The Routledge Handbook on Crime and International Migration Sharon Pickering, Julie Ham, 2017-07-14 The Routledge Handbook on Crime and International Migration is concerned with the various relationships between migration crime and victimization that have informed a wide criminological scholarship often driven by some of the original lines of inquiry of the Chicago School. Historically migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity often in highly problematic ways. However in the contemporary period this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants. The Routledge Handbook on Crime and International Migration is also concerned with the theoretical, empirical and policy knots found in the relationship between regular and irregular migration, offending and victimization, the processes and impact of criminalization and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders. The Handbook is focused on the migratory fault lines between the Global North and Global South which have produced new or accelerated sites of state control, constructed irregular migration as a crime and security problem and mobilized ideological and coercive powers usually reserved for criminal or military threats. Offering a strong international focus and comprehensive coverage of a wide range of border, criminal justice and migration related issues, this book is an important contribution to criminology and migration studies and will be essential reading for academics, students and practitioners interested in this field.

Nothing Personal? Nick Gill, 2016-02-23 In this groundbreaking new study Nick Gill provides a conceptually innovative account of the ways in which indifference to the desperation and hardship faced by thousands of migrants fleeing persecution and exploitation comes about. Features original unpublished empirical material from four Economic and Social Research Council ESRC funded projects. Challenges the consensus that border controls are necessary or desirable in contemporary society. Demonstrates how immigration decision makers are immersed in a suffocating web of institutionalized processes that greatly hinder their objectivity and limit their access to alternative perspectives. Theoretically informed throughout drawing on the work of a range of social theorists including Max Weber, Zygmunt Bauman, Emmanuel Levinas and Georg Simmel.

A Global Idea Mayssoun Sukarieh, 2023-08-15 *A Global Idea* outlines how youth, as shown by the Arab Spring uprisings and subsequent state responses, became a prominent social and political category during the first two decades of the twenty-first century in the Middle East. Drawing on ethnographic fieldwork, interview data and textual analysis, Mayssoun Sukarieh explains that the spread of youth as an important category is linked to the operation of a global youth development complex, a diverse transnational network of state, private sector, civil society and international development aid organizations that worked through key urban areas such as Washington DC, Amman and Dubai. In its analysis of the arrival, extension and embedding of the youth development complex in the Middle East during this period, A

Global Idea addresses a broader question that is of global and not just regional concern How are certain ideas that are central to the working and reproduction of global capitalism able to travel the world so that they are found virtually everywhere

The Meritocracy Trap Daniel Markovits,2019-09-10 This book flips your world upside down Daniel Markovits argues that meritocracy isn't a virtuous efficient system that rewards the best and brightest Instead it rewards middle class families who can afford huge investments in their children's education Frightening eye opening stuff The Times Books of the Year Even in the midst of runaway economic inequality and dangerous social division it remains an axiom of modern life that meritocracy reigns supreme and promises to open opportunity to all The idea that reward should follow ability and effort is so entrenched in our psyche that even as society divides itself at almost every turn all sides can be heard repeating meritocratic notions Meritocracy cuts to the heart of who we think we are But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that The Meritocracy Trap prosecutes with rare force comprehensive research and devastating persuasion Daniel Markovits a law professor trained in philosophy and economics is better placed than most to puncture one of the dominant ideas of our age Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within as well as how we can take the first steps towards a world that might afford us both prosperity and dignity

Structuring Inequality Tracy L. Steffes,2024-04-02 How inequality was forged fought over and forgotten through public policy in metropolitan Chicago As in many American metropolitan areas inequality in Chicagoland is visible in its neighborhoods These inequalities are not inevitable however They have been constructed and deepened by public policies around housing schooling taxation and local governance including hidden state government policies In Structuring Inequality historian Tracy L Steffes shows how metropolitan inequality in Chicagoland was structured contested and naturalized over time even as reformers tried to change it through school desegregation affordable housing and property tax reform While these efforts had modest successes in the city and the suburbs reformers faced significant resistance and counter mobilization from affluent suburbanites real estate developers and other defenders of the status quo who defended inequality and reshaped the policy conversation about it Grounded in comprehensive archival research and policy analysis Structuring Inequality examines the history of Chicagoland's established systems of inequality and provides perspective on the inequality we live with today

