Experiencing Other Minds in the Courtroom Neal Feigenson, 2016-12-26 Increasingly in America s courtrooms lawyers litigants and expert witnesses attempt to recreate what it s like to be inside the litigant s mind But is it really possible to claim this perception as evidence Is seeing really believing Can anyone really know what it s like to have another person s perceptual experiences when only that person has direct access to them And why should courts ever admit visual or auditory evidence that purports to convey what another person s consciousness is like How might these simulations affect the ways that judges and jurors do justice Experiencing Other Minds thoughtful explores this evidentiary and cognitive terrain Whether a simulation actually provides reliable knowledge about the other person s inner experience depends on the strength of our grounds for believing in it And that depends largely on how the simulation was made Primarily a descriptive and analytic work Experiencing Other Minds conducts a legal anthropological inquiry into a novel and distinctive evidentiary practice situating each example of digitally simulated subjective perception in its case context and drawing on cognitive

psychology media studies science and technology studies and other disciplines to understand how each simulation produces specific epistemological and rhetorical effects By paying closer attention to the different kinds of simulation and the different knowledge claims they offer we can develop best practices for responsibly incorporating such evidence in the courtroom and thereby improve the quality of justice as well     Mergent Bank & Finance Manual ,2002     **Biomechatronics** Marko B.
