The Concise Focal Encyclopedia of Photography Michael Peres, 2014-06-20 Defining photography is impossible Revealing it is another matter and that's what The Concise Focal Encyclopedia of Photography does with each turn of the page History The technical origins and evolution of photography are half of the story The other half consists of the ways that cultural forces have transformed photography into a constellation of practices more diverse

than any other mode of representation Photographers can tell a more in depth story through a photo like Dorothea Lange's Migrant Mother than a journalist ever could with the written word alone Major themes and practitioners Over 25 entries many with supporting illustrations examine the figures trends and ideas that have contributed most heavily to the history and current state of photography Contemporary issues The issues influencing photography today are more complex than at any other time in its history Questions of ethics desire perception digitization and commercialization all vie for attention Hear what the experts have to say about crucial issues such as whether or not the images we take today will last the test of time and if so how When material is covered this skillfully concise is no compromise The Concise Focal Encyclopedia of Photography is packed with useful information compelling ideas and best of all pure pleasure Photography: A Critical Introduction Liz Wells, 2015-01-30 Photography A Critical Introduction was the first introductory textbook to examine key debates in photographic theory and place them in their social and political contexts and is now established as one of the leading textbooks in its field Written especially for students in higher education and for introductory college courses this fully revised edition provides a coherent introduction to the nature of photographic seeing Individual chapters cover Key debates in photographic theory and history Documentary photography and photojournalism Personal and popular photography Photography and the human body Photography and commodity culture Photography as art This revised and updated fifth edition includes New case studies on topics such as materialism and embodiment the commodification of human experience and an extended discussion of landscape as genre 98 photographs and images featuring work from Bill Brandt Susan Derges Rineke Dijkstra Fran Herbello Hannah Hoch Karen Knorr Dorothea Lange Chrystel Lebas Susan Meiselas Lee Miller Martin Parr Ingrid Pollard Jacob Riis Alexander Rodchenko Andres Serrano Cindy Sherman and Jeff Wall Fully updated resource information including guides to public archives and useful websites A full glossary of terms and a comprehensive bibliography Contributors Michelle Henning Patricia Holland Derrick Price Anandi Ramamurthy and Liz Wells *The Photograph* Graham Clarke, 1997 In this rich and fascinating work Clarke gives a clear and incisive account of the photograph's historical development elucidating the insights of the most engaging thinkers on the subject including Roland Barthes and Susan Sontag The Photograph offers a series of discussions of major themes and genres providing an up to date introduction to the history of photography 130 illustrations 16 in color Burning with Desire Geoffrey Batchen, 1999-03-15 In an 1828 letter to his partner Nicéphore Niépce Louis Daguerre wrote I am burning with desire to see your experiments from nature In this book Geoffrey Batchen analyzes the desire to photograph as it emerged within the philosophical and scientific milieus that preceded the actual invention of photography Recent accounts of photography's identity tend to divide between the postmodern view that all identity is determined by context and a formalist effort to define the fundamental characteristics of photography as a medium Batchen critiques both approaches by way of a detailed discussion of photography's conception in the late eighteenth and early nineteenth centuries He examines the output of the various

nominees for first photographer then incorporates this information into a mode of historical criticism informed by the work of Michel Foucault and Jacques Derrida The result is a way of thinking about photography that persuasively accords with the medium's undeniable conceptual political and historical complexity [Current Catalog](#) National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965-70 **Jewish Consumer Cultures in Nineteenth and Twentieth-Century Europe and North America** Paul Lerner,Uwe Spiekermann,Anne Schenderlein,2022-01-22 This book investigates the place and meaning of consumption in Jewish lives and the roles Jews played in different consumer cultures in modern Europe and North America Drawing on innovative original research into this new and challenging field the volume brings Jewish studies and the history and theory of consumer culture into dialogue with each other Its chapters explore Jewish businesspeople's development of niche commercial practices in several transnational contexts the imagining marketing and realization of a Jewish national homeland in Palestine through consumer goods and strategies associations between Jews luxury and gender in multiple contexts and the political dimensions of consumer choice Together the essays in this volume show how the study of consumption enriches our understanding of modern Jewish history and how a focus on consumer goods and practices illuminates the study of Jewish religious observance ethnic identities gender formations and immigrant trajectories across the globe **Creating Visual Narratives Through Photography** Mike Davis,2022-12-26

