Understanding Richard Powers Joseph Dewey, 2002 Dewey contends that while Powers's novels investigate the most pressing issues of the new millennium the novelist is most deeply interested in the same thematic argument that consumed Ralph Waldo Emerson and Emily Dickinson the problem of the self the deep and unshakable loneliness that has always been at the heart of the American literary imagination BOOK JACKET *Time and the Literary* Karen Newman, Jay Clayton, Marianne Hirsch, 2013-09-13 Time and the literary the immediacy of information technology has supposedly annihilated both Email cell phones satellite broadcasting seem to have ended the long standing tradition of encoding our experience of time through writing Paul de Man's seminal essay *Literary History and Literary Modernity* and newly commissioned essays on everything from the human genome to grammatical tenses argue however that the literary constantly reconstructs our understanding of time From eleventh century France or a science fiction future Time and the Literary shows how these two concepts have been and will continue to influence each other **Goldbug Variations** Powers, 1994-03-01 [Wild Science](#) Janine Marchessault, Kim Sawchuk, 2013-10-18 Wild Science investigates the world wide boom in health culture While self help health books and medical dramas are popular around the globe we are bombarded with daily media images of DNA research and news reports about cloning the fight against AIDS cancer and depression With popular culture now the principal means through which the non scientific population encounters science why do certain images of science get promoted above others Contributors examine the public meanings of science revealing the frictions and contradictions within popular representations of what medicine can and should do Focusing on the visual culture of medicine

they show how representations of science have a direct impact on popular perceptions of the limits of science and ultimately on health education funding and research and examine the belief that media literacy in popular representations of medicine makes an ethical public discourse on the aims of science possible With sections addressing the new visual technologies which make the human body into a virtual territory the diagnostic and medical practices centered around women's bodies and popular debates around genetics and identity Wild Science argues that science is a practice bound in values and institutions and argues for a responsible engagement with the public cultures of science and health

Adaptation and Appropriation
Julie Sanders, 2015-11-19 From the apparently simple adaptation of a text into film theatre or a new literary work to the more complex appropriation of style or meaning it is arguable that all texts are somehow connected to a network of existing texts and art forms In this new edition *Adaptation and Appropriation* explores multiple definitions and practices of adaptation and appropriation the cultural and aesthetic politics behind the impulse to adapt the global and local dimensions of adaptation the impact of new digital technologies on ideas of making originality and customization diverse ways in which contemporary literature theatre television and film adapt revise and reimagine other works of art the impact on adaptation and appropriation of theoretical movements including structuralism post structuralism postcolonialism postmodernism feminism and gender studies the appropriation across time and across cultures of specific canonical texts by Shakespeare Dickens and others but also of literary archetypes such as myth or fairy tale Ranging across genres and harnessing concepts from fields as diverse as musicology and the natural sciences this volume brings clarity to the complex debates around adaptation and appropriation offering a much needed resource for those studying literature film media or culture

Genre Bending Jeremy Rosen, 2025-12-09 Detective horror fantasy romance science fiction spy thrillers westerns zombie novels In recent decades acclaimed and ambitious writers of literary fiction have increasingly gravitated to popular fiction genres In this comprehensive account Jeremy Rosen describes literary fiction's embrace of genre fiction's conceits as genre bending and argues that while literary writers adopt genres for a wide variety of purposes what they share is a revitalized attitude toward genre a recognition that while genres can be used in formulaic ways they can also be adapted and transformed endlessly Rosen reads across the outpouring of fiction of the last several decades by writers like Margaret Atwood Michael Chabon Jennifer Egan Louise Erdrich Kazuo Ishiguro Chang-rae Lee David Mitchell Cormac McCarthy Ian McEwan Haruki Murakami and Colson Whitehead He finds that literary writers' embrace of popular genres is the product of several seemingly contradictory forces including their attempt to extend a modernist inspired project of formal experiment to pursue high cultural prestige and to preserve the distinctiveness of the literary which they perceive to be under threat while also embracing the role of providing pleasure to readers Examining what today's most critically acclaimed and widely read literary writers have done with the genres of genre fiction **Genre Bending** reveals the values practices and forms as well as the tensions that constitute literary fiction today

Reading Today Heta Pyrhönen, Janna Kantola, 2018-01-15 New technologies are changing our reading habits Laptops e readers tablets and other handheld devices supply new platforms for reading and we must learn to manage them by scrolling clicking or tapping **Reading Today** places reading in current literary and cultural contexts in order to analyse how these contexts challenge our conceptions of who reads what reading is how we read where we read and for what purposes and then responds to the questions this analysis raises Is our reading experience becoming a flat one And does reading in a media environment favour quick reading Alongside these questions the contributors unpack emerging strategies of reading They consider for example how paying attention to readers' emotional reactions as an indispensable component of reading affects our conception of the reading process Other chapters consider how reading can be explored through such topics as experimental literature the contemporary encyclopedic novel and the healing power of books

