The Public Wealth of Cities Dag Detter, Stefan Folster, 2017-07-18 How to leverage existing resources to meet the current and future needs of cities Crumbling streets and bridges Poorly performing schools and inadequate social services These are common complaints in cities which too often struggle just to keep the lights on much less make the long term investments necessary for future generations It doesn't have to be this way This book by

two internationally recognized experts in public finance describes a new way of restoring economic vitality and financial stability to cities using steps that already have been proven remarkably successful The key is unlocking social human and economic wealth that cities already own but is out of sight or hidden A focus on existing public wealth helps to shift attention and resources from short term spending to longer term investments that can vastly raise the quality of life for many generations of urban residents A crucial first step is to understand a city s balance sheet too few cities comprehend how valuable a working tool this can be With this in hand taxpayers politicians and investors can better recognize the long term consequences of political decisions and make choices that mobilize real returns rather than rely on more taxes debt or austerity Another hidden asset is real estate Even poor cities own large swathes of poorly utilized land or they control underperforming utilities and other commercial assets Most cities could more than double their investments with smarter use of these commercial assets Managing the city s assets smartly through the authors proposed Urban Wealth Funds at arm s length from short term political influence will enable cities to ramp up much needed infrastructure investments

International Journal of Health Services ,1998 **Enabling Participatory Planning** Gavin Parker,Emma Street,2018-03-28 This book examines the challenges in delivering a participatory planning agenda in the face of an increasingly neoliberalised planning system and charts the experience of Planning Aid England In an age of austerity government spending cuts privatisation and rising inequalities the need to support and include the most vulnerable in society is more acute than ever However forms of Advocacy Planning the progressive concept championed for this purpose since the 1960s is under threat from neoliberalisation Rather than abandoning advocacy the book asserts that only through sustained critical engagement will issues of exclusion be positively tackled and addressed The authors propose neo advocacy planning as the critical lens through which to effect positive change This they argue will need to draw on a co production model maintained through a well resourced special purpose organisation set up to mobilise and resource planning intermediaries whose role it is to activate support and educate those without the resources to secure such advocacy themselves **Social Sciences Index** ,1997 **Study and Master Geography Grade 11 CAPS Study Guide** Helen Collett,Norma C.
