Gender-Responsive Governance in Sierra Leone John Idriss Lahai, 2023-07-28 This book investigates gender equality

and women's empowerment in Sierra Leone focusing especially on women's interactions with the state and its development partners. In particular, it highlights women's increasing agency in acquiring knowledge, diffusing power, engaging in grassroots politics, and compelling the government to adopt more gender-responsive policies. Exploiting extensive fieldwork and original multidisciplinary research methods, including econometric and statistical models, the book first sets out the history and impact of inequality in Sierra Leone and then goes on to shed light on the constructive and collaborative engagement of women and the state on a variety of local and external strategies for promoting gender equality. Drawing throughout on insights from across gender studies, sociology, anthropology, economics, and political science, the book highlights how women are succeeding in transforming marginality into agency in order to build a platform for influencing change. By qualifying and quantifying the challenges of gender inequality in Sierra Leone and the progress that is being made, this book provides important insights that will be relevant to other fragile post-conflict states within Africa. The book will be of interest to students and researchers studying women and gender studies, African studies, economics, international development, sociology, and political science, and international relations. It will also deepen policymakers and practitioners' understanding of women's diverse trajectories and experiences and how the typology of government affects the patterns of inequality and equality.

Nuclear Science Abstracts, 1975 Gendering Walter Scott C.M.

Jackson-Houlston, 2017-04-21. Employing gender as a unifying critical focus, Caroline Jackson Houlston draws on the full range of Walter Scott's novels to propose new links between Scott and Romantic era authors such as Sophia Lee, Jane Porter, Jane Austen, Sydney Owenson, Elizabeth Hands, Thomas Love Peacock, and Robert Bage. In Scott, Jackson Houlston suggests sex and violence are united in a central feature of the genre of romance: the trope of raptus, the actual or threatened kidnapping of a woman and her subjection to physical or psychic violence. Though largely favouring the Romantic period, drive towards delicacy of subject matter and expression, Scott also exhibited a residual sympathy for frankness and openness resisted by his publishers, especially towards the end of his career when he increasingly used the freedoms inherent in romance as a mode of narrative to explore and critique gender assumptions. Thus, while Scott's novels inherit a tradition of chivalric protectiveness towards women, they both exploit and challenge the assumption that a woman is always essentially definable as a potential sexual victim. Moreover, he consistently condemns the aggressive male violence characteristic of older models of the hero in favour of restraint and domesticity that are not exclusively feminine but compatible with the Scottish Enlightenment assumptions of his upbringing. A high proportion of Scott's female characters are consistently more rational than their male counterparts, illustrating how he plays conflicting concepts of sexual difference off against one another. Jackson Houlston illuminates Scott's ambivalent reliance on the attractions of sex and violence, demonstrating how they enable the interrogation of gender convention throughout his fiction.
