Christian Clergy in American Politics Sue E. S. Crawford, Laura R. Olson, 2003-05-06 In recent decades Christian clergy have ever more frequently had to decide whether to become involved in politics When they do become involved their influence can be substantial In this book Sue E S Crawford Laura R Olson and their coauthors explore the political choices clergy make and the consequences of these choices Drawing on personal interviews and statistical data to place the actions of clergy in both their religious and secular contexts the authors study mainline and evangelical Protestant Catholic and Mennonite communities They examine the role of white African American and female religious leaders And they address issues of local development city government and national and international politics Contributors Christi J Braun Boston University School of Law Timothy A Byrnes Colgate University James C Cavendish University of South Florida Sue E S Crawford Creighton University Katie Day Lutheran Theological Seminary at Philadelphia Melissa M Deckman Washington College Paul A Djupe Denison University Joel S Fetzer Central Michigan University James L Guth Furman University Ted G Jelen University of Nevada Las Vegas Laura R Olson Clemson University James M Penning Calvin College Mary R Sawyer Iowa State University Corwin E Smidt Calvin College *Political Activists in America* Nathan Teske, 2009-01-01 Argues that active involvement in politics can be deeply fulfilling to the individual and that the construction of identity for all activists is both about morality and about what one wants for oneself Includes interviews with environmental social justice and pro life activists Provided by publisher *The Organization Ecology of Interest Communities* Darren Halpin, David Lowery, Virginia Gray, 2016-04-29 This volume summarizes the origins and development of the organization ecology approach to the study of interest representation and lobbying and outlines an agenda for future research Multiple authors from different countries and from different perspectives contribute their analysis of this research program **Handbook on Lobbying and Public Policy** David Coen, Alexander Katsaitis, 2024-08-06 This uniquely comprehensive Handbook examines the complex relationship between lobbyists and public policy through an innovative multi analytic lens Emphasising the profound impact of the topic on modern government and contemporary societal issues David Coen and Alexander Katsaitis bring together a wide range of experts to illuminate the contexts and processes involved in public policy and how this interacts with the practice of lobbying *The Population Ecology of Interest Representation* Virginia Gray, David Lowery, 1996 This examination of lobbying communities explores how interest group populations are constructed and how they influence politics and public policy By examining how populations of interest groups are comprised this work fills an important gap between existing theories of the origins of individual interest groups and studies of interest group influence The population ecology model of interest communities developed here builds on insights first developed in population biology and later employed by organizational ecologists The model s central premise is that it is the environmental forces confronting interest organizations that most directly shape the contours of interest populations After examining the demography of interest

organizations in the fifty American states the population ecology model is used to account for variations in the density and diversity of their interest communities the nature of competition among similar interest organizations to establish viable niches and the impact of alternative configurations of interest communities on the legislative process and the policies it produces These empirical findings suggest that the environment of interest communities is highly constraining limiting their size composition and potential impact on politics Virginia Gray is Professor of Political Science University of Minnesota David Lowery is Burton Craige Professor of Political Science University of North Carolina at Chapel Hill

New Directions in Interest Group Politics Matt Grossmann, 2013-10-23 Reflecting cutting edge scholarship but written for undergraduates *New Directions in Interest Group Politics* will help students think critically about influence in the American political system There is no shortage of fear about the special interests in American political debate but reliable information about what interest groups do who they represent and how they influence government is often lacking This volume comprised of original essays by leading scholars is designed to summarize and explain contemporary research that helps address popular questions and concerns making studies accessible to undergraduate students and providing facts to buttress informed debate The book covers the mobilization of interest groups their activities and their influence Each chapter briefly reviews research on a central question of scholarship before focusing on a particular empirical project designed to shed light on the topic Rather than simply providing a descriptive overview the chapters are designed to foster critical thinking by getting students to assess the role of interest groups in the American political system and supplying evidence of their effects Importantly a set of web resources associated with the book offer instructions for research and writing assignments Students will be able to collect and analyze data on campaign finance lobbying and interest group involvement in governance The eResource website includes materials for several classroom simulations such as an interest group legislative battle a Netroots convention and a rule making process As they read about key questions in democratic government and current research trends students can practice serving as interest group activists and conduct original research on topics that most interest them

