Grade 11 Economics Papar 1 Final Exam 2014:

The effect of land inheritance on youth employment and migration decisions: Evidence from rural Ethiopia

Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2017-03-28 In Ethiopia there are two binding forces push and pull that deserve attention when it comes to youth occupational and spatial mobility choices and the national land use and transfer policy On the one hand the fact that the land rental market in Ethiopia is supply constrained due to market and policy distortions marginalizes youth and serves as a push factor leading them to look elsewhere for a livelihood strategy On the other hand the regulatory conditions and restrictions attached to land use and inheritance rights may serve as a pull factor and force youth to be tied to the rural and or farming sector Our study thus aims to explore how youth land access both inheritance and market based affects their migration and employment decisions We explore this question in the context of rural Ethiopia using panel data from 2010 and 2014 We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower likelihood of employment in the nonagricultural sector Conversely the decision to attend school is unaffected These results appear to be most heavily driven by males and by the older half of our youth sample We also find several mediating factors matter Land inheritance plays a much more pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from major urban centers Overall the results reaffirm the notion that push factors dominate pull factors in dictating occupational and migration decisions in Ethiopia and highlight youth preferences to use migration or non agricultural employment as a last resort after exhausting other means of accessing land such as temporary land rental

Burnt by Democracy Jacqueline Kennelly, 2023-11-30 Burnt by Democracy traces the political ascendance of neoliberalism and its effects on youth The book explores democracy and citizenship as described in interviews with over forty young people ages 16 to 30 who have either experienced homelessness or identify as an activist living in five liberal democracies Canada Australia New Zealand the United States and the United Kingdom Highlighting significant cuts to social and affordable housing astronomical increases in the costs of higher education and the transformation and erosion of state benefits systems Jacqueline Kennelly argues that democracy's decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties Rather it is because of collective misunderstanding about how democracy is actually structured how individuals learn to participate and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions Against a vivid and often heart breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever expanding state retrenchment and inequality Burnt by Democracy makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing

field for all **Economic Growth and the Middle Class in an Economy in Transition** Zoya Nissanov, 2017-01-24 This book studies the evolution of the middle class in Russia after the fall of the Soviet Union Using data from the RLMS Russian Longitudinal Monitoring Survey the volume covers the period of transition 1991 2008 during which many fundamental economic reforms were implemented The first part of the book is devoted to a discussion of the concept of middle class and a description of the economic situation in Russia during the transition period Particular attention is given to variations in the distribution of Russian incomes and the estimated importance of the middle class The second part of the book focuses on the link between the middle class and income bipolarization The third and last section of the book uses the semiparametric mixture model to discover how many different groups may be derived from the income distribution in Russia as well as what the main socio economic and demographic characteristics of those groups are The mobility of households into and out of the middle class during the transition period is also studied in hopes of determining the factors that contribute to such mobility Using rigorous empirical methods this volume sheds light on a relatively unstudied economic group and provides insight for countries which are about to enter a transition period As such this book will be of great interest to researchers in economics and inequality as well as professionals and practitioners working with international organizations Handbook of Contemporary Education Economics Geraint Johnes, Jill Johnes, Tommaso Agasisti, Laura López-Torres, 2017-12-29 This Handbook provides a comprehensive overview of the modern economics of education literature bringing together a series of original contributions by globally renowned experts in their fields Covering a wide variety of topics each chapter assesses the most recent research with an emphasis on skills evaluation and data analytics Governance and sector outcomes Anna Wetterberg, Derick W. Brinkerhoff, 2018-09-27 A critical issue in international development is how donor funded programs can support sustainable and long lasting changes in assisted countries Among the factors associated with sustainability is improved governance However many donor funded initiatives are focused on achieving results in specific sectors such as health education and agriculture How can how governance interventions contribute to achieving sector specific results This brief explores this question and discusses how international development practice has incorporated recognition of the links between governance and sector outcomes The brief develops a stylized continuum of how governance elements relate to sector interventions and contribute to expected outcomes We discuss factors that either impede or impel governance integration and close with some observations regarding prospects for integrated programming The audience for the brief is the international development policy and practitioner communities and secondarily academics with an interest in the topic Key take aways include 1 there is ample evidence of positive contributions from improved governance to sector specific outcomes but few guideposts exist for practical and effective governance integration 2 barriers to integration include urgent sector priorities that overshadow governance concerns requirements to demonstrate progress towards ambitious sector targets and complex choices related to measurement and 3 sustainability and self reliance are major drivers for integration

and are facilitated by the flexibility and adaptation that governance integration enables *The Politics of Education in Developing Countries* Samuel Hickey, Naomi Hossain, 2019 This book focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries It deploys a new conceptual framework to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes

How Global Currencies Work Barry Eichengreen, Arnaud Mehl, Livia Chitu, 2019-02-26 A powerful new understanding of global currency trends including the rise of the Chinese yuan At first glance the history of the modern global economy seems to support the long held view that the currency of the world's leading power invariably dominates

international trade and finance But in *How Global Currencies Work* three noted economists overturn this conventional wisdom Offering a new history of global finance over the past two centuries and marshaling extensive new data to test current theories of how global currencies work the authors show that several national monies can share international currency status and that their importance can change rapidly They demonstrate how changes in technology and international trade and finance have reshaped the landscape of international currencies so that several international financial standards can coexist In fact they show that multiple international and reserve currencies have coexisted in the past upending the traditional view of the British pound's dominance before 1945 and the U S dollar's postwar dominance Looking forward the book tackles the implications of this new framework for major questions facing the future of the international monetary system including how increased currency competition might affect global financial stability

Linking smallholder farmers to commercial markets Ebata, Ayako,Hernandez, Manuel A.,2016-07-01 Access to modern commercialization channels is key for smallholder farmers to be able to move away from subsistence farming and overcome poverty However achieving that goal is challenging for smallholders given their lack of appropriate managerial practices production technology and infrastructure This paper examines the effect of receiving training in two different entrepreneurial practices designed to link farmers to commercial markets one direct aimed at the individual and farmer

association level and another indirect focused at the community level We exploit an extensive panel dataset of staple bean farmers in Nicaragua who participated in a program run by a nongovernmental organization between 2007 2012 We find that the two market linkage training activities had opposite effects on the commercialization of beans especially on the intensive margin or volume of sales While receiving direct training on entrepreneurial practices is positively associated with sales in commercial markets training on municipality engagement ME activities is negatively associated The market linkage activities mainly affected entrant farmers as opposed to those already participating in commercial markets We further find varying effects of the ME activities by plot size and leadership position Additional results show that training activities that appear to work for bean producers do not necessarily work for other crop producers and vice versa
