means sparse vegetation and results in exposed geological features One can think of the raw features as the earth without the makeup of vegetation Deserts can be stark creating a drama of space color relief and sheer ruggedness Despite the sparse vegetation deserts in the southwest United States are full of life hundreds of plant species scores of bird species and many other animals The best way to observe the flora and fauna is on foot far from urban areas This guide is about hiking and generally exploring desert areas specifically southern Nevada There is no better way to experience the ruggedness the history of settlement by Native Americans and later pioneers and the solitude than by simply hiking and exploring My purpose in writing this book is to enhance the enjoyment of all who wish to sample the richness of southern Nevada My wife Deb Looker accompanied me on every hike This book is a testament to her love of the outdoors as much as mine Through trial and error from scores of hikes reading many hiking books and much Internet research we have become experienced desert hikers More than 25 years ago we began seriously exploring the American Southwest During the first several years we concentrated on areas fairly close to our then home in Santa Barbara California the Mojave Desert around Barstow and Baker and Death Valley We later branched out to Joshua Tree National Park and Anza Borrego Desert State Park in south central California In the early 2000s Arizona became a favorite destination Finally we began exploring southern Utah in 2006 In the fall of 2009 we left California and settled in St George Utah St George is a great base camp for adventures in southwest Utah southern Nevada and northern Arizona While we much enjoy the grandeur of big name desert national parks Death Valley Zion Bryce Canyon the Grand Canyon and others our preference is hard to find out of the bustle of humanity slot canyons Fortunately the area we choose to live is full of slot canyons I wrote the 25 stories in this book to describe the natural beauty where we hiked and to inspire people to get out and enjoy nature Go outdoors and relax leave the pressures of daily life behind for a few hours These hikes are not hard core three day backpacking treks through the wilderness That is a great thing but not for most people even those who enjoy the outdoors There are many good hiking books with long tough hikes this is not one of them These are more of get off the couch or out of your daily rut and see what nature plate tectonics and erosion have given you These stories and hikes are for the average person family that understands the value of nature but never quite gets out to enjoy it My approach to writing is less formal than found in other hiking books I m not above making a joke out of slogging through loose sand or commenting on how rocks in a wash kept grabbing at my feet and that is the reason for my stumbles Humor and not taking myself too seriously are important parts of my life and these stories reflect that At the same time detailed directions for finding sometimes obscure trailheads the hike itself and where to look for interesting features are provided
