Seifert, Benoît F. Leleux, Christopher L. Tucci, 2008-01-25 Few would deny that small entrepreneurial firms play an important economic and social role Not only do they generate a significant number of jobs but they also contribute a large proportion of gross national product GNP Not all small firms qualify as entrepreneurial entities however While small refers mostly to size entrepreneurial refers to growth and a value creation orientation The vast majority of small firms have no growth aspirations nor do they have the means and skills to grow As such they may still provide employment and local value but would not embrace the high potential aspirations of entrepreneurial ventures This book clearly addresses those entrepreneurs who are interested in leading high growth potential companies Table 1 Table 1 Growth Typology of Small Firms 1 Type of venture Desired sales range Future employees Lifestyle 0 to 1 million 0 to 4 Smaller high potential 1 million to 20 million 5 to 50 High potential over 20 million Over 50 High innovation technology based startups assume a very special role in high growth entrepreneurship Although these startups constitute a comparatively low number of small businesses they produce proportionately far more jobs than their low and medium innovation counterparts The aim of achieving rapid growth is typically referred to as high expectation entrepreneurship An area of major concern to us is a fact revealed in the latest GEM report The rate of European high expectation entrepreneurial activity is among the lowest in the world **The Life Cycle of Entrepreneurial Ventures** Simon Parker, 2006-12-26 about nascent entrepreneurship distilled from recent research Wagner first summarises evidence about the incidence of nascent entrepreneurship before surveying the start up activities of nascent entrepreneurs He then goes on to provide a birds eye view of the characteristics of nascent entrepreneurs the factors associated with becoming a nascent entrepreneur and the outcomes of nascent entrepreneurs in terms of whether they start quit or continue preparing for eventual business entry Wagner's chapter provides a wealth of information about nascent entrepreneurship summarising key findings from a large and growing and diverse literature which looks set to continue growing rapidly in the years ahead In Chapter 3 Shaker Zahra reviews the literature on new venture strategy and its implications for organizational survival financial performance and growth Zahra discusses competitive cooperative and political strategies and highlights the importance of synchronizing these strategies A particular strength of this chapter is its ability to uncover similarities and unifying themes in apparently divergent views In this way the chapter succeeds in resolving some apparent contradictions by putting the different perspectives into a complementary context and identifying areas where convergence appears to be

within reach Zahra goes on to highlight the contributions of the different strategic approaches as well as their shortcomings He concludes by identifying several implications for future research **Nascent Entrepreneurship and Successful New Venture Creation** António Carrizo Moreira, José Guilherme Leitão Dantas, Fernando Manuel Valente, 2018 Examines current trends and methodologies of recent entrepreneurs and entrepreneurial activities Highlighting relevant topics that include non cognitive skills intellectual capital protection regional development and technology based firms this scholarly reference source is an ideal publication for business managers organisational leaders professionals and researchers
