After The Crash Architecture In Post Bubble Japan:

After the Crash Thomas Daniell, 2008-09-03 In the late 1980s Japan was awash in seemingly unlimited wealth and rising toward what would be the peak of its modern economic success power and influence In 1991 the same lethal combination of risky loans inflated stocks and real estate speculation that created this bubble economy caused it to burst plunging the country into its worst recession since World War II New Zealand born architect Thomas Daniell arrived in Japan at the dawn of this turbulent decade *After the Crash* is an anthology of essays that draw on firsthand observations of the built environment and architectural culture that emerged from the economically sober post bubble period of the 1990s Daniell uses projects and installations by architects such as Atelier Bow Wow Toyo Ito and the metabolists to illustrate the new relationships forged most of necessity between architecture and society in Japan

Architecture Martin van der Linden,2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic

big things tap into our earliest experiences of the world reigniting our most fundamental feelings about reality In doing so Wittenberg offers a new aesthetics of magnitude and of the special role that bigness plays in our everyday perception of objects and images
