## **And Defence Capabilities Small States Asia Pacific:**

The Digital Environment and Small States in Europe Viktorija Car, Marta Zorko, 2025-07-25 The Digital Environment and Small States in Europe delves into how the digital revolution intersects with global security dynamics and reshapes the geopolitical landscape. It sheds light on the geopolitical complexities inherent in the border regions of the European continent and proposes frameworks to better understand and engage with small state dynamics in international affairs. At the heart of this book is an examination of the transformative power of digitalization and virtualization, particularly pronounced in the context of small states. Traditionally, power was synonymous with territorial control, but in today's world, influence extends into the virtual realm. Small states, despite their physical limitations, can leverage this virtual extension of territory to their advantage. However, realizing and strategically utilizing these advantages are essential for capitalizing on the opportunities presented. Conversely, small states lacking digital capabilities find themselves increasingly vulnerable in the virtual sphere, facing heightened security threats and challenges. Through a series of theoretical and case study based chapters, this book offers insights into the strategies employed by small states to navigate these complexities and assert their influence on the global stage. Key themes explored include the impact of digitalization on geopolitical dynamics, the role of cybersecurity in safeguarding national interests, and the emergence of digital diplomacy as a tool for statecraft. The Digital Environment and Small States in Europe will be of great interest to scholars and students of international relations, geopolitics, and political science, as well as security, media, and communication studies. Additionally, policymakers and analysts involved in foreign policy and security affairs may find valuable insights in the book's exploration of small state strategies and vulnerabilities.

Asia-Pacific Security Andrew Carr, Joanne Wallis, 2016 This new textbook gathers an international roster of top security studies scholars to provide an overview of Asia Pacific's international relations and pressing contemporary security issues. It is a suitable introduction for undergraduate and masters students use in international relations and security studies courses. Merging a strong theoretical component with rich contemporary and historical empirical examples, Asia Pacific Security examines the region's key players and challenges, as well as a spectrum of proposed solutions for improving regional stability. Major topics include in-depth looks at the United States relationship with China, security concerns presented by small and microstates, the region's largest group of nations, threats posed by terrorism and insurgency, the region's accelerating arms race, and the potential for an Asian war, the possible roles of multilateralism, security communities, and human security as part of solutions to regional problems.

**Making Sense of Cyber Capabilities for Small States** Francis C. Domingo, 2022-03-28 Domingo explores the potential of cyber capabilities for small states in the Asia Pacific, the most active region for cyber conflict. He develops a systematic explanation for why Brunei, New Zealand, and Singapore have developed or are developing cyber capabilities. Studies on cyber conflict and strategy have substantially increased in the past decade, but most have focused on the cyber operations of powerful states. This book moves away from the prominence of powerful states

and explores the potential of cyber capabilities for small states in the Asia Pacific the most active region for cyber conflict It develops a systematic explanation of why Brunei New Zealand and Singapore have developed or are developing cyber capabilities despite its obscure strategic value The book argues that the distribution of power in the region and a technology oriented strategic culture are two necessary conditions that influence the development of cyber capabilities in small states Following this argument the book draws on neoclassical realism as a theoretical framework to account for the interaction between these two conditions The book also pursues three secondary objectives First it aims to determine the constraints and incentives that affect the utilization of cyber capabilities as foreign policy instruments Second the book evaluates the functionality of these cyber capabilities for small states Lastly it assesses the implications of employing cyber capabilities as foreign policy tools of small states This book will be an invaluable resource for academics and security analysts working on cyber conflict military strategy small states and International Relations in general *Asia's Aging Security* Andrew L. Oros, 2025-09-09

