The Next Big Thing Trends Shaping Nordic Innovation is written for people interested in and working with the issues of innovation economic development globalisation and climate change and how these issues impact on companies and industries and in national or in international settings such as Nordic co operation or the European Union The book argues that innovation needs to be measured and managed Innovation needs to be developed as a serious management discipline in order to deliver on the future expectations of investors whether these investors are from private companies or public government agencies The publication also argues that there is a need to emphasise that research is not the same as innovation and that we need to distinguish between science and the scientific method in order to develop better innovation policies and innovation management techniques In the final focus chapter on climate change the book states that the Nordic region has a strong position within some of the new energy and environment industries Yet in order to keep that position and to stay in the global vanguard of clean technologies and climate industries it might be necessary for the Nordic countries to experiment with what the authors call forced innovation The book is relevant for industry branch organisations company managers policy makers public policy professionals as well as graduate and undergraduate courses in management innovation entrepreneurship globalisation and climate change      Patterns of Course Offerings and Enrollments in Public Secondary Schools, 1970-71 United States.
