Afghanistan The Labyrinth Of Violence:

Afghanistan Amalendu Misra, 2004-05-21 Afghanistan has become synonymous with violence but why is this This book seeks to provide answers to this and other questions It exposes the variables which have contributed to the breakdown of the state and asks whether post war reconstruction could lead to a more peaceful Afghanistan *Nation, Ethnicity and the Conflict in Afghanistan* Raghav Sharma, 2016-07-15 Ethnic and tribal loyalties in Afghanistan provided the lethal cocktail for the violent conflict that engulfed the country following the collapse of the Soviet backed government in 1992 The ensuing fighting between mujahideen groups paved the way for the tectonic social and political shifts which continue to shape events today What accounts for the emergence of ethnicity as the main cause of conflict in Afghanistan What moved people to respond with such fervour and intensity to calls for ethnic solidarity This book attempts to make sense of ethnicity's decisive role in Afghanistan through a comprehensive exploration of its nature and perception Based on new data generated through interviews field notes and participant observations Sharma maps the increased role of ethnicity in Afghan national politics Key social political and historical processes that facilitated its emergence as the pre dominant fault line of conflict are explored moving away from grand political and military narrative to instead engage with zones of conflict as social spaces This book will be of interest to students and scholars working in politics ethnic studies and security studies **A Brief**

History of Afghanistan Shaista Wahab, Barry Youngerman, 2007 Presents the culture and history of Afghanistan from 3 000 B C E to the present day On Beheading Amalendu Misra, 2022-09-08 Beheading is not an uncommon undertaking As a particularized physical violence it has been practiced by all societies and civilizations at some point in their history In fact for millennia public beheadings around the world were routine In contemporary international society some states and many non state actors regularly engage in this undertaking This begs the obvious question why put a human being through this unimaginable cruelty While the idea of execution by decapitation appears visceral and horrific it has always been grounded in cultural religious and political contexts If contemporary history is any proof the enterprise of beheading a fellow human being appears to be making a comeback in certain religious and political landscapes A question of enormous intellectual importance the phenomenon of beheading is understudied There have been many explanations surrounding specific forms of beheading through the ages However no inclusive study has engaged with it in its entirety Primarily a philosophical reflection On Beheading is inter disciplinary in nature it freely cuts across various disciplines within the broad framework of the social sciences It uses a vast array of empirical evidence from anthropology literature jurisprudence and religion to build a discourse and narrative that brings this subject under one intellectual umbrella **Cruel Harvest** Julien

Mercille, 2012-12-09 This book lifts the lid on the reality of Afghanistan's growing drug trade and the role played by the US military in its trajectory Where conventional accounts blame the Taliban for the expansion of drug production *Cruel Harvest* shows that the US shares responsibility by supporting drug lords refusing to adopt effective drug control policies and failing

to crack down on drug money laundered through Western banks Julien Mercille argues that the best way to address drug problems is by reducing demand in consumer countries not by conducting fruitless and damaging counter narcotics missions in Afghanistan

Ethnic Conflict and Terrorism Joseph L. Soeters, 2005-11-16 In the early 1990s a number of violent civil wars and large scale ethnic crises shocked the world In Rwanda Bosnia Chechnya and elsewhere atrocities were committed that led to hundreds of thousands of dead and displaced people Explaining the origins and dynamics of such inhuman actions and events this new sensitive and detailed analysis includes full analysis of the origins of civil wars terrorism and ethnic strife insights drawn from across the social sciences practical and topical illustrations of the information provided fully updated assessments with details of key contemporary events Although the number of these conflicts has diminished over the years the phenomenon has not disappeared in the Sudan the Congo Sierra Leone Liberia Nigeria Afghanistan and Iraq people are still being killed in large numbers without authorities being able to avert or end the hostilities On nine eleven large scale terrorist attacks in Washington and New York shocked the world again and since then other violent events took place in Bali Casablanca Riyadh Moscow Istanbul and Madrid This book of concern to all people because recent history has shown us that such violence can strike everywhere and at any time The final chapter delivers a number of constructive considerations aiming at the development of policies to prevent and stop such conflicts This is an important new contribution to tackling the complex challenges of the twenty first century This book will be of great interest to all students and scholars of contemporary history development studies political and social sciences and International Relations