Major demographic transitions are underway in Asia and the Pacific The populations of China Japan Taiwan South Korea and Russia are aging and shrinking while India the Philippines Vietnam and Australia among others continue to grow How will these striking changes affect regional security dynamics and the United States led alliance structure in the Indo Pacific Andrew L Oros offers an expert analysis of how rapid aging and population shifts are transforming the military strategies and capabilities of regional powers in Asia Examining sixteen states he provides a comparative view of the developing landscape and explores ways to address the consequences Oros demonstrates that contrary to what many have claimed states with shrinking populations will continue to be formidable military powers He develops a novel theoretical and empirical argument for why rapid aging does not necessarily dampen security competition Nonetheless demographic shifts in the coming decades will fundamentally alter the security challenges facing the United States and its allies Oros considers how technological change and health care advances are mitigating the drawbacks of aging populations as well as how factors such as autonomous defense systems and artificial intelligence present new challenges Rigorous and timely *Asia's Aging Security* makes a forceful case that adjustment to demographic change is a necessity for twenty first century foreign policy

**European Strategic Autonomy and Small States' Security** Giedrius Česnakas, Justinas Juozaitis, 2022-12-26 This book analyses whether the EU's drift towards European strategic autonomy presents a challenge or a window of opportunity for its small member states to advance their security interests The volume presents small states perceptions of European strategic autonomy highlighting their expectations and concerns The chapters focus on the depth and breadth of European strategic autonomy national security considerations assessment of the impact on transatlantic relations the expected outputs and its potential impact on the EU's institutional structure It also shows how systemic circumstances and the interests of powerful states either belonging to the EU France Germany and Poland or having a significant say in European security architecture the US establish opportunities and constraints for the small states to shape European strategic autonomy In particular the

study focuses on the diverging interests of the Baltic states Estonia Latvia and Lithuania Belgium Denmark Greece Hungary and the Netherlands It demonstrates that in most cases European strategic autonomy is perceived not as an alternative to NATO but as a supplementary element that could facilitate the development of national military capabilities indigenous defence industries and resilience to non military threats Ultimately the book suggests that national approaches towards European strategic autonomy mainly stem from pragmatic national security and foreign policy considerations while largely ignoring grand strategic ideas This book will be of much interest to students of European politics security studies and international relations The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**New Zealand's Foreign Policy Under The Jacinda Ardern Government: Facing The Challenge Of A Disrupted World** Robert G. Patman, Dennis Wesselbaum, Balazs Kiglics, Peter Grace, 2024-03-14 The purpose of this book is to examine the foreign policy of Jacinda Ardern's New Zealand Government between 2020 and early 2023, when the COVID-19 pandemic intersected with an evolving and often tumultuous post-Cold War global environment. This context witnessed the erosion of an international rules-based order and the renewal of great power competition. In particular, the Indo-Pacific has become a contested strategic space which impacted on New Zealand's foreign policy interests. As a self-proclaimed small state, New Zealand faced distinct challenges. The Ardern Government formulated a distinctive foreign policy that drew on the success of its handling of the pandemic as well as Aotearoa New Zealand's indigenous values and emphasised the importance of a good international reputation, strong diplomatic networks, and multilateral cooperation to maintain and grow its influence. This interdisciplinary volume brings together academics, policymakers, and practitioners and provides essential reading for anyone interested in how relatively small states such as New Zealand can navigate significant foreign policy challenges in an increasingly complex and contested system of international relations.

**The Arms Race in Asia** Andrew T.H. Tan, 2013-12-13 This book is the first systematic examination of the emerging arms race in Asia The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East the two largest arms export markets in the world Of these two regions Asia has become particularly significant led by the emergence of China and India as major powers It is therefore not surprising that the rapid military modernisation in Asia accompanied by significant increases in the size and sophistication of armed forces has generated attention as to its trends key characteristics causes and implications This phenomenon which has become evident since the end of the Cold War has also been widely described as an Asian arms race This book evaluates the key conceptual ideas which can shed light on this phenomenon as well as examining the complex mix of internal external and technological factors that have led to its emergence The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape a loose bloc of US allies in the region a counter bloc of potential US adversaries and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments The Arms Race in Asia concludes that if the emerging arms race is left unchecked it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars The book will be of great interest to students of Asian politics strategic studies defence studies security studies and IR in general
