*The Context of Holiness: Psychological and Spiritual Reflections on the Life of St. Thérèse of Lisieux* Marc Foley, 2020-03-27 This book explores both the psychological and spiritual dimensions of the life of St. Thérèse of Lisieux. The basic premise of this book is that the spiritual life is not an encapsulated sphere cloistered from the realities of our human existence. Rather, it is our response to God within the physical, psychological, social, and emotional dimensions of life. St. Thérèse did not grow in holiness apart from the human condition. Like all of us, she was emotionally scarred by the fragileness of life. She was deeply wounded by the death of her mother at the age of four, bedridden as the result of a neurotic episode when she was ten, struggled with debilitating scruples most of her life, and suffered an agonizing dark night of faith. St. Thérèse was no plaster statue saint. Her life was a real life. As it unfolds before us on the pages of *Story of a Soul*, we see a pilgrim soul who made her way home to God through many raging storms and dark nights. The specific nature of Thérèse's trials may differ from our own, but psychological and emotional suffering are our common lot. For example, we may not have known the pain of our mother dying when we were four, but most of us have known the pain of the loss of a loved one. The sufferings that we share with Thérèse are universal: physical pain, anxiety, anger, sadness, depression, loneliness, doubts of faith, to name a few. These sufferings make doing the will of God difficult, but they are the context of our choices. They are the context of holiness.

Helping Children and Teens with Difficult-to-Treat OCD Karen Lynn Cassiday, 2023-05-25 Treating subtypes of OCD such as scrupulosity, harm, existential, and relationship OCD in children and adolescents can often present a wealth of challenges. The nature of these lesser-known subtypes can make delivering common aspects of OCD treatment, including planning relevant exposures and incorporating key adults in the child's treatment, difficult. Drawing from years of professional experience, Karen Lynn Cassiday provides comprehensive guidance using a wealth of case examples on how you can overcome these hurdles in the therapy room. Whether a newly qualified or experienced clinician, this book is essential for all practitioners wanting to tackle the clinical dilemmas generated when treating complex OCD in children, teens, and emerging adults. Bonus content: This book also gives access to a free video series containing demonstrations of exposure practice for each OCD subtype.

**Mad Studies Reader** Bradley Lewis, Alisha Ali, Jazmine Russell, 2024-09-30 The last few years have brought increased writings from activists, artists, scholars, and concerned clinicians that cast a critical and constructive eye on psychiatry, mental health care, and the cultural relations of mental difference. With particular focus on accounts of lived experience and readings that cover issues of epistemic and social injustice in mental health discourse, the *Mad Studies Reader* brings together voices that advance anti-sanist approaches to scholarship, practice, art, and activism in this realm. Beyond offering a theoretical and historical overview of mad studies, this Reader draws on the perspectives, voices, and

experiences of artists mad pride activists humanities and social science scholars and critical clinicians to explore the complexity of mental life and mental difference Voices from these groups confront and challenge standard approaches to mental difference They advance new structures of meaning and practice that are inclusive of those who have been systematically subjugated and promote anti sanist approaches to counter inequalities prejudices and discrimination Confronting modes of psychological oppression and the power of a few to interpret and define difference for so many the Mad Studies Reader asks the critical question of how these approaches may be reconsidered resisted and reclaimed This collection will be of interest to mental health clinicians students and scholars of the arts humanities and social sciences and anyone who has been affected by mental difference directly or indirectly who is curious to explore new perspectives