Terror and Territory Stuart Elden, 2009 Today s global politics demands a new look at the concept of territory From so called deterritorialized terrorist organizations such as al Qaeda to U S led overthrows of existing regimes in the Middle East the relationship between territory and sovereignty is under siege Unfolding an updated understanding of the concept of territory Stuart Elden shows how the contemporary war on terror is part of a widespread challenge to the connection between the state and its territory Although the importance of territory has been disputed under globalization territorial relations have not come to an abrupt end Rather Elden argues the territory sovereignty relation is being reconfigured Traditional geopolitical analysis is transformed into a critical device for interrogating hegemonic geopolitics after the Cold War and is employed in the service of reconsidering discourses of danger that include failed states disconnection and terrorist networks Looking anew at the war on terror the development and application of U S policy the construction and demonization of rogue states events in Lebanon Somalia and Pakistan and the wars continuing in Afghanistan and Iraq **Terror and Territory** demonstrates how a critical geographical analysis informed by political theory and history can offer an urgently needed perspective on world events

New Wars, New Militaries, New Soldiers? Gerhard Kummel, Joseph Soeters, 2012-12-11 New Wars New Militaries New Soldiers

A Century of Crisis and Conflict in the International System Michael Brecher, 2017-07-25 This book is designed to present a fully developed theory of international crisis and conflict along with substantial evidence of these two

closely related phenomena The book begins with a discussion of these topics at a theoretical level defining and elaborating on core concepts international crisis interstate conflict severity and impact This is followed by a discussion of the international system along with two significant illustrations the Berlin Blockade crisis 1948 and the India Pakistan crisis over Kashmir 1965 66 The book then presents a unified model of crisis focusing on the four phases of an international crisis which incorporate the four periods of foreign policy crises for individual states Findings from thirteen conflicts representing six regional clusters are then analyzed concluding with a set of hypotheses and evidence on conflict onset persistence and resolution

Occupational Hazards David M. Edelstein, 2011-07-20 Few would contest that the U S occupation of Iraq is a clear example of just how fraught a military occupation can become In Occupational Hazards David M Edelstein elucidates the occasional successes of military occupations and their more frequent failures Edelstein has identified twenty six cases since 1815 in which an outside power seized control of a territory where the occupying party had no long term claim on sovereignty In a book that has implications for present day policy he draws evidence from such historical cases as well as from four current occupations Bosnia Kosovo Afghanistan and Iraq where the outcome is not yet known Occupation is difficult in Edelstein s view because ambitious goals require considerable time and resources yet both the occupied population and the occupying power want occupation to end quickly and inexpensively in drawn out occupations impatience grows and resources dwindle This combination sabotages the occupying power s ability to accomplish two tasks convince an occupied population to suppress its nationalist desires and sustain its own commitment to the occupation Structural conditions and strategic choices play crucial roles in the success or failure of an occupation In describing those factors Edelstein prescribes a course of action for the future

Easier Said Than Done: Making the Transition Between Combat Operations and Stability Operations ,

Inside Afghanistan Timor Sharan, 2022-09-28 This book maps out how political networks and centres of power engaged in patronage corruption and illegality effectively constituted the Afghan state often with the complicity of the U S led military intervention and the internationally directed statebuilding project It argues that politics and statehood in Afghanistan in particular in the last two decades including the ultimate collapse of the government in August 2021 are best understood in terms of the dynamics of internal political networks through which warlords and patronage networks came to capture and control key sectors within the state and economy including mining banking and illicit drugs as well as elections and political processes Networked politics emerged as the dominant mode of governance that further transformed and consolidated Afghanistan into a networked state with the state institutions and structures functioning as the principal marketplace for political networks bargains and rent seeking The fade of state survival and fragmented political order was a performative act and the book contends sustained through massive international military spending and development aid obscuring the reality of resource redistribution among key networked elites and their supporters Overall the book offers a way to explain what it was that the international community and the Afghan elites in power got so wrong that brought Afghanistan full circle and the Taliban back to power

