Aces Of The Luftwaffe Germanys Greatest Pilots:

Luftwaffe Fighter Aces Mike Spick, 2021-10-19 Get in the cockpit with some of the greatest German flying aces of all time In this exciting book Mike Spick shows how the Luftwaffe s leading fighter pilots were able to outscore their allied counterparts so effectively and completely during World War II When the records of the Jagdflieger pilots became available after the war they were initially greeted with incredulity the highest claim was for 352 kills and more than one hundred pilots had recorded more than one hundred victories However post war research proved that these claims had in fact been made in good faith and confirmation had only been given after rigorous checking To discover the secret of this success aviation history expert Mike Spick examines the exploits of these aces and sets out the context in which they took place Every major theatre is covered in detail including the conditions peculiar to each climate relative numerical and qualitative strengths the presence or absence of radar and other measures and the relative merits of the planes being flown He focuses on the methods and tactics used by individual aces and uses first hand sources wherever possible to put the reader right alongside the pilot in the cockpit

German Flying Aces Arthur Williams, When the Great War erupted across Europe in 1914 military aviation was still in its infancy The first powered flight had occurred barely eleven years earlier and most military leaders viewed aircraft as curiosities better suited for reconnaissance than combat Yet within months of the conflict s outbreak the skies above the Western Front would become a deadly arena where young men battled for supremacy in fragile machines of wood wire and canvas Germany entered the war with a modest aviation force possessing fewer than 250 military aircraft scattered across various units The German Air Service or Deutsche Luftstreitkr fte initially focused on observation and artillery spotting with pilots and observers working to direct ground fire and gather intelligence on enemy positions These early aviators flew unarmed their greatest weapon being a camera and their most pressing concern avoiding enemy ground fire The transformation from reconnaissance to combat occurred gradually born from the practical needs of warfare As opposing observation aircraft began interfering with each other s missions pilots started carrying rifles pistols and even hand grenades to discourage enemy flyers The first aerial victories were often crude affairs with pilots taking potshots at each other while struggling to control their aircraft The inherent difficulties of aiming a rifle while piloting a primitive aircraft made these early encounters more dangerous to the shooter than the target

The Jet Race and the Second World War S. Mike Pavelec,2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for

speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle s engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged throughout the war only rising to technological prominence on the ashes of the German defeat Pavelec s analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport **Untold Valor** Rob Morris,2006 First hand accounts of Europe s air war from those who beat the odds
