Toward a Theology of Eros Virginia Burrus, Catherine Keller, 2009-08-25 What does theology have to say about the place of eroticism in the salvific transformation of men and women even of the cosmos itself How in turn does eros infuse theological practice and transfigure doctrinal tropes Avoiding the well worn path of sexual moralizing while also departing decisively from Anders Nygren s influential insistence that Christian agape must have nothing to do with worldly eros this book explores what is still largely uncharted territory in the realm of theological erotics The ascetic the mystical the seductive the ecstatic these are the places where the divine and the erotic may be seen to converge and love and desire to commingle Inviting and performing a mutual seduction of disciplines the volume brings philosophers historians biblical scholars and theologians into a spirited conversation that traverses the limits of conventional orthodoxies whether doctrinal or disciplinary It seeks new openings for the emergence of desire love and pleasure while challenging common understandings of these terms It engages risk at the point where the hope for salvation paradoxically endangers the safety of subjects in particular of theological subjects by opening them to those transgressions of eros in which boundaries once exceeded become places of emerging possibility The eighteen chapters arranged in thematic clusters move fluidly among and between premodern and postmodern textual traditions from Plato to Emerson Augustine to Kristeva Mechthild to Mattoso the Shulammitte to Molly Bloom the Zohar to the Da Vinci Code In so doing they link the sublime reaches of theory with the gritty

realities of politics the boundless transcendence of God with the poignant transience of materiality