The Politics and Practice of Religious Diversity

Andrew Dawson, 2016-04-20 The Politics and Practice of Religious Diversity engages with one of the most characteristic features of modern society An increasingly prominent and potentially contentious phenomenon religious diversity is intimately associated with contemporary issues such as migration human rights social cohesion socio cultural pluralisation political jurisdiction globalisation and reactionary belief systems This edited collection of specially commissioned chapters provides an unrivalled geographical coverage and multidisciplinary treatment of the socio political processes and institutional practices provoked by and associated with religious diversity Alongside chapters treating religious diversity in the BRIC countries of Brazil Russia India and China are contributions which discuss Australia Finland Mexico South Africa the UK and

the United States This book provides an accessible distinctive and timely treatment of a topic which is inextricably linked with modern society's progressively diverse and global trajectory Written and structured as an accessible volume for the student reader this book is of immediate interest to both academics and laypersons working in mainstream and political sociology sociology of religion human geography politics area studies migration studies and religious studies *Aid that Works* James Manor, 2007 Research in recent years on aid effectiveness shows that significant obstacles in fragile states insecurity poor governance and weak implementation capacity usually prevent aid from achieving the desired results in these environments This study investigates the attributes and effectiveness of donor supported programmes and projects that worked well under difficult conditions in fragile states Presented in this study are nine development initiatives in six less developed countries Afghanistan Cambodia Mozambique Sierra Leone Timor Leste and Uganda The cases show that development initiatives which engage local communities and local level governments are often able to have significant impact However for more substantial improvements to take place localized gains need to be scaled up either horizontally other localities or vertically to higher levels Given the advantages of working at the local level and the difficulty of working through mainstream bureaucratic agencies at higher levels in these countries donors often prefer to create parallel agencies to reach out to larger numbers of beneficiaries However this may in the long run weaken the legitimacy of mainstream government institutions and donor agencies may therefore choose to work as closely as possible with government officials from the beginning to build trust and demonstrating that new initiatives are non threatening and help prepare the eventual mainstreaming of parallel agencies **South Asia**, 2006 **Afghan Lessons** Fernando Gentilini, 2013-06-28 Fernando Gentilini served nearly two years as the civilian representative of NATO in Afghanistan running a counterinsurgency campaign in the wartorn nation *Afghan Lessons* is the fascinating story of his mission a firsthand view of Afghanistan through a kaleidoscope He explores Afghan history literature tradition and culture to understand some of the most basic questions of Western involvement What is the purpose What does an international presence mean and how can it help Highlights from *Afghan Lessons* This is a book about different worlds different realities The reality of everyday life in an unreal world People that need to be looked after jobs that need to be done a country that needs to be restored all from within the necessary confines of an armed camp And this in the middle of another reality which we do not understand full of things forgotten under decades of war The keys to this reality lie in the past perhaps lost from the Foreword by Robert Cooper To tempt me to explore their country the Afghans kept repeating that there were three different Afghanistans The first is the one you Westerners imagine another coincides with the city of Kabul the third is the country of remote provinces far away from the cities and of the three this is the only real Afghanistan There can be no development without security and no security without development Everyone said it over and over again both the civilians and the military but depending on whether it was said by the former or the latter the emphasis was placed on the first or second part of the slogan In all honesty this seemingly

obvious concept concealed two contrasting ways of seeing things *The Geopsychology Theory of International Relations in the 21st Century* B. M. Jain, 2021-02-15 This book introduces an innovative theoretical construct of geopsychology to navigate the complex dynamics of international politics in the 21st century It explains how geopsychology is different from mainstream international relations theories in terms of primary actors human behavior spatial application instruments and key issues It argues that peace and stability in the troubled parts of the world warrants an imperative need for understanding psychological dispositions of non state actors and authoritarian regimes In *The Geopsychology Theory of International Relations in the 21st Century Escaping the Ignorance Trap* B M Jain unfolds that neither a global hegemon nor a cohort of powers could weaken their resolve and break their morale as proven in the cases of Iraq Afghanistan and North Korea Importantly the regional case studies India and Pakistan in South Asia North Korea and China in Northeast Asia and the U S involvement in the Middle East reveal how the psyche and thought processes of national and regional actors have been the driving force in triggering interstate conflicts and civil wars The book brilliantly illuminates how America became a conscious victim of the ignorance trap in Asia's volatile regions This must book offers easy solutions to complex conflicts to induce a peaceful change in world politics