This book provides photographers with the foundation to craft more compelling photos from concept all the way through to creation and distribution on the path to making a living Based on real life practice and experience former National Geographic and White House visual editor Mike Davis takes readers on a journey starting with addressing the motivation behind an image and how this determines the rest of the creative process He goes on to articulate best technical practices to create the narrative through photo composition and what to do with your work after the photos are completed Each section offers exercises for applied learning and a series of appendices cover assignments structures a compilation of critical words and concepts a comprehensive resource guide of organizations competitions grants collectives and agencies book publishers and printers and more This is an ideal resource for students and practitioners alike to gain a more informed understanding of photographic expression and learn how to effectively execute these visions *Night Photography* Lance Keimig,2012-10-02 Night photographers have one big thing in common a true love of the dark Rather than looking at night photography as an extension of daytime shooting with added complications they embrace the unique challenges of nocturnal photography for the tremendous wealth of creative opportunities it offers That's just what this book does But if the idea of setting out into the deep dark night with just your camera and maybe a cup of coffee gets your creative juices flowing dive right in Lance Keimig one of the premier experts on night photography has put together a comprehensive reference that will show you ways to capture images you never thought possible If you have some experience with photography and have always wanted to try shooting at night you'll learn the basics for film or digital shooting If you're already a seasoned pro you'll learn to use

sophisticated techniques such as light painting and drawing stacking images to create long star trails and more A chapter on the history of night photography describes the materials and processes that made night photography possible and introduces the photographers who have defined night photography as an artistic medium A chapter on how to use popular software packages such as Lightroom and Photoshop specifically with night time shots shows you how to make the final adjustments to your nocturnal creations In this book you ll find history theory and lots of practical instruction on technique all illustrated with clear concise examples diagrams and charts that reinforce the text and inspiring color and black and white images from the author and other luminaries in the field including Scott Martin Dan Burkholder Tom Paiva Troy Paiva Christian Waeber Jens Warnecke and Cenci Goepel with Foreword by Steve Harper Copyright Law in Photographic Works Faisal Alamri,2025-07-25 This book presents an original theory of copyright authorship tailored for photographic works grounded in the concepts of categorical intention channelled selection and causation By addressing the unique dual nature of photography where mechanical processes intersect with creative choices it offers a fresh perspective on a longstanding legal challenge Through a critical examination of select case law with a focus on Anglo American law the book highlights the complexities and inconsistencies in the current copyright protection for photographs due to their dual nature which exhibits both mechanical and creative characteristics It argues for moving beyond the conventional one size fits all approach for copyright concepts in favour of adopting a tailored contextual approach that acknowledges the nature and characteristics of the category of work in question The book also alludes to emerging technologies such as artificial intelligence and machine learning models considering their implications for copyright and creative expression It also discusses how the history of copyright protection of photographic works may illuminate the path towards dealing with conflicts between copyright and perceived mechanical mediums of creative expression This book will be of interest to researchers in copyright law and intellectual property law especially those engaged with the legal treatment of mechanically produced creative works It offers valuable insights into the evolving relationship between law technology and authorship in the digital age Landscape as Urbanism Charles Waldheim,2022-03-15 A definitive intellectual history of landscape urbanism It has become conventional to think of urbanism and landscape as opposing one another or to think of landscape as merely providing temporary relief from urban life as shaped by buildings and infrastructure But driven in part by environmental concerns landscape has recently emerged as a model and medium for the city with some theorists arguing that landscape architects are the urbanists of our age In Landscape as Urbanism one of the field s pioneers presents a powerful case for rethinking the city through landscape Charles Waldheim traces the roots of landscape as a form of urbanism from its origins in the Renaissance through the twentieth century Growing out of progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions In the late twentieth and early twenty first centuries as urban

planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project Generously illustrated Landscape as Urbanism examines works from around the world by designers ranging from Ludwig Hilberseimer Andrea Branzi and Frank Lloyd Wright to James Corner Adriaan Geuze and Michael Van Valkenburgh The result is the definitive account of an emerging field that is likely to influence the design of cities for decades to come Booker T. Washington and the Art of Self-representation Michael Bieze, 2008 This series explores the history of schools and schooling in the United States and other countries The series will examine the historical development of schools and educational processes with special emphasis on issues of educational policy curriculum and pedagogy as well as issues relating to race class gender and ethnicity Special emphasis will be placed on the lessons to be learned from the past for contemporary educational reform and policy Although the series will publish books related to education in the broadest societal and cultural context it especially seeks books on the history of specific schools and on the lives of educational leaders and school founders