Narrated Communities - Narrated Realities, 2015-05-19 Culture studies try to understand how people assume identities and how they perceive reality In this perspective narration as a basic form of cognitive processing is a fundamental cultural technique Narrations provide the coherence temporal organization and semantic integration that are essential for the development and communication of identity knowledge and orientation in a socio-cultural context In essence Anderson's Imagined Communities need to be thought of as Narrated Communities from the beginning Narration is made up by what people think and vice versa narration makes up people's thoughts What is considered fictitious or real no longer separates narratives from an outside they refer to but rather represents different

narratives Narration not only constructs notions of what was real in retrospect but also prospectively creates possible worlds even in the supposedly hard sciences as in e g the imaginative simulation of physical processes The book s unique interdisciplinary approach shows how the implications of this fundamental insight go far beyond the sphere of literature and carry weight for both scholarly and scientific disciplines

Music and the Forms of Life Lawrence Kramer, 2022-10-04

Inventors in the age of the Enlightenment created lifelike androids capable of playing music on real instruments Music and the Forms of Life examines the link between such simulated life and music which began in the era s scientific literature and extended into a series of famous musical works by Haydn Mozart and Beethoven Music invented auditory metaphors for the scientific elements of life drive pulse sensibility irritability even metabolism investigated the affinities and antagonisms between life and mechanism and explored questions of whether and how mechanisms can come to life The resulting changes in the conceptions of both life and music had wide cultural resonance at the time and those concepts continued to evolve long after A critical part of that evolution was a nineteenth century shift in focus from moving androids to the projection of life in motion culminating in the invention of cinema Weaving together cultural and musical practices Lawrence Kramer traces these developments through a collection of case studies ranging from classical symphonies to modernist projections of waltzing specters by Mahler and Ravel to a novel linking Bach s Goldberg Variations to the genetic code The publisher gratefully acknowledges the generous support of the AMS 75 PAYS Fund of the American Musicological Society supported in part by the National Endowment for the Humanities and the Andrew W Mellon Foundation

The Cambridge Companion to Don DeLillo John N. Duvall, 2008-05-29 With the publication of his seminal novel *White Noise* Don DeLillo was elevated into the pantheon of great American writers His novels are admired and studied for their narrative technique political themes and their prophetic commentary on the cultural crises affecting contemporary America In an age dominated by the image DeLillo's fiction encourages the reader to think historically about such matters as the Cold War the assassination of President Kennedy threats to the environment and terrorism This Companion charts the shape of DeLillo's career his relation to twentieth century aesthetics and his major themes It also provides in depth assessments of his best known novels *White Noise* *Libra* and *Underworld* which have become required reading not only for students of American literature but for all interested in the history and the future of American culture

Contemporary Reconfigurations of American Literary Classics Betina Entzminger, 2013-03-05 The number and popularity of novels that have overtly reconfigured aspects of classic American texts suggests a curious trend for both readers and writers an impulse to retell and reread books that have come to define American culture This book argues that by revising canonical American literature contemporary American writers are re writing an American myth of origins creating one that corresponds to the contemporary writer's understanding of self and society Informed by cognitive psychology evolutionary literary criticism and poststructuralism Entzminger reads texts by canonical authors Poe Hawthorne Melville Alcott Twain Chopin and Faulkner and by the contemporary writers that respond to them In highlighting the construction and cognitive function of narrative in their own and in their antecedent texts contemporary writers highlight the fact that such use of narrative is universal and essential to human beings This book suggests that by revising the classic texts that compose our cultural narrative contemporary writers mirror the way human individuals consistently revisit and refigure the past through language via self narration in order to manage and understand experience

Diseases and Disorders in Contemporary Fiction James Peacock,Tim Lustig,2013-04-17 The essays in this collection address the current preoccupation with neurological conditions and disorders in contemporary literature by British and American writers The book places these fictional treatments within a broader cultural and historical context exploring such topics as the two cultures debate the neurological turn postmodernism and the post postmodern and responses to September 11th Considering a variety of materials including mainstream literary fiction the graphic novel popular fiction autobiographical writing film and television contributors consider the contemporary dimensions of the interface between the sciences and humanities developing the debate about the post postmodern as a new humanism or a return to realism and investigating questions of form and genre and of literary continuities and discontinuities Further the essays discuss contemporary writers attempts to engage the relation between the individual and the social looking at the relation between the syndrome syndrome referring to the prevalence in contemporary literature of neurological phenomena evident at the biological level and existing work in the field of trauma studies where explanations tend to have taken a psychoanalytical form allowing for perspectives that question some of the assumptions that have marked both these fields The current literary preoccupation with neurological conditions presents us with a new and distinctive form of trauma literature one concerned less with psychoanalysis than with the physical and evolutionary status of human beings
