

ACS Standardized Final Exam Review Suggestions

This is by no means a comprehensive list of topics to study. I simply went through the ACS Study Guide and identified topics that have been covered throughout the semester and should therefore be reviewed. If you find any major conflicts in this list please let me know. This is meant to help you find areas you need to focus on the most. The best advice for studying for the final is PRACTICE. I would also suggest not writing directly in your study guide so that you can go over it multiple times without the answers already being there. Additionally, you will be reusing this guide for the comprehensive Organic Chemistry II Final Exam next semester.
