Behavioral Investment Management: An Efficient Alternative to Modern Portfolio Theory Greg B. Davies, Arnaud de Servigny, 2012-01-12 The End of Modern Portfolio Theory Behavioral Investment Management proves what many have been thinking since the global economic downturn Modern Portfolio Theory (MPT) is no longer a viable portfolio management strategy. Inherently flawed and based largely on ideology, MPT can not be relied upon in modern markets. Behavioral Investment Management offers a new approach that addresses certain realities that MPT ignores, including the fact that emotions play a major role in investing. The authors lay out new standards reflecting behavioral finance and dynamic asset allocation, then explain how to apply these standards to your current portfolio construction efforts. They explain how to move away from the idealized black and white world of MPT and into the real world of investing, placing heavy emphasis on the importance of mastering emotions. Behavioral Investment Management provides a portfolio management standard for an investing world in disarray.