The Expanding Boundaries of Black Politics Georgia A. Persons, 2011-12-31 This volume joins the preceding volumes in this distinguished series in presenting contemporary research by leading political scientists addressing topics of interest to those concerned with African American affairs It captures the expanding boundaries of black politics and the persistent interests of the black community at large The anchoring symposium *The Expanding Boundaries of Black Politics* presents the scholarship of a cadre of young black political scientists actively engaged in the critical tasks of moving forward the study of black politics Their concerns include expanding the boundaries of black politics along the lines of epistemology and methodology especially in regard to core issues and areas within this field In an introductory essay by Todd Shaw the work of these scholars is situated within the context of temporal shifts in scholarly emphases Overlapping issues and concerns across time as well as black political scholarship as defined in the field since its beginning are addressed The second part of this volume

entitled *Maximizing the Black Vote* Recognizing the Limits of Electoral Politics concentrates on serious lingering social concerns These include the policy significance of black mayors affecting the concomitant impact of the black vote the boundaries being pushed concerning the conjunction of black theology and sexual identity a gendered analysis of familial policies and the deepening social and economic plight of young black males including felon disfranchisement *The Expanding Boundaries of Black Politics* carries forth the search for an understanding of the relationship between religion the black church and black political behavior cross racial group coalitions as concerns matters of immigration growing multiculturalism and the impact on black politics maximizing the impact of the black vote focusing on voting rights enforcement the black vote in presidential elections and the voice of the Congressional Black Caucus in American foreign policy and persistent social inequalities especially as it concerns ideology federalism and social welfare policy *The Not-So-Special Interests* Matt Grossmann, 2012-04-11 Lobbyist tends to be used as a dirty word in politics Indeed during the 2008 presidential primary campaign Hillary Clinton was derided for even suggesting that some lobbyists represent real Americans But although many popular commentators position interest groups as representatives of special not public interests much organized advocacy is designed to advance public interests and ideas Advocacy organizations more than 1 600 of them are now an important component of national political institutions This book uses original data to explain why certain public groups such as Jews lawyers and gun owners develop substantially more representation than others and why certain organizations become the presumed spokespersons for these groups in government and media In contrast to established theory and conventional wisdom this book demonstrates that groups of all sizes and types generate advocates to speak on their behalf though with varying levels of success Matt Grossmann finds that the advantages of organized representation accrue to those public groups that are the most politically motivated and involved in their communities Organizations that mobilize members and create a long lasting presence in Washington become in the minds of policymakers and reporters the taken for granted surrogates for these public groups In the face of perennial debates about the relative power of the people and the special interests Grossmann offers an informed and nuanced view of the role of organizations in public representation and American governance *Lobbying for Higher Education* Constance Ewing Cook, 1998 Historically many faculty and administrators in higher education have regarded themselves as above the fray part of the national interest not a special interest and considered lobbying a dirty business unworthy of their lofty enterprise Now that academia no longer enjoys all the respect and good will that federal policy makers once afforded it that attitude has changed The Republican sweep of the 1994 Congressional elections served as a wake up call for the higher education community In response it made a spirited effort to gain attention for its own policy preferences *Lobbying for Higher Education* is about how the major higher education associations and the constituent American colleges and universities try to influence federal policy especially congressional policy In clear prose Cook explains how the higher education community organizes itself in

Washington how it lobbies and how its major interest groups are perceived both by their own members and by public officials The book focuses on the crucial development in 1995 1996 of a new lobbying paradigm which included the greater use of campus based resources and ad hoc coalitions The most engrossing part of its story is higher education s creative response to the policy turmoil and disruption of the status quo that resulted from the shift in congressional party control The author Constance Cook uses sources unique to this project over 1 500 survey responses from college and university presidents a 62% return rate and nearly 150 interviews with institutional and association leaders Fortunately the 1994 electoral upheaval provided her with an opportunity to capture analyze and interpret the responses of her subjects in a period of unusually sweeping change Lobbying for Higher Education is a timely book with an interesting and important story at its core The Politics of Garbage Lawrence S. Luton,2010-11-23 Increased environmental awareness more demands on local governments a newly invigorated citizen activism and a decaying and overburdened infrastructure have made taking care of our garbage one of the major policy making challenges facing local communities Luton uses the case study of Spokane WA to analyze the public administration and socio political context of solid waste policy making Luton s thorough exploration of Spokane s experience as opens a window onto contemporary issues of solid waste management as well as the complex social and political environment in which public administrators must operate His integration of systems theory in the analysis adds to the book s value as a teaching tool for courses on policy making urban planning public administration and the environment He examines the complex combination of ecological political social and relational dynamics that affect such policies providing insight into inter governmental public policy making Lobbying Reconsidered Gary Andres,Paul Hernnson,2015-11-17 Lobbying Reconsidered Politics Under the Influence reveals how lobbying is a complex process that involves more than just relationships friends access favors and influence This book offers a broader perspective on this important dimension of American public policymaking As a person who straddles the worlds of Washington insider and interest group scholar author Gary Andres hopes to use his experience and insight in in the lobbying world to help readers navigate beyond the conventional wisdom and guide them to a deeper broader understanding **From Pride to Influence** Michael Hart,2009-04-30 Recent Canadian foreign policy has fixated upon Canada s former status as a middle power within a small club of western democratic states The emergence of a US dominated world and of an integrated North American economy and the decline of multilateral rules and institutions as prime instruments of global governance have left Canadian foreign policy searching for new purpose and direction From Pride to Influence brings Canadian foreign policy into the twenty first century by grounding it in a conception of the national interest that accepts the primacy of the United States in guaranteeing Canadian national security and prosperity It will appeal to the engaged public practitioners analysts and senior undergraduate and graduate classes focused on Canadian foreign policy Improper Influence Thomas L. Gais,1998-08-27 Presents an original argument regarding the role of money in national politics **The Political Economy of Trade Policy**

