The Numerology of the I Ching Taoist Master Alfred Huang, 2000-07-01. The first book to cover the complete Taoist teachings on form, structure, and symbol in the I Ching. Provides many new patterns and diagrams for visualizing the layout of the 64 hexagrams. Includes advanced teachings on the hosts of the hexagrams, the mutual hexagrams, and the core hexagrams. Written by Taoist Master Alfred Huang, author of *The Complete I Ching*. The Numerology of the I Ching is the first book to bring the complete Taoist teachings on form, structure, and symbol in the I Ching to a Western audience, and it is a natural complement to Alfred Huang's heralded *Complete I Ching*. It examines not only the classic circular arrangement of the eight trigrams but also the hidden numerology in this arrangement and its relationship to tai chi and the Chinese elements. Huang explains the binary code underlying the I Ching, the symbolism behind the square diagram of all 64 hexagrams, and Fu Xi's unique circular layout of the 64 hexagrams, completely unknown in the West. Entire chapters are devoted to such vital material as the hosts of the hexagrams, the mutual hexagrams, and the core hexagrams, all barely hinted at in previous versions of the I Ching. With appendices listing additional symbolism for each hexagram, formulas for easily memorizing the Chinese names of the sixty-four hexagrams, and much more. The Numerology of the I Ching is a must for serious I Ching students.

Fascinated with Science Yufeng Zhao, 2025-04-28 Aesthetic criticism of science is a historically established practice to advance fundamental research particularly in physics and mathematics However it was criticized that many terms currently used for aesthetic criteria are bounty words that promise some benefit that cannot be controlled or measured In this book a theory of aesthetics is formulated based on Genesis 1 and the Book of Changes and applied to analyze classical mechanics thermodynamics and electrodynamics The aesthetic criticism casts new light on the foundation of physics and the internal tension that appeals for their transition to modern physics Unambiguous rationale for fundamental laws of physics is revealed and rich aesthetic facets are exposed in the structure of theories For example each of the three branches of classical physics has four fundamental laws which are found to be structurally related to each other in the same pattern required by aesthetic principles The informing power of these aesthetic principles for modern science lies in that they are deeply tethered to the origin of beauty and the way beauty is expressed
