Handbook of Thermometry and Nanothermometry Svyatoslav Yatsyshyn, 2015 **Pathologies of Climate Governance** Paul G. Harris, 2021-02-25 Earth's climate is in crisis. Climate governance has failed. This book diagnoses climate governance as if it were a sick patient, uncovering the fundamental factors causing the worsening climate crisis. It distills decades of global climate negotiations to reveal the features of international relations that are impeding climate action and it identifies political obstacles to climate governance across a variety of countries in the Americas, Asia, and Europe. The psychosocial aspects of climate change are explored to show how human nature, overconsumption, and global capitalism conspire to stymie climate action. Remedies are suggested for how to overcome hurdles to effective climate governance internationally and nationally, with ideas provided for individuals to help them align their own interests with those of the global environment. Covering all of the major recent events in climate politics and governance, this is an accessible book for concerned readers who want to understand the climate crisis. Iran: Status of the P5+1 Negotiations with Iran United States. Congress. Senate. Committee on Foreign Relations, 2015 Soviet Physics, Solid State, 1991 **New Millennium Solar Physics** Markus J. Aschwanden, 2019-05-22 This is a follow-on book to the introductory textbook *Physics of the Solar Corona* previously published in 2004 by the same author, which provided a systematic introduction and covered mostly scientific results from the pre-2000 era. Using a similar structure as the previous book, the second volume provides a seamless continuation of numerous novel research results in solar physics that emerged in the new millennium after 2000 from the new solar missions of RHESSI, STEREO, Hinode, CORONAS, and the Solar Dynamics Observatory (SDO) during the era of 2000–2018. The new solar space missions are characterized by unprecedented high-resolution imaging, time-resolution, spectral capabilities, stereoscopy, and tomography, which reveal the intricate dynamics of magneto-hydrodynamic processes in the solar corona down to scales of 100 km. The enormous amount of data streaming down from SDO in Terabytes per day requires advanced automated data processing methods. The book focuses exclusively on new research results after 2000, which are reviewed in a comprehensive manner, documented by over 3600 literature references covering theory, observations, and numerical modeling of basic physical processes that are observed in high-temperature plasmas of the Sun and other astrophysical objects, such as plasma instabilities, coronal heating, magnetic reconnection processes, coronal mass ejections, plasma waves, and oscillations, or particle acceleration. **The Ocean Economy in 2030** OECD, 2016-04-27 This report explores the growth prospects for the ocean economy, its capacity for future employment creation and innovation, and its role in addressing global challenges. Special attention is devoted to the emerging ocean-based industries. **Business and Post-disaster Management** C. Michael Hall, Sanna Malinen, Rob Vosslander, Russell Wordsworth, 2016-01-29 This book provides a comprehensive examination of the effects of a natural disaster on businesses and organisations and on a range of stakeholders, including employees and consumers. Research on how communities and businesses respond to disasters can

inform policy and mitigate the cost and impacts of future disasters This book discusses how places recover following a disaster and the vital roles that business and other organisations play This volume gives a detailed understanding of business organisational and consumer responses to the Christchurch earthquake sequence of 2010 2011 which caused 185 deaths the loss of over 70 per cent of buildings in the city s CBD major infrastructure damage and severely affected the city s image Despite the devastation the businesses organisations and people of Christchurch are now undergoing significant recovery The book sheds significant new light not only on business and organisation response to disaster but on how business and urban systems may be made more resilient *Evidence-based science communication in the COVID-19 era* Eric A.

Globalization Development and Social Justice Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World

Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies
