Mielke, 2017-01-22 This monograph aims to provide a unified geometrical foundation of gauge theories of elementary particle physics The underlying geometrical structure is unfolded in a coordinate free manner via the modern mathematical notions of fibre bundles and exterior forms Topics such as the dynamics of Yang Mills theories instanton solutions and topological invariants are included By transferring these concepts to local space time symmetries generalizations of Einstein s theory of gravity arise in a Riemann Cartan space with curvature and torsion It provides the framework in which the broken Poincar gauge theory the Rainich geometrization of the Einstein Maxwell system and higher dimensional non abelian Kaluza Klein theories are developed Since the discovery of the Higgs boson concepts of spontaneous symmetry breaking in gravity have come again into focus and in this revised edition these will be exposed in geometric terms Quantizing gravity remains an open issue formulating it as a de Sitter type gauge theory in the spirit of Yang Mills some new progress in its topological form is presented After symmetry breaking Einstein s standard general relativity with cosmological constant emerges as a classical background The geometrical structure of BRST quantization with non propagating topological ghosts is developed in some detail *Flight Theory and Aerodynamics* Brian A. The Human in Command Carol McCann,Ross Pigeau,2012-12-06 MAJOR GENERAL M K JEFFERY Command and mdeed the human in command has always been key to military operations The complexItty and tempo of modern operations make this statement even more true today than in the past However both the military and the research 2 communities have tended to treat command and control C from a limited per spective For too

long command and control have been considered as if they were a single concept with control often dominating our study. Indeed in many cases we have divorced operational C from the military institution itself resulting in disconnects and inefficiencies. Then in an attempt to overcome these self-inflicted deficiencies we have pursued the Holy Grail of technology hoping that it would solve our C problems. Only now as we start to realize technology's costs and limitations are we looking critically at C. This book attempts to take such a look. The contributions that make up this book are the product of a June 1998 NATO North Atlantic Treaty Organization workshop called The Human in Command. Far from being purely an academic exercise this gathering brought together military leaders and civilian scientists to discuss C's central pragmatic and conceptual issues, its assumptions, its practices, and its organization. Indeed in recent years there has been mounting evidence that both our society and its military institutions are facing organizational crises.

The MOSRP presents a 4-pronged strategy to ensure outbreak and emergency preparedness and timely and effective response to limit the spread of disease and reduce its consequences under the Measles and Rubella Strategic Framework 2021-2030: MRSF coordination, prevention, preparedness, response, and recovery.