Devashish Mitra,2016-03-11 *The Political Economy of Trade Policy Theory Evidence and Applications* is a collection of sole authored and co authored papers by Devashish Mitra that have been published in various scholarly journals over the last two decades It covers diverse topics in the political economy of trade policy ranging from the role of modeling lobby formation in the context of trade policy determination to its applications to the question of unilateralism versus reciprocity and trade agreements It also includes the theory and the empirics of the choice of policy instruments Finally the book presents the empirical investigation of the Grossman Helpman Protection for Sale model as well as the Mayer Median Voter model of trade policy determination

Means, Motives, and Opportunities Christian Breunig,Chris Koski,2024-02-08 *Means Motives and Opportunities* illuminates how states spend public money through the lens of governmental structure executive power and interest group competition Christian Breunig and Chris Koski argue that policymaking is a function of not only policymakers means powers but of their motives issues and opportunities interest group competition for change Using over twenty five years of data across all fifty US states four in depth case studies and multiple examples of budget battles the book describes a budget making environment in which governors must balance the preferences of interest groups with their own all while attempting to build a budget that roughly balances While governors are uniquely powerful the range of changes they can make is largely impacted by interest group competition By showing how means motives and opportunities matter the book shows how spending decisions at the state level influence nearly every aspect of American life

Kindred Strangers David Vogel,2016-10-18 Notwithstanding the myriad forms of government assistance to American business the relationship of business to politics in the United States remains a

highly antagonistic one characterized by substantial mutual distrust This adversarial relationship is both reflected and reinforced not only in American business ideology but also in America's unique legalistic and confrontational style of regulation the political strategies of the public interest movement the American approach to American industrial policy and the distinctive way Americans think about the subject of business ethics This volume brings together more than two decades of scholarship on business and politics by one of the leading authorities on this subject These essays also explore a number of critical contemporary issues including the ongoing debate over the scope and extent of business power in America the growth of shareholder protests and consumer boycotts the changing politics of consumer and environmental regulation and the emergence of both public and business interest in business ethics In addition they place the contemporary dynamics of American business government relations in both an historical and comparative context Finally these essays demonstrate the importance of integrating the study of business by political scientists with the study of politics by students of management Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Imaginative Institution: Planning and Governance in Madrid Michael Neuman, 2016-03-03 Every 20 years since 1920 Madrid has undergone an urban planning cycle in which a city plan was prepared adopted by law and implemented by a new institution This preparation adoption institutionalization sequence along with the institution's structures and procedures have persisted with some exceptions despite frequent upheavals in society The planning institution itself played a lead role in maintaining continuity traumatic history notwithstanding Why and how was this the case Madrid's planners who had mostly trained as architects invented new images for the city and metro region images of urban space that were social constructs the products of planning processes These images were tools that coordinated planning and urban policy In a complex fragmented institutional milieu in which scores of organized interests competed in overlapping policy arenas images were a cohesive force around which plans policies and investments were shaped Planners in Madrid also used their images to build new institutions Images began as city or metropolitan designs or as a metaphor capturing a new vision New political regimes injected their principles and beliefs into the governing institution via images and metaphors These images went a long way in constituting the new institution and in helping realize each regime's goals This empirically based life cycle theory of institutional evolution suggests that the constitutional image sustaining the institution undergoes a change or is replaced by a new image leading to a new or reformed institution A life cycle typology of institutional transformation is formulated with four variables type of change stimulus for change type of constitutional image and outcome of the transformation By linking the life cycle

hypothesis with cognitive theories of image formation and then situating their synthesis within a frame of cognition as a means of structuring the institution this book arrives at a new theory
