challenges facing refugees The chapters focus on strategies and policies

for providing education to the world's refugee populations **The Future of Economic and Social Rights** Katharine G. Young, 2019-04-11 Captures significant transformations in the theory and practice of economic and social rights in constitutional and human rights law **Business With Purpose: Advancing Social Enterprise** Melodena Stephens Balakrishnan, 2020-02-26 A Social Enterprise Venture SEV is defined as an organization initiative or startup that has a strong social innovation characteristic focusing on a scalable and sustainable social wealth creation or sustainable living at the individual or community level Most books that deal with SEVs unfortunately still focus on non profits Current market trends indicate non profits need more sustainable funding mechanisms for survival This book focuses on the growing need to build a business with purpose With the growing role of the private sector in the development arena as highlighted by the UN Sustainable Development Goals all firms need to relook entrepreneurship from a business with purpose lens The fact that venture capitalists private equity firms are acquiring social ventures like Bain Capital and TOMS or that SEVs are being divested L Oreal and Body Shop reinforces the need to understand which business models work One of the biggest barriers for growth of SEVs is scalability and internationalization This book fills the present gap between research and practice and the non profits and for profit worlds **Arid Land Systems: Sciences and Societies** Troy Sternberg, Ariell Ahearn, 2019-08-19 Understanding deserts and drylands is essential as arid landscapes cover 40% of the Earth and are home to two billion people Today's problematic environment human interaction needs contemporary knowledge to address dryland complexity Physical dimensions in arid zones land systems climate and hazards ecology are linked with social processes that directly impact drylands such as land management livelihoods and development The challenges require integrated research that identifies systemic drivers across global arid regions Measurement and monitoring field investigation remote sensing and data analysis are effective tools to investigate natural dynamics Equally inquiry into how policy and practice affect landscape sustainability is key to mitigating detrimental activity in deserts Relations between socio economic forces and degradation agro pastoral rangeland use drought and disaster and resource extraction reflect land interactions Contemporary themes of food security conflict and conservation are interlinked in arid environments This book unifies desert science arid environments and dryland development The chapters identify land dynamics address system risks and delineate human functions through original research in arid zones Mixed methodologies highlight the vital links between social and environmental science in global deserts The book engages with today's topical themes and presents novel analyses of arid land systems and societies *The Report: Kenya 2017* , As the largest economy in the EAC and COMESA in terms of GDP Kenya has positioned itself as a major economic power in sub Saharan Africa Traditionally a largely agrarian economy Kenya has quickly entrenched its position as a manufacturing logistics and technology hub in the region and this diversification forms a solid platform from which the government can generate economic growth over the coming years The resolution of the electoral process improving business confidence and strong private consumption are likely to support GDP expansion

over 2018 and into 2019 In April 2018 the IMF estimated the economy would expand by 5.5% in 2018 and 6% in 2019 compared to 4.8% in 2017 *Emerging Infectious Diseases*, 2016

The Female Reproductive Tract Microbiome - Gatekeeper for Sexual and Reproductive Health Mariya Ivanova Petrova, Jo-Ann S. Passmore, Lindi Masson, 2023-03-21 An optimal female reproductive tract FRT microbiome represents a cornerstone for successful reproductive and sexual health. Although understanding the link between the microbiota and our health is the focus of a growing number of research programs and research has advanced in the last decade the FRT microbiome remains relatively poorly defined. This is despite it being one of the most critical factors impacting fertility and the health of the future generation. Important gaps in our knowledge remain about women specific microbial niches such as the lower FRT. The vaginal microbiome of healthy women is almost exclusively dominated by *Lactobacillus* species making these species synonymous with vaginal health. Largely thanks to their capacity to produce high levels of lactic acid lactobacilli are thought to inhibit most invading bacterial and viral pathogens. Nonetheless the dogma that all *Lactobacillus* species are key beneficial species in the vaginal niche has been questioned based on the association with disease for some of the major players in the niche for example *L. iners* particularly in non European or Caucasian cohorts. Further the ability of other mostly anaerobic species besides lactobacilli to maintain similar homeostasis in the vaginal niche raises the question of what we define as optimal or healthy vaginal microbiota. Answering this question is essential since a non optimal or dysbiotic vaginal microbiome has been linked to the acquisition of sexually transmitted infections STIs infertility and adverse pregnancy outcomes. To confront these healthcare challenges we should be able to distinguish between an optimal and non optimal microbiome. With the advance of sequence based technologies as well as other omics methodologies including metaproteomics metabolomics and culturomics we are now able to begin to correlate the presence as well as the activities of specific organisms and microbial communities with health or disease. However we are only beginning to understand the complexity of interactions between bacterial community members with each other and the human host. A better understanding of these relationships within this specialized environmental niche and in relation to female sexual and reproductive health is critical for the development of novel diagnostics and therapeutics to create and maintain an optimal FRT microbiome.
