Roadways for People Lynn Peterson, Elizabeth Doerr, 2022-12-06 Seventy years of a car only approach not car centric it s car only is actually not just non driver hostile it s driver hostile No one benefits Beth Osborne Director Transportation for America The car only approach in transportation planning and engineering has led to the construction of roadways that have torn apart and devalued communities especially Black and Brown communities Forging a new path to repair this damage requires a community solutions based approach to planning designing and building our roadways When Lynn Peterson began working as a transportation engineer she was taught to evaluate roadway projects based only on metrics related to driver safety allowable

speed for the highest number of cars project schedule and budget Involving the community and collaborating with peers were never part of the discussion Today Peterson is a recognized leader in transportation planning and engineering known for her approach that is rooted in racial equity guided by a process of community engagement and includes collaboration with other professionals In *Roadways for People* Lynn Peterson draws from her personal experience and interviews with leaders in the field to showcase new possibilities within transportation engineering and planning She incorporated a community solutions based approach in her work at Metro TriMet and while running the Washington State Department of Transportation where she played an instrumental role in the largest transportation bill in that state s history The community solutions based approach moves away from the narrow standards of traditional transportation design and focuses instead on a process that involves consistent feedback learning loops and meaningful and regular community engagement This approach seeks to address the transportation needs of the most historically marginalized members of the community *Roadways for People* is written to empower professionals and policymakers to create transportation solutions that serve people rather than cars Examples across the U S from Portland Oregon to Baltimore Maryland show what is possible with a community centered approach As traditional highway expansions are put on pause around the country professionals and policymakers have an opportunity to move forward with a better approach Peterson shows them how
