

Aberrant Behavior Checklist

Patient Name: Cruise Elroy

Date Accomplished: April 2, 2022

Instructions: Please rate the child's behavior for the last 4 weeks according to the scale below.

- 0 = Not at all a problem
 1 = The behavior is a problem, but slight in degree
 2 = The problem is moderately serious
 3 = The problem is severe in degree

Please keep the following points in mind:

1. Take relative frequency into account for each behavior specified. For example, if the child averages more temper outbursts than most other children, it's probably moderately serious or severe, even if it occurs only once or twice a week. Other behaviors, such as noncompliance, would probably have to occur more often to merit an extreme rating.
2. Consider how the child behaves with others, not just with you. Try to take the whole picture into account.
3. Try to consider whether a given behavior interferes with the child's development, functioning or relationships.
 - For example body rocking or social withdrawal might not disrupt other people, but it probably hinders individual development or functioning.
4. Do not spend too much time on each item — your first reaction is usually the correct one.
