Future Bryn Jones,1997-06-26 Is computerised production transforming work roles as recent debates about flexible
 specialisation and post Fordist manufacturing suggest This book focuses on the key case of metalworking batch production in
 Britain Italy Japan and the USA Looking at technological political and social developments from a comparative perspective it
 suggests that comprehensive factory principles never fully replaced workshop organisation Drawing on empirical case
 studies of flexible manufacturing systems Bryn Jones offers a new distinction between the bureaucratic bias of Taylorism and
 the product standardisation approach of Fordism and questions whether computerised production is transcending Fordism
 Instead of the often predicted models of deskilled centrally controlled work or a decentralised craft renaissance he shows a
 greater likelihood of national variations between factory and workshop principles continuing into the contemporary age of
 computerisation **Model Railroad Craftsman** ,1986 InfoWorld ,1988-01-04 InfoWorld is targeted to Senior IT
