*Cross-Cultural Computing: An Artist's Journey* Naoko Tosa, 2016-03-01 This exciting new book explores the relationship between cultural traditions and computers looking at how people from very different cultures and backgrounds communicate and how the use of information technologies can support and enhance these dialogues Historically we developed our understanding of other cultures through traditional means museums printed literature etc but the advent of information technologies has allowed us access to a plethora of material Tosa asks the question Can we understand other cultures using computers as media to supplement thinking and memorization Starting with a survey of art and technology moving into the area of culture and technology the book culminates with a vision of a new world based on an understanding of these relationships allowing cultural creators and viewers the opportunity to reach a better and more profound understanding of the role information technology will play going forward

*Cross-Cultural Multimedia Computing* Shlomo Dubnov, Kevin Burns, Yasushi Kiyoki, 2016-08-19 The ability to communicate cultural codes in multimedia depends on their meaning and beauty as perceived by different audiences around the globe In this book the ongoing research on computational modeling of visual musical and textual contents is described in terms of identifying and mapping their semantic representations across different cultures The underlying psychology of sense making is quantified through analysis of aesthetics in terms of organizational and structural aspects of the contents that influence an audience's formation of expectations for future signals violations of these expectations and explanations of their meaning Complexity accuracy tradeoffs in sound representation are further used to develop new computational methods that capture poetic and aesthetic aspects in music communication Experimental studies are reported that try to characterize preferences for complexity in abstract classical and traditional art and music across samples of Western and Far Eastern cultures These experiments illustrate how aesthetics can be computed in terms of semantic and information measures highlighting commonalities and uncovering differences in aesthetic preferences across cultures and individuals