reform despite increases in child care funding there was little growth in New York's unionized center-based child care system and no attempt to make this system more responsive to the needs of working mothers. As the city delivered child care services on the cheap, relying on non-union home child care providers, welfare rights organizations, community legal clinics, child care advocates, low-income community groups, activist mothers, and labor unions organized to demand fair solutions to the child care crisis that addressed poor single mothers' need for quality, affordable child care, as well as child care providers' need for decent work and pay. Social Reproduction and the City tells this story, linking welfare reform to feminist research and activism around the crisis of care, social reproduction, and the neoliberal city. At a theoretical level, Simon Black's history of this era presents a feminist political economy of the urban welfare regime, applying a social reproduction lens to processes of urban neoliberalization and an urban lens to feminist analyses of welfare state restructuring and resistance. Feminist political economy and feminist welfare state scholarship have not focused on the urban as a scale of analysis, and critical approaches to urban neoliberalism often fail to address questions of social reproduction. To address these unexplored areas, Black unpacks the urban as a contested site of welfare state restructuring and examines the escalating crisis in social reproduction. He lays bare the aftermath of the welfare-to-work agenda of the Giuliani administration in New York City on child care and the resistance to policies that deepened race, class, and gender inequities.

The Rise and Rise of Illegal Ticket Touting Alessandro Moretti, 2023-02-10 This book presents an ethnographic study of contemporary ticket touts in the UK. Despite the recent interest in the topic of black market ticket sales, media coverage and parliamentary interventions over the last ten years have revealed a widespread lack of knowledge with regard to the phenomenon of touting and the players engaging in the practice. *The Rise and Rise of Illegal Ticket Touting* sheds light on the world of touting and delivers an authentic picture of the individuals involved, of their methods, values, and motivations for performing ticket touting as an organized entrepreneurial deviant activity. The touts' varied methods of buying and selling tickets, the hierarchical structures and strict ethos of their criminal organizations, and their specific *modi operandi* for evading detection and arrest, both on the streets and online, are focal points of the study. Of equal importance are the touts' attitudes, perceptions, and adaptations to, or outright dismissal of, society's legal and moral frameworks. This book illuminates why historic and renewed attempts to challenge ticket touting have been unsuccessful, focusing on inadequate legislation, a lack of enforcement, and the widespread corruption and exploitable loopholes that exist within the official primary ticket market. An accessible and compelling read, *The Rise and Rise of Illegal Ticket Touting* will appeal to students and scholars of criminology, sociology, social policy, policing, and all those with an interest in live music and sport, and the hidden practices that lurk beneath the surface.

Congressional Record United States. Congress, 2017-10-24 *Chasing Archipelagic Dreams* David R. Saunders, 2024-12-15 In *Chasing Archipelagic Dreams*, David R. Saunders demonstrates that the withdrawal of the British imperial state from Sabah did not result in the decolonization of the territory. From the late 1940s to the 1960s, international

anti colonialism interacted with regional competition over Sabah to result in a paradoxical increase of British power and influence on the ground Meanwhile ethnic social and political heterogeneity in Sabah contributed to fragmentation and disunity undermining the development of a local anti colonial movement Instead a class of influential local elites seized power as competing attempts by the Philippines Indonesia and Malaya to incorporate the territory into their respective archipelagic spheres grew in strength Due to these local and international rivalries Saunders argues Sabah s eventual merger with the Federation of Malaysia in 1963 prompted an extension of colonial style rule resource extraction the suppression of local autonomy and the imposition of an externally configured national identity Chasing Archipelagic Dreams underscores the significance of regional rivalries in the South China Sea and highlights the fate of subaltern communities bisected by post colonial borders

Bicycle Justice and Urban Transformation Aaron Golub, Melody L. Hoffmann, Adonia E. Lugo, Gerardo F. Sandoval, 2016-07-15 As bicycle commuting grows in the United States the profile of the white middle class cyclist has emerged This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations However despite stereotypes the cycling public is actually quite diverse with the greatest share falling into the lowest income categories Bicycle Justice and Urban Transformation demonstrates that for those with privilege bicycling can be liberatory a lifestyle choice whereas for those surviving at the margins cycling is not a choice but an often oppressive necessity Ignoring these invisible cyclists skews bicycle improvements towards those with choices This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably Bicycle justice is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter This book illustrates equitable bicycle advocacy policy and planning In synthesizing the projects of critical cultural studies transportation justice and planning the book reveals the relevance of social justice to public and community driven investments in cycling This book will interest professionals advocates academics and students in the fields of transportation planning urban planning community development urban geography sociology and policy