Useful Fictions Michael Austin, 2011-01-01 We tell ourselves stories in order to live Joan Didion observed in *The White Album* Why is this Michael Austin asks in *Useful Fictions* Why in particular are human beings whose very survival depends on obtaining true information so drawn to fictional narratives After all virtually every human culture reveres some form of storytelling Might there be an evolutionary reason behind our species need for stories Drawing on evolutionary biology anthropology narrative theory cognitive psychology game theory and evolutionary aesthetics Austin develops the concept of a useful fiction a simple narrative that serves an adaptive function unrelated to its factual accuracy In his work we see how these useful fictions play a key role in neutralizing the overwhelming anxiety that humans can experience as their minds gather and process information Rudimentary narratives constructed for this purpose Austin suggests provided a cognitive scaffold that might have become the basis for our well documented love of fictional stories Written in clear jargon free prose and employing abundant literary examples from the Bible to *One Thousand and One Arabian Nights* and *Don Quixote* to *No Exit* Austin's work offers a new way of understanding the relationship between fiction and evolutionary processes and perhaps the very origins of literature

**Obsession** Lennard J. Davis, 2009-05-15 We live in an age of obsession Not only are we hopelessly devoted to our work strangely addicted to our favorite television shows and desperately impassioned about our cars we admire obsession in others we demand that lovers be infatuated with one another in films we respond to the passion of single minded musicians we cheer on driven athletes To be obsessive is to be American to be obsessive is to be modern But obsession is not only a phenomenon of modern existence it is a medical category both a pathology and a goal Behind this paradox lies a fascinating history which Lennard J Davis tells in *Obsession* Beginning with the roots of the disease in demonic possession and its secular successors Davis traces the evolution of obsessive behavior from a social and religious fact of life into a medical and psychiatric problem From obsessive aspects of professional specialization to obsessive compulsive disorder and nymphomania no variety of obsession eludes Davis's graceful analysis

The Politics and Psychoanalysis of Comedy Robert Samuels, 2023-11-20 This book looks at the political aspects of comedy and how humor is shaped by unconscious social and psychological factors within a particular cultural and historical context Updating Freud's work on

jokes Robert Samuels argues that any universal model of comedy must take into account the role played by distinct genres which are themselves determined by particular political psychopathologies In looking at contemporary comedy we encounter a structure that is often seen throughout the world in response to what is experienced as a Leftist super ego censoring thoughts and speech and a Libertarian Right which promotes free speech as the ultimate value Within this dynamic comedians seeking to make their audience laugh by poking fun at sensitive and taboo subjects intentionally and unintentionally these humorists present an alternative to Left wing political correctness and identity politics Contemporary comedians then cannot help but to cater to Right wing politics since the Right is centered on loudly rejecting the cultural dictations of the Left

positive outlooks and creativity      Postcolonial Imaginings David Punter, 2000 This deeply engaging historically and culturally informed book provides new perspectives on a wide range of writers and at the same time provides a radically new development of many of the most pertinent issues in the field of postcolonial writing and theory It constitutes a major new engagement between the postcolonial and a conception of the literary that is richly innovative in its deployment of psychoanalytic deconstructive and other approaches to the text The book begins with some brief background to the issue of decolonization and its contemporary effects It is informed throughout by a clear sense of literary and political context within which chosen texts by well known writers Derek Walcott Chinua Achebe Edward Kamau Brathwaite as well as less well known ones Joan Riley Susan Power Abdulrazak Gurnah and writers not often seen in a postcolonial context James Kelman Seamus Deane Hanif Kureishi can be situated The chapters that follow are based around themes such as violent geographics hallucination dream and the exotic mourning and melancholy diaspora and exile delocalization and the alibi This profoundly new approach to the complexities of the postcolonial allows the reader to appreciate some of the richness but at the same time the political and cultural ambivalence which underlies postcolonial writing Throughout the book David Punter continually questions as one would expect from his many previous books the definition and scope of the postcolonial It is seen throughout as a phenomenon not restricted to the ex or neo colonies but as a key characterisation of all our lives at the beginning of the twenty first century It is an indissoluble part of the development of national imaginings and at the same time an alibi for the emergence of a violently assertive new world order committed to the management and obliteration of difference By juxtaposing texts from different cultural traditions and topographies from *Things Fall Apart* to *The Bone People* from Anot      *The Publishers Weekly* ,1997
